

Table of Contents

Foreword	xi
Editors Notes	xiii
1. The original publication	xiii
2. The new publication	xiv
3. The content	xv
Acknowledgements	xvii
Preface	xviii
 1. GENERAL IDEAS	 1
Summary of the Pre-elementary Period	3
Number rods	3
Sandpaper number cards	5
Material of Separated Units	9
Spindle boxes	9
Cards and counters	10
Elementary Arithmetic Instruction	11
Decimal System	11
Decimal System Demonstration Material	14
Composition of Large Numbers	17
Parallel Exercises	21
Passage from one ten to another	21
First Séguin Boards	22
Words for 11 to 20	23
Another exercise	24
Second Séguin Boards	26
Linear counting is a parallel exercise	28
Linear decomposition of a square (the 100 chain)	28
Linear decomposition of a cube (the 1000 chain)	29
Other parallel exercises on the decimal system	30
Snake game	30
Table of steps (addition strip board)	36
Calculation tables – written exercises	37
Addition charts	37
Associated addition charts	42
Summary	45

Arithmetic Operations with Large Numbers	46
Addition	47
Multiplication	50
Subtraction	52
Division	56
Division by a single-digit	56
Division by two digits – Bow Game	59
Parallel exercises for operations	62
Dot Game	62
Stamp Game	65
Problems and Arithmetic	71
Progress	73
Multiplication	73
Distinction between the terms: multiplicand and multiplier	75
Multiplication exercises – commutative & distributive laws	76
Parallel exercises – difficulties of multiplication	84
Memorization of combinations	84
Multiplication bead board	84
Multiplication control chart	87
Simplified multiplication tables	88
2. DECIMAL SYSTEM	93
Decimal System	95
Place Value in the Decimal System	95
The Composition of Large Numbers	106
Arithmetic Operations	110
Addition	110
Subtraction	112
Multiplication	114
Multiplication by more than one-digit multiplier	116
With bead frames	116
With horizontal bead frame	122
3. DIVISION	127
Division Analysed	129
Procedure	129

Division by more than one-digit divisor	131
An Analysis of Distribution of Units in Division	136
Operations with the Material	140
Division by a one-digit divisor	141
Division by more than one-digit divisor	144
Analysis of Similarities between Multiplication and Division	148
A Calculation for Division	152
4. EXERCISES WITH NUMBERS	155
Exercises with Numbers	157
Divisibility	157
Prime Numbers	157
Factors	161
Prime factors and greatest common divisor	167
Multiples	171
Least common multiple	174
Drawing exercise for least common multiple	181
Powers	182
5. GAMES FOR MULTIPLICATION	193
Games for Multiplication	195
Analysis and Studies of Relationships	195
Multiplication – bead bar layout	195
Multiplication – multiplication tables	198
Angular construction – commutative law	200
Partitioning a square	203
Games for Multiplication	207
Board Game	207
Bank Game	211
6. ALGEBRA	219
Algebra	221
A Return to the Past	221
Exercise with long rods	221
Multiplication – distributive law	226
Squares – from one square to another	227

Squares – constructing a polynomial	228
Prisms – brown stair	233
Cubes – pink tower	236
The Binomial Cube – Algebraic	241
The Trinomial Cube – Algebraic	244
7. SQUARE ROOT	249
Square Root	251
Extracting a Square Root	251
Square Roots of Two or More Digits	253
Preparatory exercises: analysis based in geometry	253
Subdividing a square	257
Study of the square-guide	260
Numerical relationships	268
Practical Procedure for Obtaining the Square Root	270
Arithmetic Calculation of a Two-Digit Square Root	274
Extraction of a Three-Digit Square Root	275
Extraction of a Four-Digit Square Root	281
Arithmetic Calculation of a Four-Digit Square Root	289
8. CUBE ROOT	293
Cube Root	295
The Calculation for the Extraction	298
The cube-guide	301
The binomial root	301
Written calculation	306
The Trinomial Root	309
Written calculation	321
Operations only with the numbers	325
The Material Teaches	327
9. MATERIALIZATION	329
Editorial Note	331
Powers as Geometric Solids	333
The Fourth Power of a Binomial	333
PART I: $(a^3 + 3a^2b) a$	336

PART II: $(b^3 + 3b^2a) a$	340
PART III: $(a^3 + 3a^2b) b$	341
PART IV: $(b^3 + 3b^2a) b$	342
The Fifth Power of a Binomial	344
10. DECIMAL METRIC SYSTEM	347
Decimal Metric System	349
Measurement of Lengths	356
Measurement of Surface Area	359
Measurement of Volume	362
A Child's Problem	363
Measurement of Capacity – Liquid	365
Measurement of Capacity – Dry	368
Measurement of Weight	369
Measurement of Temperature	372
Measurement of Weight (continued)	373
Scales for measuring weight	375
Measurement of Specific Weight – Density	377
Study of Measures and Problems	379
Problems	379
Alps	380
Western Alps	380
Italy	380
Carpathian	380
Pyrenees	380
Balkans	380
Measurements Non-Metric or Non-Decimal	381
Money	381
Time	385
11. RATIO AND PROPORTION	387
Ratio and Proportion	389
Rule of Three	393
Reduction to the Unit	395
