Acknowledgements	xii

- 1 Overview of the Book** 1  
Summarising the main themes running through the book
- 2 Controlled Experiments** 21  
Introducing the logic of control as exemplified in controlled experiments
- 3 More Naturalism in Experiments** 46  
Considering the merits and the problems of relaxing experimental control in order to make a controlled experiment more naturalistic
- 4 Sample Surveys and Statistical Representativeness** 71  
Introducing surveys, sampling and statistical representativeness as the basis for empirical generalisation
- 5 Natural Experiments** 100  
Introducing the ideas of natural experiments and statistical control
- 6 Controlling for Time in Natural Experiments** 126  
Considering the importance of establishing time sequences in natural experiments, the difficulties and the response of longitudinal research
- 7 Using Bureaucratic Data in Research** 139  
Considering the problems of using bureaucratic data in research
- 8 Questions and Answers** 150  
Comparing questioning for social surveys and questioning in qualitative interviews, and the data arising

**9 Analysing the Results of Qualitative Interviews 184**

Demonstrating three different ways of analysing qualitative interviews

**10 Observing Naturally Occurring Events 216**

Considering the strategies of naturalistic observation and their relation to different assumptions about what there is 'naturally' to be naturalistically observed

**11 Analysing Written Documents 244**

Explaining some techniques for analysing written documents

**12 Evaluative and Emancipatory Research 274**

Considering the role of values in research

**13 Research Ethics 298**

Considering different views on the proper moral conduct for researchers
