

Part I Introduction and Basic Concepts

1	Crystals	3
1.1	Crystal Morphology	4
1.2	Crystal Structures	9
1.3	Crystal Chemistry	12
1.4	Physical Properties of Crystals	16
1.5	Optical Crystallography	20
	References and Suggestions for Further Reading.....	29
2	Minerals	31
2.1	Definition of the Term Mineral.....	32
2.2	Identification and Classification of Minerals.....	34
2.3	Mode of Occurrence.....	35
2.4	Rock-Forming and Economic Minerals	37
2.5	Biominaleralisation and Medical Mineralogy	42
	References and Suggestions for Further Reading.....	52
3	Rocks	55
3.1	Mineralogical Composition of Rocks	56
3.2	Relationships Between Lithogeochemistry and Mineralogy	56
3.3	Rock Fabric	57
3.4	Field Relationships	59
3.5	Principal Rock-Forming Processes	60
3.6	Mineral Deposits	64
	References and Suggestions for Further Reading.....	67

Part II Systematic Mineralogy

4	Elements	71
4.1	Metals	72
4.2	Metalloids (Semi-metals)	78
4.3	Non-metals	78
	References and Suggestions for Further Reading.....	85
5	Sulfides, Arsenides and Complex Sulfides (Sulfosalts)	87
5.1	Metal Sulfides with M:S > 1:1 (Generally 2:1)	88
5.2	Metal Sulfides and Arsenides with M:S = 1:1	90
5.3	Metal Sulfides, Sulfarsenides and Arsenides with M:S = 1:2.....	96
5.4	Arsenic Sulfides	102
5.5	Complex Metal Sulfides (Sulfosalts).....	102
	References	104
6	Halides	105
	References	109
7	Oxides and Hydroxides	111
7.1	M ₂ O Compounds.....	112
7.2	M ₃ O ₄ Compounds.....	112
7.3	M ₂ O ₃ Compounds.....	116

7.4	MO ₂ Compounds	120
7.5	Hydroxides	124
	References	126
8	Carbonates, Nitrates and Borates	127
8.1	Calcite Group, $\bar{3}2/m$	128
8.2	Aragonite Group, 2/m2/m2/m	132
8.3	Dolomite Group	135
8.4	Azurite-Malachite Group	136
8.5	Nitrates	137
8.6	Borates	138
	References and Suggestions for Further Reading	140
9	Sulfates, Chromates, Molybdates, Wolframates	141
9.1	Sulfates	142
9.2	Chromates	147
9.3	Molybdates and Wolframates	147
	Suggestions for Further Reading	149
10	Phosphates, Arsenates, Vanadates	151
	Suggestions for Further Reading	155
11	Silicates	157
11.1	Orthosilicates (Nesosilicates)	160
11.2	Disilicates (Sorosilicates)	169
11.3	Ring Silicates (Cyclosilicates)	172
11.4	Chain Silicates (Inosilicates)	177
11.5	Sheet Silicates (Phyllosilicates)	189
11.6	Framework Silicates (Tectosilicates)	201
	References and Suggestions for Further Reading	237
12	Fluid Inclusions in Minerals	241
	References	246

Part III Petrology and Metallogenesis

13	Igneous Rocks	249
13.1	Classification of Igneous Rocks	250
13.2	Petrography of Igneous Rocks	257
	References and Suggestions for Further Reading	273
14	Volcanism	275
14.1	Effusive Volcanism: Lava Flows	277
14.2	Extrusive Volcanism	280
14.3	Explosive Volcanism	281
14.4	Mixed Volcanic Activity: Stratovolcanoes	286
14.5	Volcanic Exhalations	286
	References and Suggestions for Further Reading	289
15	Plutonism	291
15.1	Volcanic Roots and Magma Chambers	292
15.2	Shapes of Plutonic and Subvolcanic Intrusive Bodies	293
15.3	Internal Structure and Emplacement of Intrusive Bodies	294
	References and Suggestions for Further Reading	297

16	Magma and Lava	299
16.1	Chemical Composition and Structure of Magma	300
16.2	Volcanic Gases	300
16.3	Temperatures of Magmas	301
16.4	Viscosity of Magmas and Lavas	303
16.5	Solubility of Volatiles in Magma	304
	References and Suggestions for Further Reading	305
17	Formation and Evolution of Magmas	307
17.1	Magma Series	308
17.2	Primary and Parental Melts	308
17.3	Magma Mixing	310
17.4	Magmatic Differentiation	311
17.5	Assimilation	314
	References and Suggestions for Further Reading	314
18	Experiments on Magmatic Model Systems	317
18.1	The Gibbs' Phase Rule	318
18.2	Experiments in Binary and Ternary Systems	319
18.3	Bowen's Reaction Series	334
18.4	The Basalt Tetrahedron of Yoder and Tilley (1962)	337
18.5	Equilibrium Melting and Fractionated Melting	338
	References and Suggestions for Further Reading	339
19	The Origin of Basalt	341
19.1	Basalt Types and Plate Tectonics	342
19.2	Formation of Basaltic Melts by Partial Melting of Peridotite in Earth's Upper Mantle	343
	References and Suggestions for Further Reading	346
20	The Origin of Granite	347
20.1	Petrogenetic Classification of Granitoids Based on Their Chemical Composition	348
20.2	Experiments on the Petrogenesis of Granite	349
	References and Suggestions for Further Reading	357
21	Orthomagmatic Mineral Deposits	359
21.1	Introduction	360
21.2	Mineralisation Due to Fractional Crystallisation	360
21.3	Mineralisation Due to Liquid Immiscibility	364
21.4	Carbonatite- and Alkaline-Magmatic Rock-Hosted Deposits	367
	References and Suggestions for Further Reading	368
22	Pegmatites	371
22.1	Theoretical Considerations	372
22.2	Field Relations, Petrography and Petrogenesis of Pegmatites	373
22.3	Pegmatites as Sources of Economic Minerals	375
22.4	Geochemical Classification of Granitic Pegmatites	376
	References and Suggestions for Further Reading	377
23	Hydrothermal Mineral Deposits	379
23.1	Basic Principles	380
23.2	Hydrothermal Impregnation Deposits	382
23.3	Hydrothermal Replacement Deposits	386
23.4	Hydrothermal Vein-Type Deposits	388
23.5	Volcanogenic-Sedimentary Ore Deposits	395
23.6	Non-magmatic Stratabound Hydrothermal Deposits	400
23.7	Unconformity-Related Uranium Deposits	401
	References and Suggestions for Further Reading	402

24	Weathering and Mineral Formation in Soils	405
24.1	Mechanical Weathering	406
24.2	Chemical Weathering	406
24.3	Subaerial Weathering and Climate Zones	409
24.4	On the Definition of the Term Soil	409
24.5	Weathering of Silicate Rocks and Related Deposits	410
24.6	Weathering of Sulfidic Ore Bodies	412
	References and Suggestions for Further Reading	415
25	Sediments and Sedimentary Rocks	417
25.1	Basic Principles	419
25.2	Clastic Sediments and Sedimentary Rocks	420
25.3	Chemical and Biochemical Sediments and Sedimentary Rocks	435
25.4	Iron- and Manganese-rich Sediments and Sedimentary Rocks	441
25.5	Siliceous Sediments and Sedimentary Rocks	445
25.6	Sedimentary Phosphate Rocks	446
25.7	Evaporites	447
	References and Suggestions for Further Reading	451
26	Metamorphic Rocks	453
26.1	Basic Principles	454
26.2	Metamorphism as a Geological Process	459
26.3	Nomenclature of Regional and Contact Metamorphic Rocks	473
26.4	Structure and Texture of Metamorphic Rocks	479
26.5	Formation of Migmatites by Anatexis	487
26.6	Metasomatism	491
	References and Suggestions for Further Reading	495
27	Phase Relations and Mineral Reactions in Metamorphic Rocks	499
27.1	Mineral Equilibria in Metamorphic Rocks	500
27.2	Metamorphic Mineral Reactions	504
27.3	Geothermometry and Geobarometry	517
27.4	Pressure-Temperature Evolution of Metamorphic Complexes	520
27.5	Graphical Presentation of Metamorphic Mineral Assemblages	522
	References (see also Chapters 26 and 28)	527
28	Metamorphic Facies and Facies Series	529
28.1	Principles of Metamorphic Facies	530
28.2	Metamorphic Facies Series	531
28.3	Mineralogical Characteristics of Individual Metamorphic Facies	532
	References (see also Chapters 26 and 27)	545

Part IV Our Planetary System

29	Earth's Interior	549
29.1	Seismic Evidence of Earth's Overall Structure	550
29.2	The Crust	553
29.3	The Mantle	557
29.4	The Core	568
	References and Suggestions for Further Reading	569
30	Lunar Rocks and the Moon's Interior	573
30.1	The Lunar Crust	574
30.2	Moon's Internal Layering	578
30.3	Geological History of the Moon	580
	References and Suggestions for Further Reading	582

31	Meteorites	583
31.1	Fall Phenomena	584
31.2	Frequency of Falls and Finds	587
31.3	Classification of Meteorites Derived from the Asteroid Belt	588
31.4	Planetary Meteorites	599
31.5	Tektites	601
	References and Suggestions for Further Reading	601
32	The Planets, Their Satellites and Smaller Planetary Bodies	605
32.1	The Terrestrial Planets	608
32.2	Asteroids	618
32.3	The Giant Planets and Their Satellites	621
32.4	The Trans-Neptune Objects (TNO) in the Kuiper Belt	630
32.5	The Dwarf Planet Pluto and Its Moon Charon: A Double Planet	630
	References and Suggestions for Further Reading	631
33	Introduction to Geochemistry	635
33.1	Geochemical Classification of the Elements	636
33.2	Chemical Composition of the Bulk Earth	638
33.3	Chemical Composition of the Earth's Crust	640
33.4	Trace-Element Partitioning and Magmatic Processes	642
33.5	Isotope Geochemistry	650
33.6	The Formation of the Chemical Elements	663
	References and Suggestions for Further Reading	664
34	The Genesis of Our Solar System	667
34.1	Earlier Theories	668
34.2	Formation of Stars	669
34.3	Composition of the Solar Nebula	670
34.4	Formation of Planets	672
	References and Suggestions for Further Reading	675
	Supplementary Information	677
	Appendix	678
	A.1 Important Ionic Radii and the Coordination of Cations With O^{2-}	678
	A.2 Calculation of Mineral Formulae	678
	Copyright permissions	681
	Geographical Index	683
	Subject Index	691
