

Contents

Preface	xi
Acknowledgments	xv
1 Introduction	1
1.1 Multidimensional Data Management	1
1.2 Multidimensional History	2
1.3 Related Terminology	3
1.4 Shortcomings of Spreadsheets and Relations	4
1.5 OLAP versus OLTP	5
2 Fundamental Concepts	7
2.1 Cubes	7
2.2 Dimensions	9
2.3 Facts	10
2.4 Measures	11
2.5 Relational Representations	12
2.5.1 Star Schemas	12
2.5.2 Snowflake Schemas	14
2.6 Data Warehouses and Data Marts	14
2.7 Multidimensional Modeling Processes	17
2.8 Analysis and Querying	18
2.8.1 Roll-up, Drill-down, and Drill-out	18
2.8.2 Slicing and Dicing	20
2.8.3 Drill-Across	21
2.8.4 Pivot Tables	24
2.8.5 Ranking	25
2.8.6 Multidimensional Querying in MDX and SQL	25
2.8.7 Graphical Querying and Visualisations	28

2.9	Summarizing Example
2.10	Exercises
3	Advanced Concepts
3.1	Slowly Changing Dimensions
3.1.1	The Problem
3.1.2	Solutions
3.2	Other Special Kinds of Dimensions
3.2.1	Minidimensions
3.2.2	Outriggers
3.2.3	Degenerate Dimensions
3.2.4	Junk Dimensions
3.2.5	Time Dimensions
3.2.6	Data Quality Dimensions
3.3	Advanced Hierarchies
3.3.1	Parent-Child Hierarchies
3.3.2	Unbalanced Hierarchies
3.3.3	Non-Covering Hierarchies
3.3.4	Non-Strict Hierarchies
3.3.5	Multiple Hierarchies and Parallel Hierarchies
3.3.6	Summarizability
3.4	Summarizing Example
3.5	Exercises
4	Implementation Issues
4.1	Materialized Views
4.2	Indexing
4.2.1	Indexing Overview
4.2.2	Bitmap Indices
4.3	Join Indices
4.4	Query Processing
4.5	OLAP Implementations
4.6	Extract-Transform-Load
4.7	Exercises

5	Further Readings	73
5.1	Background Readings	73
5.2	Advanced Topics	77
5.3	Software Resources	80
	References	83
	Authors' Biographies	91
	Index	93
