BRIEF CONTENTS

Preface			**xix**
Acknowledgments			**xxi**
About the Authors			**xxiii**
Digital Resources			**xxiv**
PART I	•	**YIPPEE! I'M IN STATISTICS**	**1**
Chapter 1	•	Statistics or Sadistics? It's Up to You	5
PART II	•	**WELCOME TO THE INTERESTING, USEFUL, FLEXIBLE, FUN, AND (VERY) DEEP WORLDS OF R AND RSTUDIO**	**17**
Chapter 2	•	Here's Why We Love R and How to Get Started	19
Chapter 3	•	Using RStudio: Much Easier Than You Think	44
PART III	•	**ΣIGMA FREUD AND DESCRIPTIVE STATISTICS**	**67**
Chapter 4	•	Computing and Understanding Averages: Means to an End	69
Chapter 5	•	Understanding Variability: Vive la Différence	92
Chapter 6	•	Creating Graphs: A Picture Really Is Worth a Thousand Words	109
Chapter 7	•	Computing Correlation Coefficients: Ice Cream and Crime	131
Chapter 8	•	An Introduction to Understanding Reliability and Validity: Just the Truth	160
PART IV	•	**TAKING CHANCES FOR FUN AND PROFIT**	**181**
Chapter 9	•	Hypotheticals and You: Testing Your Questions	183
Chapter 10	•	Probability and Why It Counts: Fun With a Bell-Shaped Curve	195

PART V • SIGNIFICANTLY DIFFERENT: USING INFERENTIAL STATISTICS 221

Chapter 11 • Significantly Significant: What It Means for You and Me 223

Chapter 12 • The One-Sample *z* Test: Only the Lonely 241

Chapter 13 • *t*(ea) for Two: Tests Between the Means of Different Groups 255

Chapter 14 • *t*(ea) for Two (Again): Tests Between the Means of Related Groups 274

Chapter 15 • Two Groups Too Many? Try Analysis of Variance 289

Chapter 16 • Two Too Many Factors: Factorial Analysis of Variance—A Brief Introduction 307

Chapter 17 • Testing Relationships Using the Correlation Coefficient: Cousins or Just Good Friends? 325

Chapter 18 • Using Linear Regression: Predicting the Future 337

PART VI • MORE STATISTICS! MORE TOOLS! MORE FUN! 359

Chapter 19 • Chi-Square and Some Other Nonparametric Tests: What to Do When You're Not Normal 361

Chapter 20 • Some Other (Important) Statistical Procedures You Should Know About 376

Appendix A: More Fun Stuff With R and RStudio 387

Appendix B: Tables 396

Appendix C: Data Sets 409

Appendix D: Answers to Practice Questions 451

Appendix E: Math: Just the Basics 483

Appendix F: The 10 (or More) Best (and Most Fun) Internet Sites for Statistics Stuff 487

Appendix G: The 10 Commandments of Data Collection 491

Appendix H: Glossary 493

Appendix I: The Reward 497

Index 499

DETAILED CONTENTS

Preface xix

Acknowledgments xxi

About the Authors xxiii

Digital Resources xxiv

PART I • YIPPEE! I'M IN STATISTICS 1

Chapter 1 • Statistics or Sadistics? It's Up to You 5

What You Will Learn in This Chapter 5

Why Statistics? 5

And Why R? 6

A 5-Minute History of Statistics 6

Statistics: What It Is (and Isn't) 8

What Are Descriptive Statistics? 8

What Are Inferential Statistics? 9

In Other Words . . . 9

What Am I Doing in a Statistics Class? 10

Ten Ways to Use This Book (and Learn Statistics at the Same Time!) 11

About Those Icons 13

What Else Does This Book Contain? 13

Key to Difficulty Icons 13

Glossary 14

Real-World Stats 14

Summary 14

Time to Practice 14

Student Study Site 15

PART II • WELCOME TO THE INTERESTING, USEFUL, FLEXIBLE, FUN, AND (VERY) DEEP WORLDS OF R AND RSTUDIO 17

Chapter 2 • Here's Why We Love R and How to Get Started 19

What You Will Learn in This Chapter 19

A Very Short History of R 19

The Pluses of Using R 20

The Minuses of Using R 21

Other Reasons to Use R? 21

A Short Note to You (and to Your Instructor) About Open Source (Again!) 22
Where to Find and Download R 22
The Opening R Screen 24
Packages and Functions in R 26
A Note About Formatting 28
Bunches of Data—Free! 28
Getting R Help 29
Getting Help on Help 29
Some Important Lingo 31
RStudio 34
Where to Find RStudio and How to Install It 34
Take RStudio for a Test Ride 36
Ordering From RStudio 37
File 37
Edit 37
Code 38
View 39
Plots 39
Session 40
Build 40
Debug 41
Profile 41
Tools 41
Help(!) 42
Summary 42
Time to Practice 43
Student Study Site 43

Chapter 3 • Using RStudio: Much Easier Than You Think 44
What You Will Learn in This Chapter 44
The Grand Tour and All About Those Four Panes 44
RStudio Pane Goodies 46
Showing Your Stuff—Working With Menus and Tabs and a Sample Data Analysis Using RStudio 50
The Basics: +, −, ?, *, and More: Using Operators 50
Working With Data 52
Creating a Data Set From One Vector 52
More Vectors 54
Let's See What's in the Workspace 54
Removing an Object From the Workspace 55
Returning an Object to the Workspace 55
Seeing the Contents of an Object 55
Reading in Established Data Sets 56
Using the Easiest R Command in the Galaxy 56
Oops! How Do You Correct Console Errors? 59
Pointing and Clicking to Open a Data Set 60

Computing Some Statistics 62
Computing Some Simple Descriptive Statistics 62
Computing a Correlation Coefficient (Your First Time!) 63
Creating a Plot 64
Ten Important Things to Remember About R and RStudio (but Not Necessarily in Order of Importance) 65
Summary 65
Time to Practice 66
Student Study Site 66

PART III • ΣIGMA FREUD AND DESCRIPTIVE STATISTICS 67

Chapter 4 • Computing and Understanding Averages: Means to an End 69
What You Will Learn in This Chapter 69
Computing the Mean 70
Computing a Weighted Mean 73
Computing the Median 74
Computing the Mode 79
Apple Pie à la Bimodal 79
When to Use What Measure of Central Tendency (and All You Need to Know About Scales of Measurement for Now) 80
A Rose by Any Other Name: The Nominal Level of Measurement 81
Any Order Is Fine With Me: The Ordinal Level of Measurement 81
1 + 1 = 2: The Interval Level of Measurement 81
Can Anyone Have Nothing of Anything? The Ratio Level of Measurement 81
In Sum . . . 82
Using the Computer to Compute Descriptive Statistics 83
Calculating the Mean 84
Finding the 50th Percentile: The Median 85
A Rose by Any Other Name: The Nominal Level of Measurement 85
Real-World Stats 87
Summary 87
Time to Practice 88
Student Study Site 91

Chapter 5 • Understanding Variability: Vive la Différence 92
What You Will Learn in This Chapter 92
Why Understanding Variability Is Important 92
Computing the Range 93
Computing the Standard Deviation 94
Step-by-Step 95
Why *n* – 1? What's Wrong With Just *n*? 97
What's the Big Deal? 98

Computing the Variance 99
The Standard Deviation Versus the Variance 99
Using R to Compute Measures of Variability 100
Real-World Stats 105
Summary 106
Time to Practice 106
Student Study Site 108

Chapter 6 • Creating Graphs: A Picture Really Is Worth a Thousand Words 109
What You Will Learn in This Chapter 109
Why Illustrate Data? 109
Ten Ways to a Great Graphic 110
First Things First: Creating a Frequency Distribution 111
The Classiest of Intervals 112
The Plot Thickens: Creating a Histogram 113
The Tallyho Method 114
The Next Step: A Frequency Polygon 116
Cumulating Frequencies 119
Other Cool Ways to Chart Data 121
Bar Charts 121
Column Charts 121
Line Charts 121
Using the Computer (R, That Is) to Illustrate Data 122
Creating a Histogram 123
Creating a Bar Chart 125
Creating a Line Graph 127
Real-World Stats 128
Summary 129
Time to Practice 129
Student Study Site 130

Chapter 7 • Computing Correlation Coefficients: Ice Cream and Crime 131
What You Will Learn in This Chapter 131
What Are Correlations All About? 131
Types of Correlation Coefficients: Flavor 1 and Flavor 2 132
Computing a Simple Correlation Coefficient 134
A Visual Picture of a Correlation: The Scatterplot 138
Bunches of Correlations: The Correlation Matrix 142
Understanding What the Correlation Coefficient Means 142
Using-Your-Thumb (or Eyeball) Method 142
A Determined Effort: Squaring the Correlation Coefficient 143
As More Ice Cream Is Eaten . . . the Crime Rate Goes Up (or Association vs. Causality) 145
Using RStudio to Compute the Correlation Coefficient 145

Computing the Correlation Coefficient by Entering Data 146
R Output 147
Computing the Correlation Coefficient by Importing a File 147
Creating a Scatterplot (or Scattergram or Whatever You Want to Call It) 148
Things Don't Have to Be Linear Part 2 149
Other Cool Correlations 149
Parting Ways: A Bit About Partial Correlation 151
Using R to Compute Partial Correlations 151
Computing the Correlation Between Three Variables 153
Understanding the R Output for Partial Correlation 154
Other Ways to Compute the Correlation Coefficient 154
Real-World Stats 154
Summary 155
Time to Practice 155
Student Study Site 159

Chapter 8 • An Introduction to Understanding Reliability and Validity: Just the Truth 160

What You Will Learn in This Chapter 160
An Introduction to Reliability and Validity 160
What's Up With This Measurement Stuff? 161
Reliability: Doing It Again Until You Get It Right 162
Test Scores: Truth or Dare? 162
Observed Score = True Score + Error Score 163
Different Types of Reliability 163
Test-Retest Reliability 163
Parallel Forms Reliability 165
Internal Consistency Reliability 166
Computing Cronbach's Alpha 167
Using R to Calculate Cronbach's Alpha 169
Understanding the R Output 171
Interrater Reliability 172
Computing Interrater Reliability 172
How Big Is Big? Finally: Interpreting Reliability Coefficients 173
And If You Can't Establish Reliability . . . Then What? 173
Just One More Thing 173
Validity: Whoa! What Is the Truth? 174
Different Types of Validity 174
And If You Can't Establish Validity . . . Then What? 177
A Last Friendly Word 177
Validity and Reliability: Really Close Cousins 178
Real-World Stats 178
Summary 179
Time to Practice 179
Student Study Site 180

PART IV • TAKING CHANCES FOR FUN AND PROFIT 181

Chapter 9 • Hypotheticals and You: Testing Your Questions 183

What You Will Learn in This Chapter 183
So You Want to Be a Scientist 183
Samples and Populations 184
The Null Hypothesis 185
The Purposes of the Null Hypothesis 185
The Research Hypothesis 187
The Nondirectional Research Hypothesis 187
The Directional Research Hypothesis 188
Some Differences Between the Null Hypothesis and the Research Hypothesis 190
What Makes a Good Hypothesis? 191
Real-World Stats 193
Summary 194
Time to Practice 194
Student Study Site 194

Chapter 10 • Probability and Why It Counts: Fun With a Bell-Shaped Curve 195

What You Will Learn in This Chapter 195
Why Probability? 195
The Normal Curve (a.k.a. the Bell-Shaped Curve) 196
Hey, That's Not Normal! 197
More Normal Curve 101 198
Our Favorite Standard Score: The *z* Score 202
What *z* Scores Represent 204
What *z* Scores Really Represent 207
Hypothesis Testing and *z* Scores: The First Step 209
Using R to Compute *z* Scores 209
Fat and Skinny Frequency Distributions 212
Average Value 212
Variability 212
Skewness 213
Kurtosis 215
Real-World Stats 216
Summary 217
Time to Practice 217
Student Study Site 219

PART V • SIGNIFICANTLY DIFFERENT: USING INFERENTIAL STATISTICS 221

Chapter 11 • Significantly Significant: What It Means for You and Me 223

What You Will Learn in This Chapter 223
The Concept of Significance 223
If Only We Were Perfect 224
The World's Most Important Table (for This Semester Only) 226
More About Table 11.1 226
Back to Type I Errors 228
Significance Versus Meaningfulness 230
An Introduction to Inferential Statistics 231
How Inference Works 232
How to Select What Test to Use 232
Here's How to Use the Chart 234
An Introduction to Tests of Significance 234
How a Test of Significance Works: The Plan 235
Here's the Picture That's Worth a Thousand Words 236
Be Even More Confident 237
Real-World Stats 239
Summary 239
Time to Practice 239
Student Study Site 240

Chapter 12 • The One-Sample *z* Test: Only the Lonely 241
What You Will Learn in This Chapter 241
Introduction to the One-Sample *z* Test 241
The Path to Wisdom and Knowledge 242
Computing the *z* Test Statistic 242
So How Do I Interpret $z = 2.40$, $p < .05$? 246
Using R to Perform a *z* Test 247
Special Effects: Are Those Differences for Real? 249
Understanding Effect Size 250
Real-World Stats 251
Summary 252
Time to Practice 252
Student Study Site 254

Chapter 13 • *t*(ea) for Two: Tests Between the Means of Different Groups 255
What You Will Learn in This Chapter 255
Introduction to the *t* Test for Independent Samples 255
The Path to Wisdom and Knowledge 256
Computing the *t* Test Statistic 258
Time for an Example 258
So How Do I Interpret $t_{(58)} = -0.14$, $p > .05$? 262
The Effect Size and *t*(ea) for Two 262
Computing and Understanding the Effect Size 263
Two Very Cool Effect Size Calculators 264
Using R to Perform a *t* Test 265

Real-World Stats 269
Summary 270
Time to Practice 270
Student Study Site 273

Chapter 14 • *t*(ea) for Two (Again): Tests Between the Means of Related Groups 274
What You Will Learn in This Chapter 274
Introduction to the *t* Test for Dependent Samples 274
The Path to Wisdom and Knowledge 275
Computing the *t* Test Statistic 277
So How Do I Interpret $t_{(24)} = 2.45, p < .05$? 280
Using R to Perform a *t* Test 280
The Effect Size for *t*(ea) for Two (Again) 283
Real-World Stats 285
Summary 286
Time to Practice 286
Student Study Site 288

Chapter 15 • Two Groups Too Many? Try Analysis of Variance 289
What You Will Learn in This Chapter 289
Introduction to Analysis of Variance 289
The Path to Wisdom and Knowledge 290
Different Flavors of ANOVA 290
Computing the *F* Test Statistic 292
So How Do I Interpret $F_{(2, 27)} = 8.80, p < .05$? 298
Using R to Compute the *F* Ratio 299
The Effect Size for One-Way ANOVA 302
But Where Is the Difference? 303
Real-World Stats 304
Summary 305
Time to Practice 305
Student Study Site 306

Chapter 16 • Two Too Many Factors: Factorial Analysis of Variance—A Brief Introduction 307
What You Will Learn in This Chapter 307
Introduction to Factorial Analysis of Variance 307
The Path to Wisdom and Knowledge 308
A New Flavor of ANOVA 310
All of Those Effects 310
The Place to Start: Interaction Effects 311

The Main Event: Main Effects in Factorial ANOVA 311
The Other Rows 312
Plotting the Means by Group 312
Even More Interesting Interaction Effects 313
Assumptions About Variances 315
Using R to Compute the *F* Ratio 315
Computing the Effect Size for Factorial ANOVA 322
Real-World Stats 323
Summary 324
Time to Practice 324
Student Study Site 324

Chapter 17 • Testing Relationships Using the Correlation Coefficient: Cousins or Just Good Friends? 325

What You Will Learn in This Chapter 325
Introduction to Testing the Correlation Coefficient 325
The Path to Wisdom and Knowledge 326
Computing the Test Statistic 326
So How Do I Interpret $r_{(28)} = .437, p < .05$? 331
Causes and Associations (Again!) 331
Significance Versus Meaningfulness (Again, Again!) 332
Using R to Compute a Correlation Coefficient (Again) 332
Real-World Stats 334
Summary 335
Time to Practice 335
Student Study Site 336

Chapter 18 • Using Linear Regression: Predicting the Future 337

What You Will Learn in This Chapter 337
Introduction to Linear Regression 337
What Is Prediction All About? 338
The Logic of Prediction 339
Drawing the World's Best Line (for Your Data) 342
How Good Is Your Prediction? 345
Using R to Compute the Regression Line 346
Understanding the R Output 349
The More Predictors the Better? Maybe 350
The Big Rule(s) When It Comes to Using Multiple Predictor Variables 354
Real-World Stats 354
Summary 355
Time to Practice 355
Student Study Site 358

PART VI • MORE STATISTICS! MORE TOOLS! MORE FUN! 359

Chapter 19 • Chi-Square and Some Other Nonparametric Tests: What to Do When You're Not Normal 361

What You Will Learn in This Chapter 361
Introduction to Nonparametric Statistics 361
Introduction to the Goodness-of-Fit (One-Sample) Chi-Square 362
Computing the Goodness-of-Fit Chi-Square Test Statistic 363
So How Do I Interpret $\chi^2_{(2)} = 20.6, p < .05$? 366
Introduction to the Test of Independence Chi-Square 366
Computing the Test of Independence Chi-Square Test Statistic 367
Using R to Perform Chi-Square Tests 369
Goodness of Fit and R 369
Test of Independence and R 370
Understanding the R Output 371
Other Nonparametric Tests You Should Know About 371
Real-World Stats 373
Summary 373
Time to Practice 374
Student Study Site 375

Chapter 20 • Some Other (Important) Statistical Procedures You Should Know About 376

What You Will Learn in This Chapter 376
Multivariate Analysis of Variance 377
MANOVA in R 377
Repeated-Measures Analysis of Variance 378
Repeated-Measures Analysis of Variance in R 378
Analysis of Covariance 379
ANCOVA in R 379
Multiple Regression 379
Multiple Regression in R 380
Multilevel Models 380
Multilevel Models in R 381
Meta-Analysis 381
Meta-Analysis in R 382
Logistic Regression 382
Logistic Regression in R 383
Factor Analysis 383
Factor Analysis in R 383
Path Analysis 384
Path Analysis in R 384
Structural Equation Modeling 385
Structural Equation Modeling in R 385

Summary 386
Student Study Site 386

Appendix A: More Fun Stuff With R and RStudio **387**

Appendix B: Tables **396**

Appendix C: Data Sets **409**

Appendix D: Answers to Practice Questions **451**

Appendix E: Math: Just the Basics **483**

Appendix F: The 10 (or More) Best (and Most Fun) Internet Sites for Statistics Stuff **487**

Appendix G: The 10 Commandments of Data Collection **491**

Appendix H: Glossary **493**

Appendix I: The Reward **497**

Index **499**
