

TABLE OF CONTENTS

ACKNOWLEDGMENTS	xiii
ABBREVIATIONS	xv
INTRODUCTION	xxi
1 Infection and Immunity	1
<i>What is the difference between a virus and a bacterium?</i>	2
<i>What is the difference between RNA and DNA?</i>	9
<i>Aren't viruses also much smaller than bacteria?</i>	13
<i>Why is it important to distinguish viruses from bacteria when discussing pandemics?</i>	15
<i>Are colds and flu caused by hundreds of viruses?</i>	17
<i>What exactly is a pathogen?</i>	19
<i>How does infection happen?</i>	22
<i>What is snot?</i>	26
<i>What is a horizontal infection? Is there another kind?</i>	26
<i>Are all virus and bacterial infections bad for us?</i>	27
<i>If there is a bacterial and protozoal "microbiome," is there also a "virome"?</i>	28
<i>What does "immunity" mean?</i>	30
<i>What are monoclonal antibodies?</i>	37

<i>Would you describe mAbs as drugs or vaccines?</i>	39
<i>What are vaccines?</i>	40
2 Pandemics, Epidemics, and Outbreaks	42
<i>What is the exact definition of pandemic?</i>	42
<i>Who declares a pandemic?</i>	43
<i>Was the H1N1 “swine flu” really so mild?</i>	44
<i>How does the WHO operate?</i>	45
<i>Should the pandemic classification system be refined?</i>	48
<i>How does a pandemic differ from an epidemic or an outbreak?</i>	49
<i>Do all pandemics involve infection?</i>	51
<i>What does the term “zoonosis” mean?</i>	52
<i>What is an endemic infection, and how does it differ from an epidemic infection?</i>	54
<i>Are plants also included in the world of pandemics?</i>	55
<i>In Summary</i>	55
3 The SARS Warning	56
<i>Why was SARS so scary?</i>	56
<i>How did SARS spread so quickly through hospitals?</i>	57
<i>What caused SARS and where did the pathogen come from?</i>	59
<i>Aside from “natural” reservoirs, are there other potential sources of SARS?</i>	61
<i>What steps were taken to stop the SARS outbreak?</i>	61
<i>Did the SARS experience have long-term effects, and what lessons were learned?</i>	63
4 Tuberculosis and Influenza	66
<i>Why should TB and influenza be considered together?</i>	66
<i>What is the current situation with TB?</i>	66

<i>Is multi-drug-resistant TB still an issue?</i>	68
<i>What is being done to combat the MDR TB threat?</i>	70
<i>Why might influenza remain the most obvious known pandemic threat?</i>	70
<i>What are the different kinds of influenza viruses?</i>	72
<i>What is antigenic shift and why is it so dangerous?</i>	74
<i>Are birds and pigs our main concern when it comes to catching the flu?</i>	78
<i>What was so special about the virus that caused the 1918–1919 influenza pandemic?</i>	79
<i>Is our capacity to counter influenza improving?</i>	82
<i>Are we making progress with flu vaccines?</i>	83
<i>Apart from vaccines, are there other products available to prevent infection?</i>	86
<i>How afraid should we be of influenza?</i>	88
5 Fledermaus to Field Mouse	90
<i>What's a fledermaus?</i>	90
<i>Is it unusual that fruit bats carry SARS?</i>	90
<i>Are the henipaviruses potential pandemic pathogens?</i>	93
<i>Is Ebola the scariest of all viruses?</i>	94
<i>What exactly is a hemorrhagic disease?</i>	96
<i>Are filoviruses the main cause of hemorrhagic fevers?</i>	98
6 Virus Vectors	102
<i>What is a vector?</i>	102
<i>What is WNV, and has it been around for very long?</i>	103
<i>WNV infects birds, horses, and humans—does it also multiply in mosquitoes?</i>	104
<i>What exactly is yellow fever virus?</i>	106
<i>What do we know about the global movements of arboviruses?</i>	109

<i>Do mosquitoes and ticks really carry needles?</i>	110
<i>What are the pandemic risks when it comes to these vectored viruses?</i>	111
7 Single-Host Human Pathogens	114
<i>Is an infection that is already widespread in humans likely to cause a pandemic?</i>	114
<i>What are noroviruses?</i>	114
<i>Are the noroviruses our only concern when it comes to the virus diarrheas?</i>	115
<i>What is intussusception?</i>	116
<i>Are there other ways of protecting against these viruses?</i>	116
<i>Apart from the hemorrhagic viruses, are cholera and typhoid the main causes of skin spots?</i>	117
<i>Is measles something that we should still be worried about?</i>	118
<i>Are there any other kinds of GI tract infections?</i>	119
<i>Is there a good hepatitis vaccine?</i>	119
<i>Are HepB and HepC the most dangerous of the hepatitis viruses?</i>	121
<i>Why is chronic hepatitis so dangerous?</i>	122
<i>Is it safe to have a blood transfusion?</i>	123
<i>Are any of these single-host human pathogens likely to cause pandemics?</i>	124
8 HIV/AIDS	126
<i>Is HIV still a concern?</i>	126
<i>Can what's happening now with HIV/AIDS be described as a pandemic?</i>	127
<i>Is there any improvement in the AIDS situation?</i>	127
<i>Where did this virus come from, and why didn't we see AIDS before 1981?</i>	129
<i>Was AIDS active much earlier in Africa?</i>	130
<i>Does the immune system fail totally when confronted with HIV?</i>	131
<i>How does HIV target the CD4+ T cell?</i>	133

<i>Do we yet have a vaccine for AIDS?</i>	133
<i>Will we ever have a vaccine for AIDS?</i>	134
<i>Has science failed us when it comes to HIV/AIDS?</i>	135
<i>What progress has been made in the last 25 years?</i>	136
<i>Could AIDS blow up in some way to cause an even bigger problem?</i>	138
<i>Once in the human body, can HIV ever be eliminated?</i>	139
<i>The Bottom Line</i>	142
9 Mad Cows and Creutzfeldt-Jakob Disease	143
<i>Has there ever been a mad cow or Creutzfeldt-Jakob disease pandemic?</i>	143
<i>So what is spongiform encephalopathy?</i>	144
<i>If the TSEs are infections, what's the big mystery?</i>	145
<i>Did BSE originate from sheep scrapie?</i>	147
<i>What is "bone meal"?</i>	148
<i>Has anyone contracted vCJD from eating imported British beef?</i>	148
<i>Was there even the possibility of a BSE/vCJD pandemic?</i>	149
<i>Does the history of BSE/CJD raise other concerns?</i>	149
<i>Are the TSEs a pandemic risk?</i>	150
10 Economics and the Human-Animal Equation	152
<i>What type of pandemic infection causes the most economic damage?</i>	152
<i>Is a novel respiratory infection the only economic threat?</i>	153
<i>Will it be massively expensive if quarantine officials are suddenly faced with an emergency?</i>	154
<i>From a financial standpoint, does influenza remain our main concern?</i>	155
<i>Why is FMD so damaging?</i>	156
<i>Could there ever be a global FMD pandemic?</i>	157
<i>Has an animal virus ever been introduced deliberately into "virgin soil"?</i>	158
<i>Other than as a consequence of bioterrorism, is a veterinary pandemic likely?</i>	162
<i>Are animal and human pandemics dealt with very differently?</i>	165

<i>Can returning tourists be infected with something that transmits to animals?</i>	166
<i>Can imported animals infect humans?</i>	166
<i>Can humans be infected from imported animal or other products?</i>	167
<i>In Summary</i>	168
11 Bioterrorism	169
<i>Could sophisticated terrorists initiate a pandemic?</i>	169
<i>What about Saddam Hussein and his weapons of mass destruction?</i>	171
<i>Why is a rogue state more worrisome than a terrorist cell when it comes to biological weapons?</i>	171
<i>Why would smallpox potentially be used in bioterrorism?</i>	173
<i>What do we know about anthrax?</i>	175
<i>Can you envision other novel bioterror pandemic scenarios?</i>	177
<i>Is a bioterrorist-initiated pandemic unlikely?</i>	178
12 Protecting Humanity from and during Pandemics	179
<i>Is there anything that I can do personally to limit the possibility of a dangerous pandemic?</i>	179
<i>What if I become ill while traveling?</i>	182
<i>What if I develop symptoms after I return home?</i>	182
<i>Apart from being a responsible traveler, what else might I do?</i>	184
<i>Are there useful steps that I can take at the level of my local community?</i>	186
<i>How do I protect my family if a pandemic hits?</i>	187
<i>Does the idea of being “too clean” apply to pandemics?</i>	190
<i>Where do I look for help if I become infected during the course of a major pandemic?</i>	192
<i>The Bottom Line</i>	193
13 Conclusions	195
FURTHER READING	201
