List of illustrations (maps, figures, plates)	11
List of tables	17
List of appendices	20
List of abbreviations	21
Foreword by Ladislav Bareš	23
Editors' preface	25
Introduction (Author's Excuse of Why So Late)	29
Acknowledgements	31
 CHAPTER 1 – CEMETERIES AT WADI QITNA AND KALABSHA-SOUTH	 33
 CHAPTER 2 – STATE OF PRESERVATION AND COURSE OF ELABORATION OF THE HUMAN REMAINS	 35
2.1 State of preservation.	35
2.2 Examination of the human skeletal remains	36
 CHAPTER 3 – METHODS OF PROCESSING OF THE OSTEOLOGICAL MATERIAL	 39
3.1 Determination of age-at-death	39
3.2 Determination of sex	40
3.3 Osteometry.	40
3.4 Cranioscopy	40
3.5 Statistics	41
 CHAPTER 4 – RECONSTRUCTION OF THE BURIAL RITES	 43
 CHAPTER 5 – PALAEODEMOGRAPHY	 47
5.1 The number of preserved and reconstructed individuals at Wadi Qitna	47
5.2 Age and sex distribution at the Wadi Qitna cemetery	48
5.3 Age and sex distribution in tumulus groups at Wadi Qitna	48
5.4 Age and sex distribution in the Kalabsha-South sample	51
5.5 Results of sexing by the talus method (by †Vladimír NOVOTNÝ).	51
5.6 Detailed distribution of infants and children at Wadi Qitna.	52
5.7 Detailed distribution of juveniles and adults at Wadi Qitna.	54
5.8 Detailed distribution of individuals in the Kalabsha-South sample	54
5.9 Mean age-at-death of the Wadi Qitna population and the Kalabsha-South sample	55
5.10 Life tables of the Wadi Qitna population.	55
5.11 Size of the Wadi Qitna population	58
5.12 Reproduction of the Wadi Qitna population.	60
5.13 Commentary on the demographic data at Wadi Qitna	60

CHAPTER 6 – MULTIPLE BURIALS	63
6.1 Demography of the basic types of burials at Wadi Qitna.	63
6.2 Demographic analysis of types of multiple burials	64
6.3 Interpretation of the demographic types of multiple burials.	66
6.4 The frequency of interpretative types of multiple burials	68
6.5 Burials of mothers with children at Wadi Qitna	68
6.6 Burials of twins at Wadi Qitna	70
6.7 Multiple burials in the Kalabsha-South sample.	71
6.8 Commentary on the multiple burials	71
CHAPTER 7 – BURIALS IN TUMULUS CLUSTERS	73
7.1 Tumulus clusters at Wadi Qitna and their types	73
7.2 Demographic analysis of small clusters at Wadi Qitna.	74
7.3 Demographic analysis of large clusters at Wadi Qitna	76
7.4 Demographic analysis of tumulus clusters at Kalabsha-South	79
CHAPTER 8 – SOCIAL STRATIFICATION OF THE WADI QITNA POPULATION	81
8.1 Criteria for stratification of the Upper Stratum (I)	81
8.2 Burial and tumulus types of the social strata	84
8.3 Archaeological and demographic features of the principal tumuli	84
8.4 Tribal chiefs and their families	89
8.5 The Middle Stratum (II)	90
8.6 The Lower Stratum (III)	91
8.7 Mean age-at-death of the social strata	91
CHAPTER 9 – CRANIOMETRY	93
9.1 Cerebral skull	93
9.2 Facial skull	94
9.3 Vertical profilation of the face	95
9.4 Mandible	95
9.5 Craniometry of the Kalabsha-South sample.	96
CHAPTER 10 – CRANIOSCOPY	97
10.1 Glabella	97
10.2 Nasofrontal transition	97
10.3 Superciliary arches	98
10.4 Upper orbital margin.	98
10.5 Forehead profile	98
10.6 Frontal eminence.	98
10.7 Parietal tuber	98
10.8 External occipital protuberance.	99
10.9 Mastoid process	99
10.10 Supramastoid crest	99
10.11 Marginal process of Sömmering	99
10.12 Temporal lines.	99
10.13 Nuchal muscular relief	100
10.14 Cranial robusticity	100
10.15 Mental protuberance	100
10.16 Mental tubercles.	100
10.17 Mandibular muscular relief	100
10.18 Illustrations of frontal and lateral views.	100
CHAPTER 11 – EPIGENETIC VARIANTS OF THE SKULL	103
11.1 Material and methods	103

11.2 Epigenetic variants of the WK skulls	103
11.3 Nubian comparative samples	104
11.4 Comparison by mean measure of divergence	105
11.5 Results of the comparison	105
11.6 Discussion of the results	106
CHAPTER 12 – OSTEOOMETRY OF POSTCRANIAL SKELETON BONES	109
12.1 Measurements and indices of the trunk	109
12.2 Measurements and indices of the upper extremity	110
12.3 Measurements and indices of long bones of the lower extremity	110
12.4 Bone proportion indices	111
12.5 Reconstruction of the living stature.	113
12.6 Measurements and indices of short bones of the lower extremity	113
CHAPTER 13 – OSTEOSCOPY OF POSTCRANIAL SKELETON BONES.	115
13.1 Vertebral column.	115
13.2 Sacrum	115
13.3 Sternum.	116
13.4 Hip bone	117
13.5 Upper extremity	117
13.6 Lower extremity	119
CHAPTER 14 – GROWTH OF NON-ADULTS	121
14.1 Growth of the skull.	121
14.2 Growth of the postcranial bones	122
14.3 Estimation of the growth curve of non-adults of Wadi Qitna.	123
14.4 Comparison of the Wadi Qitna growth curve with other series	124
CHAPTER 15 – PALAEOPATHOLOGY (in cooperation with †Luboš VYHNÁNEK)	125
15.1 Congenital anomalies	125
15.2 Degenerative-productive changes of extraspinal joints	127
15.3 Osteophytosis of the spine.	128
15.4 Posttraumatic changes of the cranial vault	129
15.5 Traces of cauterization on the cranial vault	130
15.6 Posttraumatic changes of postcranial bones	130
15.7 Tumours.	132
15.8 Varia.	132
15.9 Functional changes.	133
CHAPTER 16 – DENTITION	135
16.1 Introduction.	135
16.2 State of preservation of the dentition.	135
16.3 Variation in the number and position of the teeth.	136
16.4 Tooth abrasion	138
16.5 Tooth caries.	139
16.6 Intravital tooth losses	139
16.7 Periapical foci and cysts	140
CHAPTER 17 – PALAEOSEROLOGY (by Přemysl KLÍR and †Eugen STROUHAL)	143
17.1 Material and methods	143
17.2 Results of the Wadi Qitna sample.	144
17.3 Nubian and Egyptian palaeoserological samples	144
17.4 Palaeoserological data of the comparative series.	145
17.5 Serological comparisons	145
17.6 Results of the comparisons.	146

CHAPTER 18 – RECONSTRUCTION OF THE DIET AT WADI QITNA.	147
18.1 Trace element analysis (by Václav SMRČKA, Jaroslav JAMBOR and Milan SALAŠ). . .	147
18.1.1 Material and methods	147
18.1.2 Results of the analysis	147
18.1.3 Interpretation of the results	149
18.2 Histological and immunological determination of animal remains (by Alena NĚMEČKOVÁ)	151
18.2.1 Material and methods	151
18.2.2 Result of determination of specimen 63	151
18.2.3 Result of determination of specimen 253	152
18.3 The diet at Wadi Qitna	152
CHAPTER 19 – COMPARATIVE ANALYSES	153
19.1 Series used for comparisons	153
19.2 Univariate tests of significance	158
19.3 Significance of the differences of craniometric features	159
19.4 Mollison's deviation diagrams	166
19.4.1 The Wadi Qitna series	167
19.4.2 The Qustul X-Group series	167
19.4.3 The Qustul Meroitic series	167
19.4.4 The Aksha Meroitic series.	168
19.4.5 The Lower Nubian X-Group and Meroitic series	169
19.4.6 The Nilotic subrecent sample	170
19.4.7 The Jebel Moya series	170
19.4.8 The three mound cemeteries of Sayala.	171
19.4.9 Summary of the results	172
19.5 Penrose Size and Shape Distance multivariate analysis (in cooperation with Karel PREUSS)	172
19.5.1 Features used for the analysis	172
19.5.2 Symbols used in the analysis	172
19.5.3 The matrix of the results	172
19.5.4 Analysis of growing size and shape distances	173
19.5.5 Analysis of the geographic sequence	173
19.5.6 Analysis by cultural/chronological periods.	174
19.5.7 Graphic overview.	175
19.5.8 Cluster analysis.	176
19.5.9 Interpretation of the results	182
CHAPTER 20 – BRIEF HISTORICAL BACKGROUND	183
20.1 <i>Dodekaschoinos</i> in the third to fifth centuries AD	183
20.2 The handmade pottery, or Eastern Desert Ware, from Wadi Qitna and Kalabsha-South (by Hans BARNARD).	185
20.3 The Blemmyes of the Eastern Desert.	189
20.4 Tumuli, mounds, and barrows	190
SUMMARY	191
CONCLUSION.	197
