

This new edition continues to portray the rich diversity of human life across the world and humanise geographic issues by representing the lives of women, men, and children in the various regions of the globe. The authors continue to update the data in the text, maps and the analysis they offer, in particular reorienting discussions from focusing on problems to presenting possible solutions. In striving to reach these goals, this eighth edition of *World Regional Geography* is up to date, instructive, and visually appealing.

Highlights of the eighth edition include:

- Two new photo essays in each chapter. A new Population, Gender, and Culture photo essay is based on a map of the region's performance on the Gender Development issue.
- New learning objectives. Learning objectives appear on the chapter opener and provide students with a framework for what they are expected to learn by studying the chapter.
- New Check Your Understanding quizzes. Each major section now ends with a brief quiz that tests students' knowledge of what they have just read.
- New emphasis on thematic connections. In the Critical Thinking Questions we have added a diagram showing the linkages among themes, and many of the questions now help students consider issues from multiple thematic angles.
- Revised Power and Politics maps. The maps showing conflict zones and the extent of democratization have been thoroughly updated to reflect the developments of the last few years.

For the first time, this textbook comes with SaplingPlus, the best online resource to teach students the problem-solving skills they need to succeed in Geography. SaplingPlus combines Sapling's acclaimed automatically-graded online homework with an extensive suite of engaging multimedia learning resources.
