Origin of Publication xxv

Authorship xxvi

Acknowledgments xxvi

Chapter 1. Introduction 1

*Don E. Wilson, James D. Nichols,
Rasanayagam Rudran, and Colin Southwell*

Background 1

**Biodiversity at Regional and Landscape
Levels** 2

**Biodiversity at Ecosystem, Community, and
Population Levels** 3

**Concepts of Biodiversity at the Community
Level** 4

Previous Work 5

Purpose of This Volume 5

Intended Audience 6

Organization 6

**Chapter 2. Mammalian Diversity and
Natural History** 9

F. Russell Cole and Don E. Wilson

Introduction 9

Geographic Considerations 10

**Distributions and Zoogeographic Relationships
of Mammals** 13

Natural History of Mammals 15

Order Monotremata	15
Order Didelphimorphia	15
Order Paucituberculata	23
Order Microbiotheria	23
Order Dasyuromorphia	23
Order Peramelemorphia	24
Order Notoryctemorphia	24
Order Diprotodontia	25
Order Xenarthra	26
Order Insectivora	26
Order Scandentia	27
Order Dermoptera	27
Order Chiroptera	27
Order Primates	28
Order Carnivora	29
Order Cetacea	30
Order Sirenia	31
Order Proboscidea	31
Order Perissodactyla	31
Order Hyracoidea	32
Order Tubulidentata	32
Order Artiodactyla	32
Order Pholidota	33
Order Rodentia	33
Order Lagomorpha	36
Order Macroscelidea	37
Information Needs	37
Conservation Status	37

Chapter 3. Designing a Study to Assess Mammalian Diversity 41

Michael J. Conroy and James D. Nichols

Introduction	41
Statistical Concepts	42
Designing a Sample Survey	42
Target and Sampled Populations	42
Selection of Sampling Units	43
Determining Sample Size	43
Stratification	44
Interpreting Animal Count Statistics	45
Observability	45
Sampling Variability	45
Use of Count Statistics in Estimation	45

Use of Count Statistics in Comparative Studies	46
Standardization	48
Developing a Species List	48
Conclusions	49

Chapter 4. Keys to a Successful Project: Associated Data and Planning 51

Introduction	51
Climate and Environment, <i>Martha L. Crump</i>	52
Basic Weather Data	52
Additional Environmental Data	53
Measuring Weather Variables	54
Weather Conditions and Study Design	55
Data Standards, <i>Roy W. McDiarmid and Don E. Wilson</i>	56
Geographic Characterization	57
Habitat	57
Sampling Methodology	60
Microhabitat Description, <i>Robert F. Inger and Don E. Wilson</i>	60
Characteristics of a Microhabitat Checklist	61
Basic Descriptors for a Microhabitat Checklist	61
Field Methods	62
Voucher Specimens, <i>Robert P. Reynolds, Ronald I. Crombie, Roy W. McDiarmid, and Terry L. Yates</i>	63
Field Identification	63
Sample Size	64
Specimen Data	66
Selection of a Specimen Repository	66
Permits, <i>Roy W. McDiarmid, Robert P. Reynolds, and Ronald I. Crombie</i>	68

Chapter 5. Conducting a Survey to Assess Mammalian Diversity 71

<i>Rasanayagam Rudran and Mercedes S. Foster</i>	
Introduction	71
Objectives	72
Defining the Scope of a Survey	72
Species Lists	72
Selecting Target Species	72

Choosing Field Techniques	73
Appropriateness	73
Physical Characteristics and Behavior of Species	73
Size of the Survey Area	74
Habitat and Climate	74
Personnel and Time	74
Budget and Equipment	74
Integrating Theory and Practice	75
Use of Maps	75
Measuring the Size of a Sample Unit	75
Choosing a Random Sample	76
Choosing Random Points	77
Minimizing Error	77
Conclusions	79

Chapter 6. Observational Techniques for Nonvolant Mammals 81

Rasanayagam Rudran, Thomas H. Kunz, Colin Southwell, Peter Jarman, and Andrew P. Smith

Introduction	81
Density and Relative Abundance	82
Total Counts and Sample Counts	82
Drives and Silent Detection Methods	82
Drives	83
Drives for Total Counts	83
Drives for Sample Counts	84
Silent Detection for Total Counts	86
Individual Identification	86
Observation of Emergence from Dens and Burrows	87
Total Counts From Mobile Platforms	88
Silent Detection for Sample Counts	89
Line Transects	89
Strip Transects	93
Nonlinear Frequency-Density Plot	94
Road Counts	95
Quadrat Sampling	95
Special Techniques	97
Aerial Surveys	97
Marine Mammal Surveys	102
Call Playbacks	103
Night Surveys	103

Chapter 7. Observational Techniques for Bats 105

Thomas H. Kunz, Donald W. Thomas, Gregory C. Richards, Christopher R. Tidemann, Elizabeth D. Pierson, and Paul A. Racey

Introduction	105
Roosting Bats	106
Direct Roost Counts	106
Disturbance Counts at Roosts	107
Nightly Dispersal Counts	107
Roost Counts at Maternity Colonies	108
Nightly Emergence Counts	109
Counts of Foliage- and Cavity-Roosting Bats	110
Counts of Hibernating Bats	110
Flying Bats	111
Counts with Motion Detectors	111
Ultrasonic Bat Detection	111

Chapter 8. Capturing Mammals 115

Clyde Jones, William J. McShea, Michael J. Conroy, and Thomas H. Kunz

Introduction	115
Small Terrestrial Mammals	116
Capture Devices	116
Bait	118
Trap Arrays	120
Time Interval	122
Handling	122
Small Volant Mammals, <i>Thomas H. Kunz, Christopher R. Tidemann, and Gregory C. Richards</i>	122
Capturing Bats in Roosts	123
Capturing Flying Bats	125
Preparation for Field Study	143
Handling Bats	143
Holding Devices for Bats	144
Examining Bats and Keeping Records	145
Medium-Size Terrestrial Carnivores	146
Capture Devices	146
Bait	146
Trap Arrays	147
Time Interval	147

Fluid-Preserved Specimens	272
Skeletons as Vouchers	273

Appendix 4: Tissues, Cell Suspensions, and Chromosomes 275

Terry L. Yates

Introduction	275
Chromosomes and Cell Suspensions	275
Frozen Tissues	277

Appendix 5: Sex, Age, and Reproductive Condition of Mammals 279

Thomas H. Kunz, Christen Wemmer, and Virginia Hayssen

Introduction	279
Sex Determination	279
Genitalia	280
Body Size, Pelage, and Ornamentation	281
Scent Glands	282
Behavior	282
Age Estimation	282
Body Mass and Size	283
Tooth Characteristics	284
Cementum and Dentine Deposits	285
Periosteal Growth Lines	286
Epiphyseal Closure	286
Secondary Sexual Characteristics	286
Mass of the Lens in the Eye	286
Pelage or Color	287
Tail Collagen	287
Reproductive Condition	287
Males	287
Females	288
Hormone Assays	290

Appendix 6: Field Parasitology Techniques for Use with Mammals 291

Scott Lyell Gardner

Introduction	291
Procedures for Collecting Ectoparasites and Ectosymbionts	292
Procedures for Collecting Endoparasites and Endosymbionts	293

Recording Data	297
Materials	297
Equipment	297
Expendable Supplies and Reagents	298

Appendix 7: Methods for Marking Mammals 299

General Marking Techniques, Rasanayagam Rudran 299

Permanent Markers	299
Semipermanent Markers	301
Temporary Markers	303
Problems Related to Marking	303
Methods of Marking Bats, <i>Thomas H. Kunz</i>	304
Wing Bands	304
Thumb Bands	306
Ball-Chain Necklaces	306
Color Bands	308
Other Marking Methods	309
Conventions and Management of Banding Data	310
Precautions	310

Appendix 8: Recording Mammal Calls 311

William L. Gannon and Mercedes S. Foster

Introduction	311
Mammals as Noisemakers	311
A Need for Better Documentation	311
Equipment	312
Audio Tape Recorders	312
Microphones	315
Tape	316
Other Considerations	316
Field Gear Checklist	316
Recording Calls of Free-Ranging Mammals	316
Documenting Calls	316
Recording Techniques	317
Playback Techniques	318
Recording Calls from Captive Mammals	318
Handling Tapes	318
Call Analysis	325

Appendix 9: Vendors of Supplies and Equipment for Mammal Diversity Studies

Rasanayagam Rudran and F. Russell Cole

- General Field and Laboratory Supplies 327
- Maps 328
- Global Positioning Systems 329
- Capture Equipment 329
 - General 329
 - Nets 329
 - Dart Guns 330
- Light Aircraft 330
- Marking Supplies and Equipment 330
 - Split-Rings, Bands, Tags, and Ball-Chain Necklaces 330
 - Betalights 331
 - Cyalume 331
 - Punch-Marking and Tattooing Equipment 331
 - Fluorescent Powder and Hand-Held Ultraviolet Lights 332
 - Tapes 332
- Chemicals and Drugs 332
- Electronic Equipment 333
 - Radio Transmitters and Radiotelemetry Equipment 333
 - Ultrasonic Bat Detectors 334

Motion Detectors 335

Audio Equipment 335

Remote Cameras, Triggering Devices, and Film 337

Environmental Monitoring Equipment 337

Monitoring Equipment and Supplies 337

Data Loggers 338

Museum and Collecting Supplies 338

General Museum Supplies 338

Jars, Bottles, and Vials 340

Cryogenic Supplies 340

Specimen Storage Cases, Drums, and Tanks 341

Computer Equipment 341

Computer Hardware and Supplies 341

Computer Software 341

Appendix 10: Table of Random Numbers 343

Lee-Ann C. Hayek

Instructions for Use 343
