1 Introduction to Motor Learning and Performance

1

How Skills Are Studied

Why Study Motor Skills?	3
The Science of Motor Learning and Performance	4
► Focus on Research 1.1 Paul M. Fitts	5
Defining Skills	5
► Focus on Research 1.2 Franklin M. Henry, Father of Motor Behavior Research	6
Components of Skills	7
Classifying Skills	8
Measuring Skilled Performance	10
Understanding Performance and Learning	16
Summary	17
Learning Aids	17

PART I Principles of Skilled Performance

2 Processing Information and Making Decisions

21

The Mental Side of Human Performance

The Information-Processing Approach	22
► Focus on Application 2.1 Intent to Blow Whistle Rule in NHL	26
Reaction Time and Decision Making	27
► Focus on Research 2.1 Hick's Law	31
► Focus on Research 2.2 Donders' Stages of Processing	33
► Focus on Application 2.2 Light Switches	36
► Focus on Research 2.3 Assessing Anticipation Skills	39
Memory Systems	40
► Focus on Application 2.3 Cost/Benefit of Anticipating in Sprint Starting	41
Summary	43
Learning Aids	44

3 Attention and Performance

47

Limitations on Information Processing

- ▶ **Focus on Application 3.1** William James on Attention 49
- What Is Attention? 49
- Limitations in Stimulus Identification 51
- ▶ **Focus on Research 3.1** Automatic Stimulus Processing in Basketball 53
- Limitations in Response Selection 55
- Limitations in Movement Programming 58
- ▶ **Focus on Research 3.2** Distracted-Driving Research 59
- ▶ **Focus on Research 3.3** The Double-Stimulation Paradigm 61
- Focus of Attention During Action 65
- Decision Making Under Stress 67
- ▶ **Focus on Application 3.2** Driver Panic and Unintended Acceleration 70
- Summary 71
- Learning Aids 72

4 Sensory Contributions to Skilled Performance

75

Feedback Processing in Motor Control

- Sources of Sensory Information 76
- Processing Sensory Information 79
- ▶ **Focus on Application 4.1** Force Escalation Between Siblings 82
- Principles of Visual Control 85
- ▶ **Focus on Research 4.1** Blindsight Reveals Dorsal and Ventral Stream Processing 87
- ▶ **Focus on Research 4.2** Gaze Control 94
- Audition and Motor Control 95
- ▶ **Focus on Application 4.2** Visibility in Nighttime Car-Truck Accidents 96
- ▶ **Focus on Application 4.3** When Vision Distorts Performance 97
- Summary 98
- Learning Aids 98

5 Motor Programs

101

Motor Control of Brief Actions

- Motor Program Theory 103
- Evidence for Motor Programs 106
- ▶ **Focus on Research 5.1** The Henry-Rogers Experiment 107
- ▶ **Focus on Application 5.1** Checked Swings in Baseball 111
- Motor Programs and the Conceptual Model 111
- ▶ **Focus on Research 5.2** Initiating a Motor Program 112
- Problems in Motor Program Theory: Novelty and Storage 115
- Generalized Motor Program Theory 117
- ▶ **Focus on Research 5.3** Invariances and Parameters 121

- ▶ **Focus on Application 5.2** Relative-Timing Fingerprints 122
- ▶ **Focus on Application 5.3** The Stereo System Analogy 126
- Summary 127
- Learning Aids 128

6 Principles of Speed, Accuracy, and Timing 131

Controlling Simple Movements

- Fitts' Law 132
- ▶ **Focus on Research 6.1** The Fitts Tasks 135
- Schmidt's Law 136
- ▶ **Focus on Application 6.1** Fitts' Law in Everyday Actions 137
- Speed-Accuracy Trade-Off Exceptions 141
- Applying the Principles: Baseball Batting 145
- Speed of Initiating Movement 147
- Summary 148
- Learning Aids 149

7 Performance of Complex Movements 151

From Abilities to Coordination Dynamics

- Traditional Approaches to Studying Complex Movement 152
- ▶ **Focus on Application 7.1** The Relative-Age Effect 157
- Coordinating Discrete Movements 158
- ▶ **Focus on Research 7.1** Coordination in Golf Putting 161
- Coordinating Continuous Movements 163
- ▶ **Focus on Research 7.2** Relative Phase: An Index of Coordination 164
- Summary 170
- Learning Aids 171

PART II Principles of Skill Learning

8 Introduction to Motor Learning 175

Concepts and Methods in Research and Application

- Motor Learning Defined 178
- How Is Motor Learning Measured? 181
- ▶ **Focus on Research 8.1** Learning Curves: Facts or Artifacts? 183
- Distinguishing Learning From Performance 184
- ▶ **Focus on Application 8.1** Self-Assessments of Learning 187
- Transfer of Learning 189
- Summary 192
- Learning Aids 192

9 The Motor Learning Process

195

Skill Acquisition, Retention, and Transfer

Skill Acquisition 197

► **Focus on Research 9.1** Learning Never Ends 206

► **Focus on Application 9.1** Fitts and Bernstein on Learning to Play Ice Hockey 208

Skill Retention 210

► **Focus on Research 9.2** A Constraints-Led Approach to Baseball Batting 211

Skill Transfer 215

Summary 221

Learning Aids 221

10 Organizing and Scheduling Practice

223

How the Structure of Practice Influences Learning

Motivation for Learning 224

Attentional Focus 227

Demonstrations and Modeling 228

Mental Practice 228

► **Focus on Application 10.1** Mental Practice in Stroke Rehabilitation 231

Organizing Practice and Rest Periods 232

Variable and Constant Practice 236

Blocked and Random Practice 239

► **Focus on Research 10.1** Especial Skills: An Exception to Variable Practice? 240

Summary 247

Learning Aids 247

11 Augmented Feedback

249

How Supplemental Feedback Influences Learning

Feedback Classifications 250

Functions of Augmented Feedback 255

► **Focus on Research 11.1** How Feedback Works 256

What Feedback to Give 258

How Much Feedback to Give 260

Feedback Timing 265

► **Focus on Application 11.1** Physical Guidance in Stroke Rehabilitation 267

► **Focus on Application 11.2** Physical Guidance in Learning to Swim 270

Summary 273

Learning Aids 273

Glossary 275
