

Content

INTERNATIONAL COMMITTEE	2
CONTENT	3
ABSTRACTS.....	4
Catalytic decomposition of N ₂ O – from laboratory experiments to industrial application	5
Modified minerals as new catalysts for selective reduction of NO _x with ammonia	6
The possibility of increasing the production of methane in biogas station Pustějov.....	7
Method for destruction of selected halogenated chemicals.....	9
Organochlorine pesticides and polychlorinated biphenyls in air and soil across Azerbaijan.....	10
Catalytic filters for soot combustion	11
Identification of nanomaterials in ambient air.....	12
Methods for measurement of endocrine disruption chemicals in biotic and environmental samples.....	13
Strategy for application of passive sampling techniques for water and ambient air monitoring.....	14
A protocol for complex environmental data analysis using R-project™	15
Robust approach for environmental and health practice: novel paradigm for data treatment and analysis.....	16
Addition of platelet concentrate to Dermo-Epidermal Skin Graft in deep burn trauma reduces scarring and need for revision surgeries.	17
Liposomes as a transport system of encapsulated drugs.....	18
Issues of development and production of active pharmaceutical ingredients and finished dosage forms from the point of view of safety assurance, with particular attention to import from third countries	19
Problem of counterfeit medicines: Causes of existence and possible ways of solving.....	20
Dissolution testing as a tool in quality assurance of pharmaceuticals	21
An evaluation of concentration variability of selected heavy metals in dandelion (<i>Taraxacum officinale</i>) growing in the areas of different anthropopressure	22
The device for the waste utilization using a new pyrolytic-plasma method	23
New method of cleaning high-temperature gases.....	24
Is there perfect detector for HPLC/MS/MS system ?	25
General unknown screening and targeted approach in LC/MS/MS measurements.....	26
Application of pyrolysis process in processing of selected food wastes.....	27
Fish as bioindicator of environmental pollution: using GC-MS/MS technique as an efficient tool for control.....	28
N ₂ O decomposition over catalysts prepared by accreting of active phase on the support	29
Effect of silver doping on the TiO ₂ for photocatalytic reduction of CO ₂	30
The balancing of VOC concentration fluctuations by adsorption/desorption process on activated carbon	31
Results and key aspects of environmental impact assessment process of wind farms.....	32
ALKALI METALS AS PROMOTERS IN Co-Mn-Al MIXED OXIDE FOR N ₂ O DECOMPOSITION.....	33
Ibuprofen analysis by flow injection metod	34
The developement of qualitative and quantitative analysis for determination of phenolic compounds.....	35
Photocatalytic decomposition of N ₂ O on Ag-TiO ₂ catalysts	36
Evaluation of reduction thermal processing of tire and waste car wrecks parts by the pyrolysis and by the gasification process	37
High-resolution accurate mass (HRAM) liquid chromatography-mass spectrometry (LCMS) for life science applications:	38
High Resolution Mass Spectrometry Screening for Pesticides and Toxicology Compounds.....	39
NANOMATERIALS AND ENVIRONMENT.....	40
Nanomaterials for environmental applications.....	41
Evaluation of nanomaterials risks.....	42
The Role of Genotoxicity Assessment in the Production of Nanomaterials	43
Perspectives of nanoparticles in pharmacy	44
