

Contents

Introduction: integrating theory and data to predict disease spread in host-parasite systems	8
Genetic diversity and disease spread: a study of a marine ectoparasite in temperate and cold waters	544
Parasite-induced mortality in housefinches: the study of an emerging avian disease	574
Host-parasite coevolution: does it really work? Debunking 10 persistent myths	10
Evolutionary trade-offs among helminths: implications for their life histories	598
List of Contributors	page x
Preface: Wildlife Disease Ecology	xix
KENNETH WILSON, ANDY FENTON & DAN TOMPKINS	xxiv
Glossary of Terms	xxiv
ANDY FENTON, DAN TOMPKINS AND KENNETH WILSON	
PART I UNDERSTANDING WITHIN-HOST PROCESSES 1	
1 Pollinator diseases: the <i>Bombus-Crithidia</i> system	3
Paul Schmid-Hempel, Lena Wilfert and Regula Schmid-Hempel	
2 Genetic diversity and disease spread: epidemiological models and empirical studies of a snail-trematode system	32
Amanda K. Gibson and Curtis M. Lively	
3 Wild rodents as a natural model to study within-host parasite interactions	58
Amy B. Pedersen and Andy Fenton	
4 From population to individual host scale and back again: testing theories of infection and defence in the Soay sheep of St Kilda	91
Adam D. Hayward, Romain Garnier, Dylan Z. Childs, Bryan T. Grenfell, Kathryn A. Watt, Jill G. Pilkington, Josephine M. Pemberton and Andrea L. Graham	
5 The causes and consequences of parasite interactions: African buffalo as a case study	129
Vanessa O. Ezenwa, Anna E. Jolles, Brianna R. Beechler, Sarah A. Budischak and Erin E. Gorsich	
6 Effects of host lifespan on the evolution of age-specific resistance: a case study of anther-smut disease on wild carnations	161
Emily Bruns	
7 Sexually transmitted infections in natural populations: what have we learnt from beetles and beyond?	187
Ben Ashby, Jordan E. Jones, Robert J. Knell and Gregory D.D. Hurst	

PART II UNDERSTANDING BETWEEN-HOST PROCESSES	223
8 Using insect baculoviruses to understand how population structure affects disease spread <i>Bret D. Elderd and Greg Dwyer</i>	225
9 Infection and invasion: study cases from aquatic communities <i>Melanie J. Hatcher, Jaimie T.A. Dick, Jamie Bojko, Grant D. Stentiford, Paul Stebbing and Alison M. Dunn</i>	262
10 Parasite-mediated selection in red grouse – consequences for population dynamics and mate choice <i>Jesús Martínez-Padilla, Marius Wenzel, François Mougeot, Lorenzo Pérez-Rodríguez, Stuart Piertonay and Stephen M. Redpath</i>	296
11 Emergence, transmission and evolution of an uncommon enemy: Tasmanian devil facial tumour disease <i>Menna E. Jones, Rodrigo Hamede, Andrew Storfer, Paul Hohenlohe, Elizabeth P. Murchison and Hamish McCallum</i>	321
12 Bovine tuberculosis in badgers: sociality, infection and demography in a social mammal <i>Jenni L. McDonald, Richard J. Delahay and Robbie A. McDonald</i>	342
13 <i>Mycoplasma ovipneumoniae</i> in bighorn sheep: from exploration to action <i>Kezia Manlove, Emily S. Almberg, Pauline L. Kamath, Raina K. Plowright, Thomas E. Besser and Peter J. Hudson</i>	368
14 Manipulating parasites in an Arctic herbivore: gastrointestinal nematodes and the population regulation of Svalbard reindeer <i>R. Justin Irvine, Steve D. Albon, Audun Stien, Odd Halvorsen and Anja M. Carlsson</i>	397
PART III UNDERSTANDING WILDLIFE DISEASE ECOLOGY AT THE COMMUNITY AND LANDSCAPE LEVEL	427
15 The ecological and evolutionary trajectory of oak powdery mildew in Europe <i>Marie-Laure Desprez-Loustau, Frédéric M. Hamelin and Benoit Marçais</i>	429
16 Healthy herds or predator spreaders? Insights from the plankton into how predators suppress and spread disease <i>Meghan A. Duffy, Carla E. Cáceres and Spencer R. Hall</i>	458
17 Multi-trophic interactions and migration behaviour determine the ecology and evolution of parasite infection in monarch butterflies <i>Jacobus C. de Roode, Sonia Altizer and Mark D. Hunter</i>	480

18 When chytrid fungus invades: integrating theory and data to understand disease-induced amphibian declines <i>Mark Q. Wilber, Pieter T.J. Johnson and Cheryl J. Briggs</i>	511
19 Ecology of a marine ectoparasite in farmed and wild salmon <i>Stephanie J. Peacock, Andrew W. Bateman, Brendan Connors, Sean Godwin, Mark A. Lewis and Martin Krkošek</i>	544
20 Mycoplasmal conjunctivitis in house finches: the study of an emerging disease <i>André A. Dhondt, Andrew P. Dobson and Wesley M. Hochachka</i>	574
21 Processes generating heterogeneities in infection and transmission in a parasite-rabbit system <i>Isabella M. Cattadori, Ashutosh Pathak and Brian Boag</i>	598
22 Sylvatic plague in Central Asia: a case study of abundance thresholds <i>Mike Begon, Stephen Davis, Anne Laudisoit, Herwig Leirs and Jonas Reijniers</i>	623
Index	644
