

Contents

SECTION 1: SURGICAL ANATOMY

1. Surgical Anatomy of the Transoral Approach

Kerry A Vaughan, Bradley C Lega, Jason G Newman, William C Welch, John YK Lee

- Anatomic Considerations During Surgical Planning 3
- Pharyngeal and Retropharyngeal Surgical Anatomy of the Transoral Approach 4
- Spinal Anatomy at the Craniovertebral Junction 6
- Intradural Anatomy Visible Via Transoral Approach 7
- Novel Developments 8

2. Transmaxillary Approach to the Clivus and Upper Cervical Spine

Douglas G Orndorff, Jim A Youssef, Michael A Finn, Catherine A Patty, ST DeBauche, MA Scott

- Surgical Indications 12
- Surgical Technique Step-by-Step 13
- Potential Complications 16

3. High Retropharyngeal Approach to the Upper Cervical Spine

Vincent C Traynelis, Ricardo BV Fontes, Andrew J Grossbach

- Indications 17
- Description 18
- Postoperative Care 20
- Potential Complications 20

4. Far Lateral Approach to the Craniocervical Junction

Biagia La Pira, Thomas Sorenson, Pietro d'Urso, Giuseppe Lanzino

- General Considerations 22
- Surgical Steps 23
 - Preoperative Considerations 23
 - Positioning 23
 - Incision 24
 - Muscle Dissection 24
 - Extradural Stage 25
 - Dural Opening and Intradural Exposure 26
 - Closure 28
- Complications 28

5. Posterior Approach to the Craniocervical Junction and Posterior Spine

Chase C Woodward, Harvey E Smith

- Anatomic Considerations 31
 - Patient Positioning and Preparation 32
- Posterior Approach to the Upper Cervical Spine 34
- Posterior Approach to the Subaxial Cervical Spine 35

6. Anterior Approach to the Midcervical Spine*Daniel D Bohl, Jonathan N Grauer*

- Surgical Indications 39
- Surgical Technique Step-by-Step 39
- Potential Complications 42

7. Anterior Approach to the Cervicothoracic Junction*Eve Gail Hoffman, Brian Shiu, Tristan B Weir, Steven C Ludwig*

- Low Cervical-Supraclavicular Approach 44
 - Background 44
 - Positioning 46
 - Approach 46
 - Closure 46
- Transclavicular- Transmanubrial Approach 46
 - Background 46
 - Positioning 49
 - Approach 49
 - Closure 50
- Transsternal- Transthoracic Approach 50
 - Background 50
 - Positioning 50
 - Approach 50
 - Closure 52
- Complications 52

8. Anterior Transthoracic Approach to the Cervicothoracic Junction*Samuel K Cho, Sheeraz A Qureshi, Andrew C Hecht*

- Anatomy 54
- Surgical Indications 56
- Surgical Technique Step-by-Step 56
- Thoracic Discectomy 57
- Thoracic Vertebrectomy 58
- Potential Complications 58

9. Posterolateral Approach to the Cervicothoracic Junction and Thoracic Spine*Manish K Kasliwal, John E O'Toole, Vincent C Traynelis*

- Surgical Indications 60
- Surgical Technique Step-by-Step 61
 - Transpedicular Approach 61
 - Costotransversectomy 62
 - Lateral Extracavitary Approach 63
 - Parascapular Extrapleural Approach 64
- Complications 65

10. Thoracoabdominal Approach to the Spine *Michael J Vives, John D Koerner*

- Anatomy 67
 - Diaphragm 67
 - Nerves 68
- Indications 68
- Contraindications 68

- Procedure 68
 - Positioning 68
 - Thoracic Approach 69
 - Diaphragm 70
 - Closure 72
 - Postoperative Care 72
- Intraoperative Complications 72
- Postoperative Complications 72

11. Anterior Retroperitoneal Approach to the Lumbosacral Spine

74

Milan Bajmoczy, William P Robinson

- Approach to Lumbosacral Spine 74
 - Preoperative Assessment 74
 - Relevant Surgical Anatomy 75
- Technique of Anterior Retroperitoneal Approach to the Lumbosacral Spine 75
 - Incision and Entry into the Retroperitoneal Space 75
 - Exposure of Specific Spinal Levels 77
- Special Circumstances 79
 - Reoperative Cases 79
 - Calcified Arteries 79
- Results and Potential Complications 79

12. Posterior Midline and Posterolateral (Wiltse) Surgical Approach to the Lumbar Spine

82

Christian P DiPaola, Jacob Furey

- Posterior Midline Approach to the Lumbar Spine 82
 - Anatomy 82
 - Indications 82
 - Surgical Technique 82
 - Potential Complications 83
- Posterolateral (Wiltse) Approach to the Lumbar Spine 83
 - Anatomy 83
 - Indications 84
 - Surgical Technique 84
 - Potential Complications 85

SECTION 2: CERVICAL SPINE TECHNIQUES

13. Anterior Cervical Discectomy and Fusion

89

Brian Blackburn, Swastik Sinha, Lee H Riley III

- Indications 89
- Surgical Technique Step-by-Step 89
- Postoperative Rehab and Restrictions 91
- Potential Complications 91

14. Cervical Disk Arthroplasty

93

Bruce V Darden II, Thomas Kesman

- Surgical Indications 93
- Surgical Technique Step-by-Step 94
- Potential Complications 96
- Outcomes 97

15. Anterior Cervical Corpectomy

99

Kelley Banagan, Howard An

- Surgical Anatomy 99
- Indications 100
- Technique: Anterior Cervical Corpectomy and Fusion 100
- Case Example 101
- Potential Complications 103

16. Transoral Odontoid Excision

104

David M Neils, Yazhini Gnanasambanthan, Daniel R Fassett

- Anatomy 104
- Indications 104
- Treatment Alternatives 104
- Preoperative Planning 104
- Operative Techniques 106
 - Set-Up 106
 - Placement of Oropharyngeal Retractors 107
 - Opening 108
 - Odontoidectomy 109
 - Closure 109
- Posterior Stabilization and Arthrodesis 109
- Postoperative Considerations 109
- Special Considerations/Complication Avoidance 110
- Future Directions 110
 - Image Guidance 110
 - Minimal Access Surgery: Endoscopic Surgery and Robot-assisted Surgery 110

17. Odontoid Screw Fixation

113

Adrian T Harvey, Yazhini Gnanasambanthan, Daniel R Fassett

- Surgical Indications 114
 - Indications 114
 - Contraindications 114
- Surgical Technique Step-by-Step 115
- Postoperative Management 119
- Potential Complications 119

18. Occipitocervical Fusion

121

Justin W Miller, Rick C Sasso

- Anatomy 122
- Surgical Indications 124
- Surgical Technique Step-by-Step 124
 - C1 Lateral Mass Fixation 125
 - C2 Pedicle Fixation 125
 - C2 Translaminar Fixation 126
 - Occipital Fixation 126
 - Occipital Condyle Fixation 127
 - Fusion Preparation 127
- Potential Complications 127

19. Posterior Atlantoaxial Arthrodesis Techniques*William Ryan Spiker, Alpesh A Patel*

- Anatomy and Biomechanics 129
- Surgical Indications 129
- Surgical Technique Step-by-Step 130
 - Autograft Harvest 131
 - Wiring 131
 - Transarticular Screws 131
 - C1–2 Segmental Fixation 132
- Postoperative Care 133
- Potential Complications 134

20. Posterior Cervical Foraminotomy*Meghan E Murphy, Michelle J Clarke, Mark A Pichelmann, William E Krauss*

- Surgical Indications 136
- Surgical Approach 136
 - Anesthesia Considerations and Patient Positioning 136
 - Exposure and Localization 137
 - Foraminotomy 137
 - Root Decompression 138
 - Closure 139
- Postoperative Care 139
- Potential Complications 139
- Anterior versus Posterior 140
- Minimally Invasive versus Open 140

21. Minimally Invasive Posterior Cervical Foraminotomy *Victor G Williams, Michael J Dorsi, Langston T Holly*

- Introduction 142
 - Anatomy 142
- Surgical Indications 142
- Surgical Technique Step-by-Step 143
- Potential Complications 146

22. Posterior Cervical Laminectomy*Robert F Heary, Antonios Mammis, John C Quinn*

- Anatomy 148
 - Indications and Surgical Considerations 149
 - Location of Compressive Pathology 149
 - Sagittal Alignment 150
- Indications 151
- Surgical Technique Step-by-Step 151
- Complications 153

23. Posterior Cervical Fusion and Lateral Mass Screw Fixation*Chris Cornett, Gregory Grabowski, James Kang*

- Introduction 155
 - Anatomy 155
 - Biomechanics 156

129

136

142

148

155

- Surgical Indications 156
 - Surgical Technique Step-by-Step 157
 - Imaging 157
 - Anesthesia and Monitoring 158
 - Positioning 158
 - Draping or Prepping 158
 - Surgical Approach or Exposure 158
 - Instrumentation 159
 - Preparation of Facet Joints 162
 - Bone Grafting 162
 - Closure 162
 - Postoperative Care and Rehabilitation 162
 - Potential Complications 163
- 24. Minimally Invasive Cervical Lateral Mass Instrumented Fusion 164**
Brian Hood, Faiz Ahmad, Allan D Levi
- Indications 164
 - Advantages 164
 - Surgical Technique Step-by-Step 165
 - Potential Complications and Challenges 166
- 25. Cervical Pedicle Fixation 170**
Brian W Su, Robert H Byers, Abumi Kuniyoshi
- Introduction 170
 - Anatomy 170
 - Indications 171
 - Surgical Technique 171
 - Preoperative Planning 171
 - Positioning and Exposure 173
 - Identifying the Pedicle Starting Point 175
 - Creating the Pedicle Path and Placing the Screw 175
 - Complications 177
- 26. Laminoplasty 179**
John M Rhee
- Introduction 179
 - Anatomy and Biomechanics 179
 - Indications for Procedure 179
 - Procedure 179
 - Potential Complications 186
 - Axial Neck Pain 186
 - Loss of Lordosis 186
 - Wound Complications 186
 - Neurologic Injury 186
- 27. Posterior Cervicothoracic Osteotomy 188**
Justin K Scheer, Vedat Deviren, Sang-Hun Lee, Christopher P Ames
- Introduction 188
 - Anatomy and Biomechanics 188
 - Surgical Indications 188
 - Smith-Petersen Osteotomy 191
 - Cervicothoracic Junction PSO 191

- Surgical Technique Step-by-Step 192
- SPO with Controlled Anterior Osteoclasts 192
- Cervicothoracic Junction PSO 193
- Potential Complications 195

SECTION 3: THORACIC SPINE TECHNIQUES

28. Posterior Thoracic Discectomy Techniques

Ameet Chitale, George Ghobrial, Srinivas Prasad

- Introduction 201
- Anatomy 201
- Surgical Indications 202
 - Indications for Posterior Thoracic Discectomy 202
 - Localization of Correct Thoracic Level 204
- Surgical Technique Step-by-Step 204
 - Transpedicular Approach 204
 - Costotransversectomy 205
 - Lateral Extracavitary Approach 206
- Complications 207

29. Anterolateral Open Thoracotomy Approach for Thoracic Discectomy

Patricia Zadnik, Daniel Sciubba

- Introduction 209
- Surgical Indications 209
- Surgical Technique Step-by-Step 210
- Potential Complications 213

30. Anterior Thoracic Corpectomy and Fusion

Jason W Savage, Thomas A Zdeblick

- Indications 215
- Preoperative Planning 215
- Surgical Technique Step-by-Step 217
 - Patient Positioning 217
 - Surgical Approach 217
 - Corpectomy and Fusion 218
- Complications 221

31. Anterior Release and Fusion for Thoracic Scoliosis

Jonathan Mason, Vincent Arlet

- Introduction 223
 - Anatomy 223
- Indications 223
- Surgical Technique Step-by-Step 224
- Potential Complications 227

32. Thoracic Extreme Lateral Interbody Fusion

Jordan M Komisarow, Vijay Agarwal, Robert E Isaacs

- Introduction 229
- Indications for Approach/Procedure 230
- Surgical Technique Step-by-Step 231
 - Set-Up 231

201

209

215

223

229

- Approach to the Thoracic Spine 231
- Approach to the Thoracolumbar Spine 232
- Closure 233
- Potential Complications 234

33. Posterior-only Correction of Adult Thoracolumbar Scoliosis

Manish K Kasliwal, Lee A Tan, Justin S Smith, Christopher I Shaffrey

- Introduction 236
- Indications 237
- Preoperative Planning 238
- Surgical Technique and Steps 240
 - Coronal Plane Deformity Techniques 241
 - Sagittal Plane Deformity Techniques 242
 - Case Example 244
- Complications 244

34. Percutaneous Pedicle Screws and Rods for Deformity Reduction

Neel Anand, Jason Cohen, Ryan B Cohen, Eli M Baron

- Introduction 249
- Indications 249
- Techniques Step-by-Step 250
 - Additional Considerations 256

35. Smith-Petersen and Pedicle Subtraction Osteotomies

Ahmad Nassr, Quanqi Cui, Michael J Yaszemski

- Introduction 258
- Anatomy and Biomechanics 258
- Surgical Indications 260
- Surgical Technique Step-by-Step 260
 - Intraoperative Setup 260
 - Smith-Petersen Osteotomy and Polysegmental (Zielke/Ponte) Osteotomies 260
 - Pedicle Subtraction Osteotomy 262
- Potential Complications 264

36. Posterior Thoracic Vertebral Column Resection

Marco Ferrone, Hai Le, Christopher M Bono

- Introduction 266
- Anatomy 266
- Surgical Indications 267
- Surgical Technique Step-by-Step 267
- Potential Complications 270

SECTION 4: LUMBOSACRAL SPINE TECHNIQUES

37. Lumbar Microdiscectomy

Jason C Eck

- Introduction 275
 - Anatomy 275
- Surgical Indications 276
- Surgical Technique Step-by-Step 277
- Potential Complications 280

38. Tubular Microdiscectomy*Ibrahim Hussain, Roger Härtl, Ali A Baaj*

- Introduction 281
- Indications 282
- Surgical Technique Step-by-Step 282
- Potential Complications 285

39. Far Lateral Disk Herniations*Scott D Hodges*

- Introduction 289
- Indications 290
- Surgical Technique Step-by-Step 291
 - L2-L5 291
 - L5-S1 294
- Potential Complications 296

40. Posterior Lumbar Decompression *Robert Eastlack, Payam Moazzaz*

- Introduction 298
- Surgical Technique Step-by-Step 298
 - Exposure 298
 - Decompression 299
- Pitfalls 302

41. Minimally Invasive Posterior Lumbar Decompression*Justine Pearl, Zame Tymchak, Daryl R Fourney*

- Introduction 304
- Surgical Indications 305
- Surgical Technique Step-by-Step 306
- Potential Complications 308

42. Posterior Lumbar *in situ* Fusion*Scott D Daffner*

- Introduction 310
 - Anatomy 310
- Indications 311
- Surgical Technique Step-by-Step 311
- Complications 313

43. Posterior Lumbar Facet Fusion*Joseph K Lee, Brian W Su*

- Introduction 315
- Anatomy 315
- Indications 317
- Surgical Technique Step-by-Step 317
- Complications 321

44. Anterior Lumbar Interbody Fusion with Fixation*Raj J Gala, Benjamin Geddes, Peter G Whang*

- Introduction 322
 - Anatomy 322
- Surgical Indications 324

281

289

298

304

310

315

322

- Surgical Technique Step-by-Step 325
 - Potential Complications 329
- 45. Anterior Lumbar Arthroplasty** 331
Richard D Guyer, Issada Thongtrangan
- Introduction 331
 - Anatomy 331
 - Surgical Indications 332
 - Surgical Technique Step-by-Step 332
 - Access to Retroperitoneal Space 332
 - Disk Preparation or Discectomy 334
 - Sizing and Trialing 335
 - Implant Insertion 336
 - Risks and Complications 337
 - Postoperative Management 338
- 46. Anterior Lumbar Corpectomy** 341
Jacob Fennessy, Michael S Weinstein, Murray J Cohen, Jeff A Rihn
- Introduction 341
 - Indications 341
 - Surgical Technique Step-by-Step 342
 - Surgical Approach 342
 - Corpectomy 347
 - Reconstruction and Stabilization 348
 - Complications 349
- 47. Posterior Lumbar Interbody Fusion** 353
Carmen Petraglia, Paul Justin Tortolani, David Alexander Stroh
- Introduction 353
 - Pathophysiology 353
 - Indications 354
 - Patient Evaluation 354
 - Surgical Technique Step-by-Step 356
 - Postoperative Management 359
 - Complications 359
- 48. Open Transforaminal Lumbar Interbody Fusion** 362
Ravi K Ponnappan, James E Dowdell
- Introduction 362
 - Anatomy 363
 - General 363
 - Surgical 363
 - Surgical Indications 364
 - Surgical Technique Step-by-Step 365
 - Positioning 365
 - Surgical Approach 365
 - Transforaminal Lumbar Interbody Fusion Window 366
 - Disk Space Preparation 367
 - Cage Selection 368
 - Bone Grafting or Cage Insertion 368
 - Posterior Spinal Stabilization with Pedicle Screw Placement 368

• Postoperative Care	369	
• Potential Complications	370	
49. Minimally Invasive Transforaminal Lumbar Interbody Fusion		372
<i>Raul J Cardenas, Kevin T Foley</i>		
• Introduction	372	
• Indications and Preoperative Assessment	372	
• Surgical Technique Step-by-Step	373	
– Patient Positioning and Operating Room Setup	373	
– Initial Incision and Pedicle Identification	373	
– Pedicle Cannulation	374	
– Facetectomy, Laminotomy, and Discectomy	375	
• Complications	379	
• Illustrative Case	379	
50. Spondylolisthesis Reduction and Fixation Techniques		383
<i>Scott I Lee, Richard Todd Allen, Steven Garfin</i>		
• Introduction	383	
• Clinical Findings and Physical Examination	385	
• Anatomy/Biomechanics	385	
• Surgical Indications	386	
• Surgical Technique	387	
• Potential Complications	388	
51. Lateral Lumbar Interbody Fusion Surgical Technique		390
<i>Isaac L Moss, Scott S Mallozzi, Frank M Phillips</i>		
• Introduction	390	
• Anatomy	390	
• Biomechanics	391	
• Surgical Indications	392	
• Surgical Technique Step-by-Step	393	
– Preparation, Positioning and Skin Marking	393	
– Retroperitoneal Access	394	
– Intervertebral Disk Exposure	395	
– Discectomy and Placement of Interbody Implant	396	
– Anterior Column Realignment	397	
– Closure and Postoperative Care	398	
• Complications	398	
52. Interspinous Spacers		401
<i>Stephanie Hsu, Joshua Abrams, James Zucherman</i>		
• Anatomy	401	
• Surgical Indications	401	
• Implantation of Specific Surgical Technique	404	
– General Technical Considerations	404	
– Technical Approaches	405	
• Postoperative Care	413	
• Complications	413	
53. Oncologic Sacrectomy		416
<i>Peter S Rose, Robert A Waldrop</i>		
• Introduction	416	

- Anatomy 416
 - General 416
 - Bony 416
 - Neurologic 418
- Surgical Indications 419
- Patient Evaluation 419
- Surgical Technique Step-by-Step 420
 - Anterior Approach 420
 - Posterior Approach 421
- Reconstruction 423
- Postoperative Care 424
- Complications 424
- Outcomes 425

54. Spinopelvic Fixation Techniques

Mostafa H El Dafrawy, Khaled M Kebaish

- Introduction 427
- Anatomy and Biomechanics 427
 - Lumbosacral Pivot Point 427
 - Zones of Sacropelvic Fixation 427
 - Spinopelvic Balance 427
- Surgical Indications 429
- Spinopelvic Fixation Options 430
 - S1 Pedicular Screws 430
 - Sacral Alar Screws 430
 - Iliosacral Screws 430
 - Galveston Technique 431
 - Iliac Screws 431
 - Transiliac Bar 431
 - S2 Alar Iliac Screws 432
- Surgical Technique Step-by-Step 433
 - Tricortical S1 Pedicle Screw Technique 433
 - Iliac Screws Technique 433
 - S2 Alar Iliac Technique 434
- Potential Complications 435
 - Misplacement and Injuries to Adjacent Structures 435
 - Implant Prominence and Loosening 436
 - Wound Complications and Infection 436
 - Nonunion and Implant Failure 436

SECTION 5: OTHER TECHNIQUES

55. Anterior and Posterior Iliac Crest Bone Graft Harvest

Anthony Lapinsky, Jacob Furey

- Introduction 441
- Benefits and Advantages of Iliac Crest Bone Grafting 441
- Surgical Technique Step-by-Step 441
 - Anterior Iliac Crest Bone Graft 441
 - Posterior Iliac Crest Bone Graft 443
- Risks, Complications and Disadvantages of Iliac Crest Bone Grafting 444

56. Vascular Rib Graft Harvest

446

Rishi M Kanna, Ajoy P Shetty, Mark Dekutoski, S Rajasekaran

- Introduction 446
- History 446
- Anatomy of Rib Vasculature 446
- Indications 447
- Surgical Technique Step-by-Step 447
 - Approach 447
 - Choice of Rib to Be Harvested 448
 - Harvesting the Graft 448
 - Anterior Placement of Rib Graft 449
 - Posterior Placement of Rib Graft 450
- Complications 452

**57. Lumbar Discography **

454

Mark S Kaplan

- Introduction 454
- Modified Dallas Discogram Scale 455
- Anatomy 455
- Indications 456
- Discography Technique Step-by-Step 456
- Potential Complications 458

58. Vertebral Body Augmentation Therapy

460

Larry Shay Richardson

- History 460
- Epidemiology 460
- Social Impact 460
- Diagnosis 461
- Treatment 462
- Surgical Technique Step-by-Step 462
- Complications 466

Index
