|   |                    |
|---|--------------------|
| Chapter IX  | Capítulo IX        |
| IX.1. Heteromorphisms   | Geometria de lazos |
| IX.2. The general theory  | 904                |
| IX.3. The multiplicative properties of the groupoids                | 905                |
| IX.4. Special hypotheses  | 906                |
| IX.5. Geometry of topological loops                                 | 907                |
| IX.6. Topological distributive quasigroups                          | 908                |
| <b>Introduction</b>   | ix                 |
| Chapter I   | Capítulo I         |
| <b>T. Evans: Varieties of loops and quasigroups</b>                 | 1                  |
| I.1 Universal algebraic preliminaries                               | 1                  |
| I.2 Free loops and quasigroups                                      | 7                  |
| I.3 Decision problems and the structure of finitely presented loops | 11                 |
| I.4 Classifying loop identities and loop varieties                  | 16                 |
| I.5 Quasigroup varieties and combinatorics                          | 22                 |
| Chapter II  | Capítulo II        |
| <b>O. Chein: Examples and methods of construction</b>               | 27                 |
| II.1 Introduction   | 27                 |
| II.2 Terminology  | 28                 |
| II.3 Extensions   | 35                 |
| II.4 Other constructions using cartesian products                   | 43                 |
| II.5 Isotopy  | 51                 |
| II.6 New operations on algebraic systems                            | 58                 |
| II.7 Miscellaneous algebraic constructions                          | 63                 |
| II.8 Constructions arising from geometry                            | 74                 |
| II.9 Constructions based on designs                                 | 83                 |
| II.10 Summary   | 90                 |
| Chapter III   | Capítulo III       |
| <b>J. D. H. Smith: Centrality</b>                                   | 95                 |
| III.1 Introduction  | 95                 |
| III.2 Equasigroups and their congruences                            | 95                 |
| III.3 Central congruences   | 98                 |
| III.4 Central isotopy   | 102                |
| III.5 3-quasigroups   | 105                |
| III.6 Stability congruences   | 110                |

**Chapter IV**

|   |     |
|---|-----|
| <b>L. Bénéteau: Commutative Moufang loops and related groupoids .....</b> | 115 |
| IV.1 Preliminaries .....  | 115 |
| IV.2 Basic facts about central nilpotence and first consequences .....    | 122 |
| IV.3 Free objects, related groups, and open problems .....                | 128 |

**Chapter V**

|  |     |
|--|-----|
| <b>L. Bénéteau: Cubic hypersurface quasigroups .....</b> | 143 |
| V.1 Definitions and structure theorems .....             | 143 |
| V.2 Geometrical motivations .....                        | 146 |

**Chapter VI**

|   |     |
|---|-----|
| <b>M. Deza, G. Sabidussi: Combinatorial structures arising from commutative Moufang loops .....</b> | 151 |
| VI.1 Introduction .....   | 151 |
| VI.2 Matroidal background .....   | 153 |
| VI.3 Hall systems as perfect matroid designs .....  | 154 |
| VI.4 Erigibility .....  | 156 |
| VI.5 Dimensions .....   | 159 |

**Chapter VII**

|   |     |
|---|-----|
| <b>E. G. Goodaire, M. J. Kallaher: Systems with two binary operations, and their planes .....</b> | 161 |
| VII.1 Introduction and historical background .....  | 161 |
| VII.2 Ternary rings and their planes .....  | 162 |
| VII.3 Quasifields .....   | 169 |
| VII.4 Semifields .....  | 176 |
| VII.5 Derivability .....  | 180 |
| VII.6 Construction of cartesian groups .....  | 183 |
| VII.7 Neofields .....   | 186 |
| VII.8 Loop rings .....  | 189 |

**Chapter VIII**

|  |     |
|--|-----|
| <b>A. Bartotti: Geometry of quasigroups .....</b>                        | 197 |
| VIII.1 Introduction .....  | 197 |
| VIII.2 Staudt's point of view .....                                      | 197 |
| VIII.3 $k$ -transitive and $\omega$ -transitive permutation groups ..... | 201 |
| VIII.4 Klein's point of view in web geometry .....                       | 202 |

**Chapter IV**

|   |     |
|---|-----|
| <b>L. Bénéteau: Commutative Moufang loops and related groupoids</b> ..... | 115 |
| IV.1 Preliminaries .....  | 115 |
| IV.2 Basic facts about central nilpotence and first consequences .....    | 122 |
| IV.3 Free objects, related groups, and open problems .....                | 128 |

**Chapter V**

|  |     |
|--|-----|
| <b>L. Bénéteau: Cubic hypersurface quasigroups</b> ..... | 143 |
| V.1 Definitions and structure theorems .....             | 143 |
| V.2 Geometrical motivations .....                        | 146 |

**Chapter VI**

|   |     |
|---|-----|
| <b>M. Deza, G. Sabidussi: Combinatorial structures arising from commutative Moufang loops</b> ..... | 151 |
| VI.1 Introduction .....   | 151 |
| VI.2 Matroidal background .....   | 153 |
| VI.3 Hall systems as perfect matroid designs .....  | 154 |
| VI.4 Erigibility .....  | 156 |
| VI.5 Dimensions .....   | 159 |

**Chapter VII**

|   |     |
|---|-----|
| <b>E. G. Goodaire, M. J. Kallaher: Systems with two binary operations, and their planes</b> ..... | 161 |
| VII.1 Introduction and historical background .....  | 161 |
| VII.2 Ternary rings and their planes .....  | 162 |
| VII.3 Quasifields .....   | 169 |
| VII.4 Semifields .....  | 176 |
| VII.5 Derivability .....  | 180 |
| VII.6 Construction of cartesian groups .....  | 183 |
| VII.7 Neofields .....   | 186 |
| VII.8 Loop rings .....  | 189 |

**Chapter VIII**

|  |     |
|--|-----|
| <b>A. Barlotti: Geometry of quasigroups</b> .....                        | 197 |
| VIII.1 Introduction .....  | 197 |
| VIII.2 Staudt's point of view .....                                      | 197 |
| VIII.3 $k$ -transitive and $\omega$ -transitive permutation groups ..... | 201 |
| VIII.4 Klein's point of view in web geometry .....                       | 202 |

**Chapter XII**

|   |            |
|---|------------|
| <b>P. O. Miheev, L. V. Sabinin: Quasigroups and differential geometry . . . . .</b> | <b>357</b> |
| XII.1 Smooth universal algebras . . . . .   | 359        |
| XII.2 Canonical affine connections of loopuscular and geodular structures . . . . . | 366        |
| XII.3 Reductive and symmetric geodular spaces . . . . .                             | 374        |
| XII.4 <i>s</i> -Spaces . . . . .  | 389        |
| XII.5 Lie triple algebras . . . . .   | 395        |
| XII.6 Semidirect products of a quasigroup by its transassociants . . . . .          | 398        |
| XII.7 The infinitesimal theory of local analytic loops . . . . .                    | 405        |
| XII.8 Smooth Bol loops . . . . .  | 418        |

## V.2 Geometrical motivations . . . . .

**Chapter XIII**

|   |            |
|---|------------|
| <b>P. D. Gerber: LIP loops and quadratic differential equations . . . . .</b> | <b>431</b> |
| XIII.1 Introduction . . . . .   | 431        |
| XIII.2 Notation and general background . . . . .                              | 431        |
| XIII.3 Quadratic systems . . . . .  | 435        |
| XIII.4 First degree groups . . . . .  | 437        |
| XIII.5 First degree LIP loops . . . . .                                       | 440        |

**Chapter XIV**

|   |            |
|---|------------|
| <b>F. B. Kalhoff, S. H. G. Prieß-Crampe: Ordered loops and ordered planar ternary rings . . . . .</b> | <b>445</b> |
| XIV.1 Some basic facts about ordered loops . . . . .  | 446        |
| XIV.2 Archimedean ordering . . . . .  | 448        |
| XIV.3 Chain of convex subloops and orderability of loops . . . . .                                    | 451        |
| XIV.4 Ordered double loops and ordered planar ternary rings . . . . .                                 | 454        |
| XIV.5 Archimedean planar ternary rings and double loops . . . . .                                     | 458        |
| XIV.6 Preorderings and Artin-Schreier characterization in PTRs . . . . .                              | 461        |
| XIV.7 Spaces of orderings and Witt rings of planar ternary rings . . . . .                            | 463        |
