

CONTENTS

Preface	xiii
Chapter 1 Introduction to economic analysis in health care	1
1.1. Life, death and big business: why health economics is important	1
1.2. Health care as an economic good	3
1.3. Health and health care	7
1.4. Wants, demands and needs	8
1.5. The production of health and health care	9
1.6. Deciding who gets what in health care	10
1.7. Is the market for health care special?	12
1.8. Describing versus evaluating the use of health care resources	14
1.9. Judging the use of health care resources	17
Chapter 2 The demand for health care	21
2.1. Why study demand? Profits, policy and improving health	21
2.2. Consumer choice theory	22
2.2.1. Preferences and utility	22
2.2.2. Budget constraints and maximisation	25
2.3. Demand functions	27
2.3.1. The determinants of demand	28
2.3.2. Estimating demand functions	34
2.3.3. Price and income elasticity of demand	35
2.4. Modelling choices about health	37
2.4.1. Understanding consumption of health and health care	38
2.4.2. Understanding investment in health care	39
2.4.3. Predictions of the Grossman model	42
2.5. Needs, wants and demands	43
2.6. Asymmetry of information and imperfect agency	44
2.7. Aggregate demand for health care: theory and evidence	48

Chapter 3	The production and costs of health care	53
3.1.	Introduction	53
3.2.	The theory of production	54
3.2.1.	Production functions	54
3.2.2.	Marginal products	55
3.2.3.	Technical efficiency and isoquants	56
3.2.4.	Substitutability between inputs	58
3.2.5.	Production frontiers	60
3.3.	Multi-product firms	60
3.4.	Returns to scale, additivity and fixed factors	63
3.5.	Costs	67
3.5.1.	Costs and production	67
3.5.2.	Cost functions	71
3.5.3.	Scale economies, long- and short-run cost functions and scope economies	73
Chapter 4	The supply of health care	79
4.1.	Firms, markets and industries in the health care sector of the economy	79
4.2.	Structure, conduct and performance in the health care industry	81
4.3.	Profit maximisation models	84
4.3.1.	How firms maximise profits	85
4.3.2.	Perfect competition	86
4.3.3.	Monopoly	92
4.3.4.	Monopolistic competition	94
4.3.5.	Oligopoly	97
4.3.6.	Game theory	98
4.4.	Goals other than profit maximisation	101
4.4.1.	Growth maximisation	102
4.4.2.	Behavioural theories of the firm	104
4.4.3.	Utility maximisation	106
4.4.4.	Maximising net income per physician	108
4.5.	Competition, contestability and industrial policy	109
Chapter 5	Markets, market failure and the role of government in health care	114
5.1.	Introduction	114
5.2.	Using perfectly competitive markets to allocate resources	114
5.2.1.	Equilibrium in competitive markets	114
5.2.2.	The efficiency of competitive markets	115
5.3.	Market failure in health care	117

5.3.1. Externalities	117
5.3.2. Caring externalities	119
5.3.3. Market power	120
5.3.4. Public goods	121
5.3.5. Information imperfections	123
5.4. Government intervention in health care	124
5.4.1. Direct government involvement in the finance and provision of health care	126
5.4.2. Taxes and subsidies	127
5.4.3. Regulation	128
5.4.4. Provision of information	129
5.4.5. The theory of second best	130
5.5. Government failure	131

Chapter 6 Health insurance and health care financing 133

6.1. Uncertainty and health care financing	133
6.2. Risk and the demand for health insurance	135
6.2.1. Risk attitudes and the diminishing marginal utility of income	135
6.2.2. The demand for insurance and indifference	137
6.3. The market for health insurance and market failure	139
6.3.1. The supply of health insurance	139
6.3.2. Adverse selection	141
6.3.3. Moral hazard	145
6.3.4. Non-price competition	147
6.3.5. Incomplete coverage	147
6.4. Reimbursement	148
6.4.1. Retrospective reimbursement	149
6.4.2. Prospective reimbursement	149
6.5. Integration between third-party payers and health care providers	152
6.5.1. Preferred provider organisations	153
6.5.2. Health maintenance organisations	153
6.5.3. Point-of-service plans	154
6.6. Health care financing systems	154

Chapter 7 Equity in health care 163

7.1. Introduction	163
7.2. Equity in the finance of health care	165
7.2.1. Vertical equity	165
7.2.2. Kakwani's progressivity index	166
7.2.3. Horizontal equity	169

7.3. Equity in distribution	170
7.3.1. Equity in the distribution of health care, of health or of utility?	170
7.3.2. Some concepts of equity	171
7.3.3. Measuring equity in distribution	174
7.3.4. Horizontal inequity	174
7.3.5. Vertical equity	179
7.3.6. Inequalities in health	180
Chapter 8 Health care labour markets	184
8.1. Labour as a factor of health care production	184
8.2. Supply of health care labour	186
8.3. Demand for health care labour	189
8.4. Wages and employment in perfect labour markets	192
8.5. Economic rent and transfer earnings	193
8.6. Wage determination and employment in imperfect labour markets	194
8.6.1. Employers and workers with market power	194
8.6.2. Labour markets slow to respond to changes in demand and supply	197
8.6.3. Non-maximising behaviour	198
8.6.4. Discrimination	198
8.7. Health care labour market shortages	201
Chapter 9 Welfarist and non-welfarist foundations of economic evaluation	204
9.1. The normative economics foundations of economic evaluation	204
9.2. Welfare economics	205
9.3. The Pareto principle	206
9.4. Potential Pareto improvements	210
9.5. Social welfare functions	213
9.6. Measurability and comparability of utility	218
9.7. The application of welfare economics	219
9.8. Non-welfarism	223
9.9. Is there a link between welfarism and non-welfarism?	229
Chapter 10 Principles of economic evaluation in health care	232
10.1. What is economic evaluation?	232
10.2. The economics foundations of economic evaluation	233
10.2.1. Cost-benefit analysis	233
10.2.2. Cost-effectiveness analysis	236

10.3. Economic evaluation applied to health care programmes	238
10.4. Decision rules for cost–benefit analysis	241
10.5. Decision rules for cost-effectiveness and cost-utility analysis	242
10.5.1. Ratio measures	242
10.5.2. The cost-effectiveness plane	243
10.5.3. The cost-effectiveness threshold and acceptability	244
10.5.4. The incremental cost-effectiveness ratio	245
10.5.5. Net benefits	248
10.5.6. Probabilistic approaches	249
10.6. Equity in economic evaluation	250

Chapter 11 Measuring and valuing health care output 253

11.1. Introduction	253
11.2. Monetary valuations of health care benefits	253
11.2.1. Revealed preference	254
11.2.2. Stated preference	255
11.2.3. Discrete choice experiments	259
11.3. The measurement of health outcomes	261
11.4. Making health status indicators fit for purpose	262
11.4.1. Generic and specific measures	264
11.4.2. Profiles and indices	265
11.4.3. Measuring health-related quality of life: an indifference curve approach	269
11.5. The measurement of health gain	270
11.6. Non-monetary valuation of health states	273
11.6.1. Rating scales, category scales and visual analogue scales	274
11.6.2. The standard gamble	274
11.6.3. Time trade-off	276
11.6.4. How do we choose between these methods?	278
11.7. Multi-attribute utility measures	278
11.8. The valuation of health states: willingness to pay for health changes	280
11.9. The value of life	284

Chapter 12 Economic evaluation methods 286

12.1. Introduction	286
12.2. Selecting the viewpoint	286
12.3. Estimating costs	290
12.3.1. Methods and data used in estimating costs	292
12.3.2. Which costs should we include?	292
12.3.3. Should future costs and cost savings be included?	294
12.3.4. What if cost data are from different time periods?	294

12.4. The measurement of health gain	295
12.4.1. Measuring quality-adjusted life year (QALY) gains	295
12.4.2. Measuring healthy year equivalents (HYEs)	298
12.4.3. Measuring disability-adjusted life years (DALYs)	298
12.5. Discounting	299
12.5.1. The rationale for discounting monetary costs and benefits	299
12.5.2. The discounting formula	300
12.5.3. The choice of discount rate	301
12.5.4. Discounting health effects	303
12.6. Modelling-based economic evaluation	306
12.6.1. Using multiple sources of data	306
12.6.2. Decision analysis	308
12.6.3. Markov models	311
12.7. Trial-based economic evaluation	314
12.8. Dealing with uncertainty: sensitivity analysis	315
12.8.1. One-way sensitivity analysis	315
12.8.2. Multi-way sensitivity analysis	317
12.8.3. Statistically-based sensitivity analysis	318
 Chapter 13	
The use of economic evaluation in decision making	321
13.1. The decision-making context: why is economic evaluation used?	321
13.2. Who buys economic evaluations? Does it matter?	330
13.3. Is economic efficiency all that matters?	330
13.3.1. Need	331
13.3.2. Equity	333
13.3.3. Process-of-care considerations	334
13.3.4. Ethical imperatives	335
13.4. How is economic evaluation used to make decisions in practice?	336
13.5. Cost-effectiveness league tables	336
13.6. Programme budgeting and marginal analysis	339
13.6.1. Programme budgeting	339
13.6.2. Marginal analysis	341
13.7. Cost-effectiveness thresholds	341
13.8. Evaluating economic evaluation	346
