List of Contributors	xiii
Preface	xv
1. Overview of the Woodcock-Johnson IV: Organization, Content, and Psychometric Properties	
<i>Yi Ding and Vincent C. Alfonso</i>	
Theoretical Underpinnings of the WJ IV	2
Organization of the WJ IV COG, WJ IV ACH, and WJ IV OL	6
WJ IV COG	6
WJ IV ACH	7
WJ IV OL	11
Content of the WJ IV COG, WJ IV ACH, and WJ IV OL	11
Brief Description of Broad and Narrow CHC Abilities and Composition of WJ IV COG Factors and Clusters	11
Brief Description of Additional Broad CHC Abilities and Composition of WJ IV ACH Clusters	15
Reading Clusters	16
Mathematics Clusters	16
Written Language Clusters	17
Cross-Domain Clusters	17
Brief Description and Composition of WJ IV OL Clusters	17
Standardization Characteristics and Psychometric Properties of the WJ IV	18
Standardization Characteristics	19
Reliability	20
Floors and Ceilings	23
Validity	24
Summary	27
References	28
2. Clinical Interpretation of the Woodcock-Johnson IV Tests of Cognitive Abilities, Academic Achievement, and Oral Language	
<i>Ron Dumont, John O. Willis and Robert Walrath</i>	
Tests of Cognitive Abilities, Achievement, and Oral Language	31
Evaluating with a Purpose	38
Referral Questions	38

Specific Purposes	38
History	39
Choice of Instruments and Procedures	39
Levels of Interpretation	39
Age-Based Norms versus Grade-Based Norms	43
Raw Scores	44
W Scores and W Diff	44
Age- and Grade-Equivalent Scores	45
Relative Proficiency Index	46
Standard Scores	46
Confidence Bands	47
Percentile Ranks	48
Normal Curve Equivalents	49
Stanines	50
z-Scores	50
Standard T-Scores	50
Conditional Probability or the Whole Does Not Equal the Sum of Its Parts	51
Categorical Descriptors	52
SS Descriptors	52
Cognitive Academic Language Proficiency	52
Proficiency Level	53
Developmental Levels	53
Groups of Tests	54
General Intellectual Ability	54
Brief Intellectual Ability	54
Gf-Gc Composite	54
Comprehension Knowledge (Gc)	55
Fluid Reasoning (Gf)	55
Short-Term Working Memory (Gwm)	55
Auditory Memory Span (Gwm-MS)	55
Cognitive Processing Speed (Gs)	56
Perceptual Speed (Gs-P)	56
Auditory Processing (Ga)	56
Long-Term Retrieval (Glr)	56
Visual Processing (Gv)	56
Number Facility	57
Cognitive Efficiency	57
Oral Language Clusters	57
Reading Clusters	58
Math Clusters	58
Written Language Clusters	59
Cross-Domain Clusters	59
Scholastic Aptitude Clusters	59
Examples of Test Selection for Specific Issues	60
Autism Spectrum Disorders	60
Attention-Deficit/Hyperactivity Disorder	61
Conclusion	61
References	62

3. A Special Validity Study of the Woodcock–Johnson IV: Acting on Evidence for Specific Abilities

*Christopher R. Niileksela, Matthew R. Reynolds, Timothy Z. Keith
and Kevin S. McGrew*

Validity Evidence with the WJ IV	65
Validity and Cognitive-Achievement Relations	66
Previous Research on Cognitive-Achievement Relations	67
Current Study	69
Method	69
Participants and Instrument	69
Analysis Plan	69
Model Evaluation	71
Results	72
Cognitive Abilities Model	72
Academic Skills	72
Factorial Invariance	75
Reading	79
Writing	82
Math	83
Interpreting Cognitive-Achievement Relations with the WJ IV	85
Basic Reading Skills	88
Reading Rate	89
Reading Comprehension	91
Basic Writing Skills	93
Written Expression	93
Math Calculation Skills	95
Math Applications	96
Overall Summary of Cognitive-Achievement Relations with the WJ IV	98
Validity and Cognitive-Achievement Relations with the WJ IV	100
Limitations and Future Directions	101
Conclusions	102
Conflict of Interest Disclosure	102
Acknowledgment	102
References	102

4. Woodcock–Johnson IV Scoring and Reporting Online Program Review

Scott L. Decker, Emma Kate C. Wright and Tayllor E. Vetter

Introduction	107
Minimal Systems Requirements	107
Basic Functionality	108
Step-by-Step Guidelines for Obtaining Standard Scores	108
Basic Layout and Functions	109
Help Options	114
Advanced Functionality	115
Report Customizations	115
Data Export	117

Implications for Practice	117
Test Security	117
Confidentiality	118
Online Nature	119
Mobile Application (App)	120
"Committing" a Test Record	120
Research and Data Usage	121
References	121
 5. Instructional Implications from the Woodcock-Johnson IV Tests of Cognitive Abilities	
<i>Denise E. Maricle and Wendi L. Bauman Johnson</i>	
WJ IV	123
The Evolution of CHC Theory and Its Relationship to the WJ IV	124
WJ IV COG	126
Relationship of Cognition and Achievement	126
Neurocognitive and CHC Constructs Relevant to Academic Achievement	129
Reading, Mathematics, and Written Language	132
Reading	133
Mathematics	135
Writing	137
Neurocognitive Constructs: EFs and Working Memory	138
Executive Functions	139
Working Memory	141
Summary and Conclusions	143
References	144
 6. Instructional Implications from the Woodcock-Johnson IV Tests of Achievement	
<i>Nancy Mather and Barbara J. Wendling</i>	
General Considerations	152
Qualitative Observations and Quantitative Information	152
Patterns of Cluster and Test Scores	155
Comparison of Oral Language and Academic Knowledge to Academic Performance	157
Performance Implications of the Cattell-Horn-Carroll (CHC) Cognitive Factors	158
Academic Skills	160
Phonological Awareness	161
Nonword Reading and Spelling	162
Basic Writing Skills	164
Basic Math Skills	164
Instructional Implications for Academic Skills	164

Academic Fluency	167
Reading Fluency	168
Writing Fluency	170
Math Fluency	170
Instructional Implications for Academic Fluency	171
Oral Language, Knowledge, and Academic Applications	173
Instructional Implications for Academic Applications	176
Sample Case	178
Noel: Age 9-6, Grade 4.6	178
Reading	184
Spelling	184
Conclusion	184
References	185

7. Strengths and Weaknesses of the Woodcock-Johnson IV Tests of Cognitive Abilities: Best Practice from a Scientist-Practitioner Perspective

W. Joel Schneider

Strengths and Weaknesses: Individual Tests	192
Tests of Comprehension/Knowledge (Gc)	192
Oral Vocabulary	192
General Information	193
Picture Vocabulary	194
Oral Comprehension	194
Academic Knowledge: Humanities, Social Studies, and Science	195
Tests of Fluid Reasoning	195
Concept Formation	195
Analysis-Synthesis	195
Number Series+Number Matrices=A Love Story That Doesn't Add Up	196
Tests of Auditory Processing	196
Nonword Repetition	197
Phonological Processing	197
Sound Blending and Segmentation	198
Tests of Visual-Spatial Processing	198
Visualization	198
Picture Recognition	199
Tests of Working Memory Capacity	199
Verbal Attention	199
Memory for Words	200
Sentence Repetition	200
Understanding Directions	200
Numbers Reversed	200
Object-Number Sequencing	201
Tests of Learning Efficiency	201
Visual-Auditory Learning	201
Story Recall	202

Tests of Long-Term Memory Retrieval Fluency	202
<i>Retrieval Fluency</i>	203
<i>Rapid Picture Naming</i>	203
Tests of Processing Speed	203
<i>Number-Pattern Matching and Letter-Pattern Matching</i>	204
<i>Pair Cancellation</i>	204
Strengths and Weaknesses: Whole Battery	204
<i>The Technical Manual</i>	204
The WJ IV's Greatest Weakness	205
The Postprandial Coffee Is Weak...	205
...and the Decor Is Plain	205
A Little Co-Norming Goes a Long Way	205
Overall Evaluation	209
References	209
8. Use of the Woodcock–Johnson IV in the Identification of Specific Learning Disabilities in School-age Children	
<i>Erin M. McDonough and Dawn P. Flanagan</i>	
The Dual Discrepancy/Consistency Operational Definition of SLD	212
Level I: Academic Ability Analysis with the WJ IV	226
Level II: Exclusionary Factors—Evaluation of Potential Primary and Contributory Causes of Academic Skill Weaknesses or Deficits	230
Level III: Cognitive Ability Analysis with the WJ IV	232
Level IV: The Dual Discrepancy/Consistency PSW	233
Relationship between Cognitive and Academic Weaknesses	233
Generally Average Ability to Think and Reason (g)	235
Domain-Specific Cognitive Deficits	237
Unexpected Underachievement	238
Level V: Evaluation of Interference with Learning	238
Summary of a WJ IV Case Report	239
Level I	239
Level II	246
Level III	246
Level IV	247
Conclusions	249
References	249
9. Use of the Woodcock–Johnson IV in the Diagnosis of Specific Learning Disabilities in Adulthood	
<i>Benjamin J. Lovett and Laura M. Spenceley</i>	
Formal Criteria for LD in Adulthood	254
Diagnostic Models of LD	255
Low Achievement (Simple Impairment) Model	256
Ability–Achievement Discrepancy Model	259
<i>Evaluation of the Ability–Achievement Discrepancy Model</i>	260
Pattern of Strengths and Weaknesses Models	261
Conclusion: Beyond Formal Testing	267
References	267

10. Use of the Woodcock–Johnson IV Tests of Cognitive Abilities in the Diagnosis of Intellectual Disability	
<i>Randy G. Floyd, Isaac L. Woods, Leah J. Singh and Haley K. Hawkins</i>	
Characteristics of Children with ID and Implications for Assessment	272
American Association on Intellectual and Developmental Disabilities	272
American Psychiatric Association	273
Implications of the AAIDD and DSM-5 Criteria and Psychometric Standards	274
Assessing Students with ID with the WJ IV	276
Norming	277
Reliability	277
Validity Evidence	278
Adequacy of Test and Composite Floors	280
Special Study of Children with ID	281
Conclusion	282
Case Study	282
Reason for Referral	282
Background Information	282
Assessment Techniques	284
Behavioral Observations during Testing	284
Major Findings	284
References	287
 11. Use of the Woodcock–Johnson IV Tests of Cognitive Abilities and Achievement in the Assessment for Giftedness	
<i>Steven I. Pfeiffer and Jordy B. Yarnell</i>	
Introduction	291
Who Are Gifted Individuals?	292
The Unmet Academic Needs of Students Who Are Gifted	294
Gifted as a Social Construction	294
Tripartite Model of Giftedness	295
Purposes of Assessment for Giftedness	299
Guiding Principles and Fundamental Beliefs about Assessment for Giftedness	300
Fundamental Beliefs of Assessment for Giftedness	300
Key Principles in the Assessment for Giftedness	302
<i>How We Define Gifted Is Important</i>	302
<i>Assessment Should Consider the Types of Available Programs for the Gifted</i>	302
<i>Psychometrics Count</i>	303
<i>People, Not Test Scores, Should Make Diagnostic Decisions</i>	303
<i>Multiple Measures</i>	304
<i>Recurring Assessment</i>	304
The WJ IV and Assessment for Giftedness	304
Research Using the WJ III with Gifted Students	304
Technical Characteristics of the WJ IV	307
A Practitioner's Perspective: The New WJ IV and Assessment for Giftedness	309

Conclusion	311
References	312
12. Assessment of Culturally and Linguistically Diverse Individuals with the Woodcock–Johnson IV	
<i>Samuel O. Ortiz, Juan A. Ortiz and Rosemary I. Devine</i>	
Introduction	317
The Defensibility and Validity of Traditional Assessment Approaches	318
Modified or Altered Methods of Evaluation	320
Nonverbal Methods of Evaluation	321
Dominant Language Evaluation: Native Language Assessment	322
Dominant Language Evaluation: English Language Assessment	324
A Recommended Best Practices Approach	326
Best Practices in Evaluation of ELLs with the WJ IV COG	330
Use of the C-LIM with the WJ IV COG	331
Follow Up, Native Language Evaluation with the WJ IV COG and OL	334
Additional Test Score Validity Considerations	335
The Gc Caveat	336
Legacy Issues in Evaluation of ELLs with the WJ IV COG and OL	337
Case Study: Marosita	339
Summary	349
References	351
13. Neurocognitive Applications of the Woodcock–Johnson IV	
<i>Daniel C. Miller, Ryan J. McGill and Wendi L. Bauman Johnson</i>	
Neurocognitive Applications of the WJ IV	355
WJ IV Tests Classified According to a Neuropsychological Model	356
Coverage of Basic Neurocognitive Constructs by the WJ IV Tests of	
Cognitive Abilities, Oral Language, and Achievement	360
Interpreting the WJ IV from a Neuropsychological Perspective	380
Summary	383
References	384
14. Use of the Woodcock–Johnson IV in a Response to Intervention Service Delivery Model	
<i>Karen E. Apgar and Justin L. Potts</i>	
RtI as an Educational Initiative	389
RtI Basics	390
IDEA 2004	390
Key Elements of an Academic MTSS	391
Academic MTSS in Action	394
Comprehensive Individual Evaluation	398
Use of the WJ IV Assessment Tools in Three MTSS-Based	
Use Case Scenarios	399
Conclusion	403
References	404
Index	407
