

Preface	xiii
---------------	------

Part I. XML Concepts

1. Introducing XML	3
The Benefits of XML	3
What XML Is Not	5
Portable Data	6
How XML Works	7
The Evolution of XML	8
2. XML Fundamentals	12
XML Documents and XML Files	12
Elements, Tags, and Character Data	13
Attributes	16
XML Names	18
References	20
CDATA Sections	21
Comments	22
Processing Instructions	22
The XML Declaration	24
Checking Documents for Well-Formedness	26

3. Document Type Definitions (DTDs)	28
Validation	29
Element Declarations	37
Attribute Declarations	42
General Entity Declarations	49
External Parsed General Entities	50
External Unparsed Entities and Notations	52
Parameter Entities	53
Conditional Inclusion	56
Two DTD Examples	56
Locating Standard DTDs	59
4. Namespaces	60
The Need for Namespaces	60
Namespace Syntax	63
How Parsers Handle Namespaces	68
Namespaces and DTDs	69
5. Internationalization	71
Character-Set Metadata	71
The Encoding Declaration	72
Text Declarations	73
XML-Defined Character Sets	74
Unicode	74
ISO Character Sets	77
Platform-Dependent Character Sets	78
Converting Between Character Sets	79
The Default Character Set for XML Documents	80
Character References	81
xml:lang	84

Part II. Narrative-Like Documents

6. XML as a Document Format	89
SGML's Legacy	89
Narrative Document Structures	90
TEI	92
DocBook	95
OpenOffice	98
WordprocessingML	101

Document Permanence	105
Transformation and Presentation	107
7. XML on the Web	110
XHTML	111
Direct Display of XML in Browsers	117
Authoring Compound Documents with Modular XHTML	122
Prospects for Improved Web Search Methods	139
8. XSL Transformations (XSLT)	144
An Example Input Document	144
xsl:stylesheet and xsl:transform	145
Stylesheet Processors	147
Templates and Template Rules	148
Calculating the Value of an Element with xsl:value-of	150
Applying Templates with xsl:apply-templates	151
The Built-in Template Rules	154
Modes	157
Attribute Value Templates	159
XSLT and Namespaces	159
Other XSLT Elements	161
9. XPath	162
The Tree Structure of an XML Document	162
Location Paths	165
Compound Location Paths	170
Predicates	171
Unabbreviated Location Paths	172
General XPath Expressions	175
XPath Functions	178
10. XLinks	183
Simple Links	183
Link Behavior	185
Link Semantics	187
Extended Links	188
Linkbases	195
DTDs for XLinks	196
Base URIs	197

11. XPointers	200
XPointers on URLs	200
XPointers in Links	202
Shorthand Pointers	203
Child Sequences	204
Namespaces	205
Points	205
Ranges	207
12. XInclude	212
The include Element	212
Including Text Files	214
Content Negotiation	215
Fallbacks	216
XPointers	217
13. Cascading Style Sheets (CSS)	219
The Levels of CSS	221
CSS Syntax	221
Associating Stylesheets with XML Documents	223
Selectors	225
The Display Property	228
Pixels, Points, Picas, and Other Units of Length	229
Font Properties	230
Text Properties	231
Colors	233
14. XSL Formatting Objects (XSL-FO)	234
XSL Formatting Objects	235
The Structure of an XSL-FO Document	237
Laying Out the Master Pages	238
XSL-FO Properties	244
Choosing Between CSS and XSL-FO	249
15. Resource Directory Description Language (RDDL)	251
What's at the End of a Namespace URL?	251
RDDL Syntax	252
Natures	256
Purposes	257

Part III. Record-Like Documents

16. XML as a Data Format	261
Why Use XML for Data?	261
Developing Record-Like XML Formats	271
Sharing Your XML Format	277
17. XML Schemas	278
Overview	278
Schema Basics	280
Working with Namespaces	286
Complex Types	288
Empty Elements	291
Simple Content	293
Mixed Content	297
Allowing Any Content	300
Controlling Type Derivation	306
18. Programming Models	310
Common XML Processing Models	310
Common XML Processing Issues	316
Generating XML Documents	322
19. Document Object Model (DOM)	324
DOM Foundations	324
Structure of the DOM Core	327
Node and Other Generic Interfaces	328
Specific Node-Type Interfaces	332
The DOMImplementation Interface	339
DOM Level 3 Interfaces	340
Parsing a Document with DOM	343
A Simple DOM Application	344
20. Simple API for XML (SAX)	348
The ContentHandler Interface	350
Features and Properties	358
Filters	360

Part IV. Reference

21. XML Reference	367
How to Use This Reference	367
Annotated Sample Documents	368
XML Syntax	372
Constraints	388
XML 1.0 Document Grammar	399
XML 1.1 Document Grammar	405
22. Schemas Reference	411
The Schema Namespaces	411
Schema Elements	412
Built-in Types	435
Instance Document Attributes	452
23. XPath Reference	455
The XPath Data Model	455
Data Types	456
Location Paths	457
Predicates	461
XPath Functions	462
24. XSLT Reference	469
The XSLT Namespace	469
XSLT Elements	469
XSLT Functions	490
TrAX	494
25. DOM Reference	496
Object Hierarchy	497
Object Reference	497
26. SAX Reference	574
The org.xml.sax Package	574
The org.xml.sax.helpers Package	581
SAX Features and Properties	588
The org.xml.sax.ext Package	590

27. Character Sets	594
Character Tables	596
HTML4 Entity Sets	601
Other Unicode Blocks	609
Index	655
