

CONTENTS

Series Editor's Introduction	ix
About the Authors	xi
Acknowledgments	xiii
Chapter 1. Introduction to Social Network Analysis	1
Chapter 2. Network Fundamentals	7
2.1. Underlying Assumptions	7
2.2. Entities and Relations	10
2.3. Networks	12
2.4. Research Design Elements	14
Chapter 3. Data Collection	21
3.1. Boundary Specification	21
3.2. Data Collection Procedures	27
3.3. Cognitive Social Structure	39
3.4. Missing Data	42
3.5. Measurement Error	46
3.6. Collecting Network Data	49
Chapter 4. Basic Methods for Analyzing Networks	55
4.1. Network Representation: Graphs and Matrices	55
4.2. Nodes: Centrality, Power, Prestige	62
4.3. Dyads: Walk, Path, Distance, Reachability	69
4.4. Subgroups: Transitivity and Cliques	72
4.5. Whole Networks: Size, Density, Centralization	76
4.6. Structural, Regular, and Automorphic Equivalence	81
Chapter 5. Advanced Methods for Analyzing Networks	91
5.1. Ego-Nets	91
5.2. Visualizations: Clustering, MDS, Blockmodels	97
5.3. Two-Mode and 3-Mode Networks	105
5.4. Community Detection	117
5.5. Exponential Random Graph Models (ERGMs)	120
5.6. Future Directions in Network Analysis	126

Appendix: Social Network Analysis Software Packages	129
