CONTENTS

Preface 7

Part I Theory and method – CAIMeR as a framework of concepts

1 Why theory in social work? 11

Background and aim of the book – the need for theory 12
What is theory? 13
Theory and meta-theory 14
Different types of theory 16
Generalization and the range of theories 17
What is social-work theory about? 20
The link between theory and method 20
The difference between '*theory*' and to '*theorize*' 21
The contents and structure of the book 22

2 Explaining practice – Critical realist theory 27

What is a 'cause'? From evidence to explanative knowledge 28
Critical realist theory 29
A stratified world with different domains 31
Causality in terms of generative mechanisms 33
CAIMeR as a theory-based structure 40
Finally 40

3 CAIMeR as a conceptual framework and model 43

CAIMeR – from conceptual structure to theoretical model 43
Lastly 53

Part II Content and conditions of client work

4 Theory of actors and interventions 57

Actors 57
Interventions 60
Methodology and intervention pattern 61
Mechanisms in social work 63
Basic elements and patterns of mechanisms – what must be included? 66
Conclusion 71

5 Theory of professions in social work 73

Social work as a mission 74
The concept of professions – a few different views 74
From occupational professionalism to organizational professionalism 78
Implications for social work 81
Conclusion 83

6 Results theory 85

Some common ways to look at results 85
Results based on CAIMeR 87
Conclusion 94

7 Perspectives on quality 95

Different perspectives on quality 95
The issue of quality – from the manufacturing industry to social-work practice 98
Quality of service and quality of life 100

© THE AUTHORS AND STUDENTLITTERATUR

The importance of distinguishing quality of service from quality of life 103
The problem with regarding diverse quality of results as quality of life for clients 104
Quality from the stakeholders' perspectives 106
Judging quality of services with regard to the different stakeholders' interests 108
Conclusion 110

8 Programme theory in social work 113

Programme theory – definitions, areas of use and examples 113
Reconstructing programme theory – a general introduction 120
Conclusion 126

9 Domain theory for social work 129

Background 129
Politics, administration and professional practice – like threads in a web 130
Towards a domain theory of social-work organizations 131
Neo-liberal governance 141
Conclusion 143

Part III Explaining social-work practice

10 Analysis of generative mechanisms 149

How can mechanisms be identified, described and conceptualized? 149
Response mechanisms – from A to Z 158
Lastly 160

11 CAIMeR in practice I: Opening the black box 163

Intervention documentation – a link between concept and empirical data 163
The CAIMeR configuration 166
CAIMeR in practice – how do the parts fit together? 171
Conclusion 175

12 CAIMeR in practice II: Reconstructing programme theory 177

Reconstruction of programme theory as a response to the knowledge needs of social workers 177
Design and implementation of the project 178
Analysis of the empirical material 180
The results – the organization's programme theory in brief 184
Interventions 187
Mechanisms 189
Results 190
A CAIMeR configuration of the organization's programme theory 191
Theory for social-work practice 191
