Everyone Makes Games	xvii
--------------------------------	------

What You'll Need	xviii
A Brief History of Games	xviii
Who Makes Video Games?	xix
Why Make a Video Game?	xx
What Should My Game Be About?	xxi
About Scratch	xxi
How Much Does Scratch Cost?	xxii
Do I Need to Know How to Program?	xxii
What If I Already Love Programming?	xxii
Alternative Tools	xxii

1 Leaf Me Alone!: Scratch Basics	1
--	---

Getting Started with Scratch	2
Leaf Me Alone (While I Eat This Leaf)	5
Creating Your Own Sprites	6
Drawing Weird Bugs	7
Drawing a Backdrop	8
Using Event Blocks	10
Moving the Bug.	11
Steering the Bug	14
Chewing Holes in the Leaf Using Pen Blocks.	17
Starting Fresh Each Game	22
Checking for Contact Between the Bug and the Leaf	25
Playing Sounds	27

Organizing Your Code	30
Challenge Level	32
Sharing Your Game	33
What You Learned	36

2 Weird Bug Chowdown: Collecting Items and Avoiding Obstacles 37

Copying a Project and Changing It	39
Tidying Up Your Code	40
Leaving a Rainbow Trail	41
Making Bug Food	44
Making a Sprite Clone Itself	45
Using Negative Numbers	46
Creating a Berry-Free Zone	47
Telling a Cloned Berry What to Do	48
Broadcasting Messages	49
Adding Time Pressure	51
Using Animation to Make Bad Berries	53
Branching with if and else	56
Recording the yuck Message	57
Poop Obstacles	58
Why Poop Obstacles Work	59
Making Poop by Having Sprites Clone Other Sprites	59
Coding the Poop Obstacles	60
Raising the Stakes	63
Creating Our Own Variables	63
Changing Speed	65
Ending the Game	67
Choosing the Butterfly Costume	67
Coding the Metamorphosis	68
Changing the Butterfly's Behavior	72
Adding a Starting Message	73
Optional Things to Try	74
What You Learned	75

3 Hatlight: A Cave Exploring Platform Game . . . 77

About Hatlight	78
Coding Platform Movement	79
Creating a Hitbox Sprite	80
Drawing a Test Area	81
Organizing Our Code with Events	82
Creating Variables	83
Coding Player Movement.	84
Moving Left and Right	84
Climbing Slopes and Steps	85
Falling.	87
Jumping.	88
Creating Natural Movement with Variables	88
Creating a World that's Fun to Explore.	91
Using a Variable to Create a Grid Map.	91
Moving from Screen to Screen	92
Coding Screen Change	94
Using Light and Darkness	95
Coding the Flashlight.	97
Creating Objects to Collect	97
What You Learned	100

4 Designing Levels 101

Let's Make Some Levels!.	102
Drawing Levels	103
Drawing a Cave.	104
Saving Details for Later.	105
Things to Keep in Mind	107
Adding Background Scenery	109
Teaching the Player How to Play	111
Showing Objects Players Can't Reach	113
Creating Interesting Landmarks	114
Creating Animation	116
Animating the Player's Movements	117
Or You Can Just Draw a Blob!	120

Creating a Mirror Image of a Costume	121
Coding the Animations.	122
Additional Challenges	124
What You Learned	124

5 Creating Sound Effects 125

Sound Design Tools	126
Recording and Editing Sounds with Audacity	127
Recording a Deadly Plummets	128
Sound Selections	130
Using Effects Tools.	132
Exporting Sounds	134
Using Sounds from the Internet	136
Generating Sounds with sfxr	137
Waveforms	138
Changing Sounds Using Sliders	140
Exporting Sounds	142
The bfxr Tool	143
Creating Music Loops with Drumcircle.	144
Making a Drum Loop.	146
Adding Some Drums	147
Adding More Sounds	148
Adding a Melody	150
Saving and Exporting Loops	151
Bosca Ceoil	152
Adding a Music Loop to a Scratch Game.	153
Extra Challenges	155
Compose a Score for a Game Using Only Mouth Sounds	155
Use Music to Create a Contrasting Mood	155
Create a Procedural Music Game.	156
What You Learned	156

6 Where to Go from Here 157

Asking Questions	158
Record Your Game	158
Share Your Game on itch.io	159
Collaborate with Someone Else.	160
Make a Game for Multiple Players	160
Make a Weird Controller	161
Keep Exploring and Creating!	163

Index 164

Everyone Makes Games

Video games can be played while sitting, standing, moving, and even downing it while. When a person plays games, they are not just sitting at a desk and clicking the mouse. They are moving and changing as they play with their body. They are not just sitting at a desk and clicking the mouse. They are moving and changing as they play with their body. They are not just sitting at a desk and clicking the mouse. They are moving and changing as they play with their body.
