

Features a straightforward and concise resource for introductory statistical concepts, methods, and techniques using R

Understanding and Applying Basic Statistical Methods Using R uniquely bridges the gap between advances in the statistical literature and methods routinely used by non-statisticians. Providing a conceptual basis for understanding the relative merits and applications of these methods, the book features modern insights and advances relevant to basic techniques in terms of dealing with non-normality, outliers, heteroscedasticity (unequal variances), and curvature.

Featuring a guide to R, the book uses R programming to explore introductory statistical concepts and standard methods for dealing with known problems associated with classic techniques. Thoroughly class-room tested, the book includes sections that focus on either R programming or computational details to help the reader become acquainted with basic concepts and principles essential in terms of understanding and applying the many methods currently available. Covering relevant material from a wide range of disciplines, *Understanding and Applying Basic Statistical Methods Using R* also includes the following:

- Numerous illustrations and exercises that use data to demonstrate the practical importance of multiple perspectives
- Discussions on common mistakes such as eliminating outliers and applying standard methods based on means using the remaining data
- Detailed coverage on R programming with descriptions on how to apply both classic and more modern methods using R
- A companion website with the data and solutions to all of the exercises

Understanding and Applying Basic Statistical Methods Using R is an ideal textbook for undergraduate- and graduate-level statistics courses in the science and/or social science departments. The book can also serve as a reference for professional statisticians and other practitioners looking to better understand modern statistical methods as well as R programming.

RAND R. WILCOX, PhD, is Professor in the Department of Psychology at the University of Southern California, Fellow of the Association for Psychological Science, and an associate editor for four statistics journals. The author of more than 320 articles published in a variety of statistical journals, he is also the author of 11 other books on statistics. Dr. Wilcox is creator of WRS (Wilcox' Robust Statistics), which is an R package for performing robust statistical methods. His main research interest includes statistical methods, particularly robust methods for comparing groups and studying associations.

List of Symbols	xv
Preface	xvii
About the Companion Website	xix
1 Introduction	1
1.1 Samples Versus Populations, 3	
1.2 Comments on Software, 4	
1.3 R Basics, 5	
1.3.1 Entering Data, 6	
1.3.2 Arithmetic Operations, 10	
1.3.3 Storage Types and Modes, 12	
1.3.4 Identifying and Analyzing Special Cases, 17	
1.4 R Packages, 20	
1.5 Access to Data Used in this Book, 22	
1.6 Accessing More Detailed Answers to the Exercises, 23	
1.7 Exercises, 23	
2 Numerical Summaries of Data	25
2.1 Summation Notation, 26	
2.2 Measures of Location, 29	
2.2.1 The Sample Mean, 29	
2.2.2 The Median, 30	
2.2.3 Sample Mean versus Sample Median, 33	

- 2.2.4 Trimmed Mean, 34
- 2.2.5 R function mean, tmean, and median, 35
- 2.3 Quartiles, 36
 - 2.3.1 R function idealf and summary, 37
- 2.4 Measures of Variation, 37
 - 2.4.1 The Range, 38
 - 2.4.2 R function Range, 38
 - 2.4.3 Deviation Scores, Variance, and Standard Deviation, 38
 - 2.4.4 R Functions var and sd, 40
 - 2.4.5 The Interquartile Range, 41
 - 2.4.6 MAD and the Winsorized Variance, 41
 - 2.4.7 R Functions winvar, winsd, idealfIQR, and mad, 44
- 2.5 Detecting Outliers, 44
 - 2.5.1 A Classic Outlier Detection Method, 45
 - 2.5.2 The Boxplot Rule, 46
 - 2.5.3 The MAD–Median Rule, 47
 - 2.5.4 R Functions outms, outbox, and out, 47
- 2.6 Skipped Measures of Location, 48
 - 2.6.1 R Function MOM, 49
- 2.7 Summary, 49
- 2.8 Exercises, 50

3 Plots Plus More Basics on Summarizing Data

53

- 3.1 Plotting Relative Frequencies, 53
 - 3.1.1 R Functions table, plot, splot, barplot, and cumsum, 54
 - 3.1.2 Computing the Mean and Variance Based on the Relative Frequencies, 56
 - 3.1.3 Some Features of the Mean and Variance, 57
- 3.2 Histograms and Kernel Density Estimators, 57
 - 3.2.1 R Function hist, 58
 - 3.2.2 What Do Histograms Tell Us? 59
 - 3.2.3 Populations, Samples, and Potential Concerns about Histograms, 61
 - 3.2.4 Kernel Density Estimators, 64
 - 3.2.5 R Functions Density and Akerd, 64
- 3.3 Boxplots and Stem-and-Leaf Displays, 65
 - 3.3.1 R Function stem, 67
 - 3.3.2 Boxplot, 67
 - 3.3.3 R Function boxplot, 68
- 3.4 Summary, 68
- 3.5 Exercises, 69

4 Probability and Related Concepts

71

- 4.1 The Meaning of Probability, 71
- 4.2 Probability Functions, 72

- 4.3 Expected Values, Population Mean and Variance, 74
 - 4.3.1 Population Variance, 76
- 4.4 Conditional Probability and Independence, 77
 - 4.4.1 Independence and Dependence, 78
- 4.5 The Binomial Probability Function, 80
 - 4.5.1 R Functions dbinom and pbinom, 85
- 4.6 The Normal Distribution, 85
 - 4.6.1 Some Remarks about the Normal Distribution, 88
 - 4.6.2 The Standard Normal Distribution, 89
 - 4.6.3 Computing Probabilities for Any Normal Distribution, 92
 - 4.6.4 R Functions pnorm and qnorm, 94
- 4.7 Nonnormality and The Population Variance, 94
 - 4.7.1 Skewed Distributions, 97
 - 4.7.2 Comments on Transforming Data, 98
- 4.8 Summary, 100
- 4.9 Exercises, 101

5 Sampling Distributions

107

- 5.1 Sampling Distribution of \hat{p} , the Proportion of Successes, 108
- 5.2 Sampling Distribution of the Mean Under Normality, 111
 - 5.2.1 Determining Probabilities Associated with the Sample Mean, 113
 - 5.2.2 But Typically σ Is Not Known. Now What? 116
- 5.3 Nonnormality and the Sampling Distribution of the Sample Mean, 116
 - 5.3.1 Approximating the Binomial Distribution, 117
 - 5.3.2 Approximating the Sampling Distribution of the Sample Mean: The General Case, 119
- 5.4 Sampling Distribution of the Median and 20% Trimmed Mean, 123
 - 5.4.1 Estimating the Standard Error of the Median, 126
 - 5.4.2 R Function msmedse, 127
 - 5.4.3 Approximating the Sampling Distribution of the Sample Median, 128
 - 5.4.4 Estimating the Standard Error of a Trimmed Mean, 129
 - 5.4.5 R Function trimse, 130
 - 5.4.6 Estimating the Standard Error When Outliers Are Discarded: A Technically Unsound Approach, 130
- 5.5 The Mean Versus the Median and 20% Trimmed Mean, 131
- 5.6 Summary, 135
- 5.7 Exercises, 136

6 Confidence Intervals

139

- 6.1 Confidence Interval for the Mean, 139
 - 6.1.1 Computing a Confidence Interval Given σ^2 , 140
- 6.2 Confidence Intervals for the Mean Using s (σ Not Known), 145
 - 6.2.1 R Function t.test, 148

- 6.3 A Confidence Interval for The Population Trimmed Mean, 149
 - 6.3.1 R Function `trimci`, 150
- 6.4 Confidence Intervals for The Population Median, 151
 - 6.4.1 R Function `msmedci`, 152
 - 6.4.2 Underscoring a Basic Strategy, 152
 - 6.4.3 A Distribution-Free Confidence Interval for the Median Even When There Are Tied Values, 153
 - 6.4.4 R Function `sint`, 154
- 6.5 The Impact of Nonnormality on Confidence Intervals, 155
 - 6.5.1 Student's T and Nonnormality, 155
 - 6.5.2 Nonnormality and the 20% Trimmed Mean, 161
 - 6.5.3 Nonnormality and the Median, 162
- 6.6 Some Basic Bootstrap Methods, 163
 - 6.6.1 The Percentile Bootstrap Method, 163
 - 6.6.2 R Functions `trimpb`, 164
 - 6.6.3 Bootstrap- t , 164
 - 6.6.4 R Function `trimcibt`, 166
- 6.7 Confidence Interval for The Probability of Success, 167
 - 6.7.1 Agresti–Coull Method, 169
 - 6.7.2 Blyth's Method, 169
 - 6.7.3 Schilling–Doi Method, 170
 - 6.7.4 R Functions `acbinomci` and `binomLCO`, 170
- 6.8 Summary, 172
- 6.9 Exercises, 173

7 Hypothesis Testing

179

- 7.1 Testing Hypotheses about the Mean, σ Known, 179
 - 7.1.1 Details for Three Types of Hypotheses, 180
 - 7.1.2 Testing for Exact Equality and Tukey's Three-Decision Rule, 183
 - 7.1.3 p -Values, 184
 - 7.1.4 Interpreting p -Values, 186
 - 7.1.5 Confidence Intervals versus Hypothesis Testing, 187
- 7.2 Power and Type II Errors, 187
 - 7.2.1 Power and p -Values, 191
- 7.3 Testing Hypotheses about the mean, σ Not Known, 191
 - 7.3.1 R Function `t.test`, 193
- 7.4 Student's T and Nonnormality, 193
 - 7.4.1 Bootstrap- t , 195
 - 7.4.2 Transforming Data, 196
- 7.5 Testing Hypotheses about Medians, 196
 - 7.5.1 R Function `msmedci` and `sintv2`, 197
- 7.6 Testing Hypotheses Based on a Trimmed Mean, 198
 - 7.6.1 R Functions `trimci`, `trimpb`, and `trimcibt`, 198
- 7.7 Skipped Estimators, 200
 - 7.7.1 R Function `momci`, 200

- 7.8 Summary, 201
- 7.9 Exercises, 202

8 Correlation and Regression

207

- 8.1 Regression Basics, 207
 - 8.1.1 Residuals and a Method for Estimating the Median of Y Given X , 209
 - 8.1.2 R function `qreg` and `Qreg`, 211
- 8.2 Least Squares Regression, 212
 - 8.2.1 R Functions `lsfit`, `lm`, `ols`, `plot`, and `abline`, 214
- 8.3 Dealing with Outliers, 215
 - 8.3.1 Outliers among the Independent Variable, 215
 - 8.3.2 Dealing with Outliers among the Dependent Variable, 216
 - 8.3.3 R Functions `tsreg` and `tshdreg`, 218
 - 8.3.4 Extrapolation Can Be Dangerous, 219
- 8.4 Hypothesis Testing, 219
 - 8.4.1 Inferences about the Least Squares Slope and Intercept, 220
 - 8.4.2 R Functions `lm`, `summary`, and `ols`, 223
 - 8.4.3 Heteroscedasticity: Some Practical Concerns and How to Address Them, 225
 - 8.4.4 R Function `olshc4`, 226
 - 8.4.5 Outliers among the Dependent Variable: A Cautionary Note, 227
 - 8.4.6 Inferences Based on the Theil–Sen Estimator, 227
 - 8.4.7 R Functions `regci` and `regplot`, 227
- 8.5 Correlation, 229
 - 8.5.1 Pearson’s Correlation, 229
 - 8.5.2 Inferences about the Population Correlation, ρ , 232
 - 8.5.3 R Functions `pcor` and `pcorhc4`, 234
- 8.6 Detecting Outliers When Dealing with Two or More Variables, 235
 - 8.6.1 R Functions `out` and `outpro`, 236
- 8.7 Measures of Association: Dealing with Outliers, 236
 - 8.7.1 Kendall’s Tau, 236
 - 8.7.2 R Functions `tau` and `tauci`, 239
 - 8.7.3 Spearman’s Rho, 240
 - 8.7.4 R Functions `spear` and `spearci`, 241
 - 8.7.5 Winsorized and Skipped Correlations, 242
 - 8.7.6 R Functions `scor`, `scorci`, `scorciMC`, `wincor`, and `wincorci`, 243
- 8.8 Multiple Regression, 245
 - 8.8.1 Least Squares Regression, 245
 - 8.8.2 Hypothesis Testing, 246
 - 8.8.3 R Function `olstest`, 248
 - 8.8.4 Inferences Based on a Robust Estimator, 248
 - 8.8.5 R Function `regtest`, 249
- 8.9 Dealing with Curvature, 249
 - 8.9.1 R Function `lplot` and `rplot`, 251

9 Comparing Two Independent Groups

9.1 Comparing Means, 264

9.1.1 The Two-Sample Student's T Test, 2649.1.2 Violating Assumptions When Using Student's T , 266

9.1.3 Why Testing Assumptions Can Be Unsatisfactory, 269

9.1.4 Interpreting Student's T When It Rejects, 270

9.1.5 Dealing with Unequal Variances: Welch's Test, 271

9.1.6 R Function `t.test`, 2739.1.7 Student's T versus Welch's Test, 274

9.1.8 The Impact of Outliers When Comparing Means, 275

9.2 Comparing Medians, 276

9.2.1 A Method Based on the McKean–Schrader Estimator, 276

9.2.2 A Percentile Bootstrap Method, 277

9.2.3 R Functions `msmed`, `medpb2`, `split`, and `fac2list`, 278

9.2.4 An Important Issue: The Choice of Method can Matter, 279

9.3 Comparing Trimmed Means, 280

9.3.1 R Functions `yuen`, `yuenbt`, and `trimpb2`, 282

9.3.2 Skipped Measures of Location and Deleting Outliers, 283

9.3.3 R Function `pb2gen`, 283

9.4 Tukey's Three-Decision Rule, 283

9.5 Comparing Variances, 284

9.5.1 R Function `comvar2`, 285

9.6 Rank-Based (Nonparametric) Methods, 285

9.6.1 Wilcoxon–Mann–Whitney Test, 286

9.6.2 R Function `wmw`, 289

9.6.3 Handling Heteroscedasticity, 289

9.6.4 R Functions `cid` and `cidv2`, 290

9.7 Measuring Effect Size, 291

9.7.1 Cohen's d , 2929.7.2 Concerns about Cohen's d and How They Might Be Addressed, 2939.7.3 R Functions `akp.effect`, `yuenv2`, and `med.effect`, 295

9.8 Plotting Data, 296

9.8.1 R Functions `ebarplot`, `ebarplot.med`, `g2plot`, and `boxplot`, 298

9.9 Comparing Quantiles, 299

9.9.1 R Function `qcomhd`, 300

9.10 Comparing Two Binomial Distributions, 301

9.10.1 Improved Methods, 302

9.10.2 R Functions `twobinom` and `twobicipv`, 302

9.11 A Method for Discrete or Categorical Data, 303

9.11.1 R Functions `disc2com`, `binband`, and `splotg2`, 304

9.12 Comparing Regression Lines, 305

- 9.12.1 Classic ANCOVA, 307
- 9.12.2 R Function CLASSanc, 307
- 9.12.3 Heteroscedastic Methods for Comparing the Slopes and Intercepts, 309
- 9.12.4 R Functions olsJ2 and ols2ci, 309
- 9.12.5 Dealing with Outliers among the Dependent Variable, 311
- 9.12.6 R Functions reg2ci, ancGpar, and reg2plot, 311
- 9.12.7 A Closer Look at Comparing Nonparallel Regression Lines, 313
- 9.12.8 R Function ancJN, 313
- 9.13 Summary, 315
- 9.14 Exercises, 316

10 Comparing More than Two Independent Groups 321

- 10.1 The ANOVA F Test, 321
 - 10.1.1 R Functions anova, anova1, aov, split, and fac2list, 327
 - 10.1.2 When Does the ANOVA F Test Perform Well? 329
- 10.2 Dealing with Unequal Variances: Welch's Test, 331
- 10.3 Comparing Groups Based on Medians, 333
 - 10.3.1 R Functions med1way and Qanova, 333
- 10.4 Comparing Trimmed Means, 334
 - 10.4.1 R Functions t1way and t1waybt, 335
- 10.5 Two-Way ANOVA, 335
 - 10.5.1 Interactions, 338
 - 10.5.2 R Functions anova and aov, 341
 - 10.5.3 Violating Assumptions, 342
 - 10.5.4 R Functions t2way and t2waybt, 343
- 10.6 Rank-Based Methods, 344
 - 10.6.1 The Kruskal–Wallis Test, 344
 - 10.6.2 Method BDM, 346
- 10.7 R Functions kruskal.test AND bdm, 347
- 10.8 Summary, 348
- 10.9 Exercises, 349

11 Comparing Dependent Groups 353

- 11.1 The Paired T Test, 354
 - 11.1.1 When Does the Paired T Test Perform Well? 356
 - 11.1.2 R Functions t.test and trimcibt, 357
- 11.2 Comparing Trimmed Means and Medians, 357
 - 11.2.1 R Functions yuend, ydbt, and dmedpb, 359
 - 11.2.2 Measures of Effect Size, 363
 - 11.2.3 R Functions D.akp.effect and effectg, 364
- 11.3 The SIGN Test, 364
 - 11.3.1 R Function signt, 365
- 11.4 Wilcoxon Signed Rank Test, 365
 - 11.4.1 R Function wilcox.test, 367

- 11.5 Comparing Variances, 367
 - 11.5.1 R Function `comdvar`, 368
- 11.6 Dealing with More Than Two Dependent Groups, 368
 - 11.6.1 Comparing Means, 369
 - 11.6.2 R Function `aov`, 369
 - 11.6.3 Comparing Trimmed Means, 370
 - 11.6.4 R Function `rmanova`, 371
 - 11.6.5 Rank-Based Methods, 371
 - 11.6.6 R Functions `friedman.test` and `bprm`, 373
- 11.7 Between-By-Within Designs, 373
 - 11.7.1 R Functions `bwtrim` and `bw2list`, 373
- 11.8 Summary, 375
- 11.9 Exercises, 376

12 Multiple Comparisons

379

- 12.1 Classic Methods for Independent Groups, 380
 - 12.1.1 Fisher's Least Significant Difference Method, 380
 - 12.1.2 R Function `FisherLSD`, 382
- 12.2 The Tukey–Kramer Method, 382
 - 12.2.1 Some Important Properties of the Tukey–Kramer Method, 384
 - 12.2.2 R Functions `TukeyHSD` and `T.HSD`, 385
- 12.3 Scheffé's Method, 386
 - 12.3.1 R Function `Scheffe`, 386
- 12.4 Methods That Allow Unequal Population Variances, 387
 - 12.4.1 Dunnett's T3 Method and an Extension of Yuen's Method for Comparing Trimmed Means, 387
 - 12.4.2 R Functions `lincon`, `linconbt`, and `conCON`, 389
- 12.5 Anova Versus Multiple Comparison Procedures, 391
- 12.6 Comparing Medians, 391
 - 12.6.1 R Functions `msmed`, `medpb`, and `Qmcp`, 392
- 12.7 Two-Way Anova Designs, 393
 - 12.7.1 R Function `mcp2atm`, 397
- 12.8 Methods For Dependent Groups, 400
 - 12.8.1 Bonferroni Method, 400
 - 12.8.2 Rom's Method, 401
 - 12.8.3 Hochberg's Method, 403
 - 12.8.4 R Functions `rmmcp`, `dmedpb`, and `sintmcp`, 403
 - 12.8.5 Controlling the False Discovery Rate, 404
- 12.9 Summary, 405
- 12.10 Exercises, 406

13 Categorical Data

409

- 13.1 One-Way Contingency Tables, 409
 - 13.1.1 R Function `chisq.test`, 413

13.1.2	Gaining Perspective: A Closer Look at the Chi-Squared Distribution, 413	
13.2	Two-Way Contingency Tables, 414	
13.2.1	McNemar's Test, 414	
13.2.2	R Functions <code>contab</code> and <code>mcnemar.test</code> , 417	
13.2.3	Detecting Dependence, 418	
13.2.4	R Function <code>chi.test.ind</code> , 422	
13.2.5	Measures of Association, 422	
13.2.6	The Probability of Agreement, 423	
13.2.7	Odds and Odds Ratio, 424	
13.3	Logistic Regression, 426	
13.3.1	R Function <code>logreg</code> , 428	
13.3.2	A Confidence Interval for the Odds Ratio, 429	
13.3.3	R Function <code>ODDSR.CI</code> , 429	
13.3.4	Smoothers for Logistic Regression, 429	
13.3.5	R Functions <code>rplot.bin</code> and <code>logSM</code> , 430	
13.4	Summary, 431	
13.5	Exercises, 432
