<i>Acknowledgments</i>	x
1 Hacking and law	1
<i>Hackers and governance of the networked society</i>	1
<i>Hack</i>	2
<i>Makers</i>	4
<i>Hactivists</i>	4
<i>Key themes and concepts</i>	5
<i>Common acts of hacking</i>	6
<i>Breaking and making</i>	6
<i>Norms and values</i>	7
<i>Overview of chapters</i>	8
2 Hacker culture	13
<i>History and typology of hacking</i>	13
<i>Of minicomputers and laboratories – computer scientists and programmers</i>	14
<i>The Hulking Giants</i>	14
<i>The TX-0</i>	15
<i>The PDP-1</i>	16
<i>Of microcomputers, garages and computer clubs – computer hobbyists</i>	17
<i>The Altair</i>	17
<i>The Homebrew Computer Club</i>	19
<i>The Apple II</i>	20
<i>Blue boxes and paper tapes</i>	22
<i>Free and open versus proprietary and closed</i>	24
<i>Of personal computers, modems and bedrooms – underground hackers</i>	26
<i>Bulletin Board Systems</i>	26

	<i>The digital underground</i>	27
	<i>Of free and open source software, licenses and movements – FOSS developers</i>	30
	<i>Free software</i>	30
	<i>Copyleft</i>	32
	<i>Linux</i>	34
	<i>FOSS and other movements</i>	36
	<i>Of the world wide web of computers and communities – hacktivists</i>	37
	<i>Hacklabs, hackmeets and hacker cons</i>	37
	<i>Taking to the streets and the information superhighways</i>	39
	<i>Of open technologies, projects and spaces – makers</i>	41
	<i>Open innovation</i>	41
	<i>Hackerspaces</i>	42
	<i>Makerbot</i>	45
	<i>Makers and hacktivists in context</i>	48
3	Hacker norms and values	65
	<i>Norms and values of makers and hacktivists</i>	65
	<i>Creativity and innovation</i>	66
	<i>Curiosity</i>	67
	<i>Individual autonomy and liberty</i>	68
	<i>Community development</i>	70
	<i>Social development</i>	72
	<i>Other prominent norms and values</i>	73
	<i>Openness and freedom of access</i>	73
	<i>Transparency</i>	75
	<i>Security</i>	77
	<i>Privacy</i>	78
	<i>Hacker manifestos</i>	80
	<i>The hacker ethic</i>	81
	<i>The conscience of a hacker</i>	82
	<i>The GNU manifesto</i>	83
	<i>An anonymous manifesto</i>	85
	<i>This is the maker manifesto</i>	86
	<i>Norms and values in conflict</i>	87
4	Laws on hacking	95
	<i>Computer crime laws</i>	95
	<i>Brief history and development</i>	95
	<i>Computer crime and hacking</i>	97
	<i>Illegal access</i>	97

<i>Access or entry without right</i>	97
<i>Objectives and justifications</i>	99
<i>Conflicts with acts, norms and values of hacking</i>	100
<i>Problem of excessive breadth and vagueness</i>	103
<i>Unintended consequences and negative effects</i>	104
<i>Exploitable gaps, loopholes and contradictions</i>	105
<i>Illegal interception</i>	106
<i>Capture data transmissions and emissions</i>	106
<i>Legal and social justification</i>	107
<i>Data interference and system interference</i>	108
<i>Damage or hinder computer data and systems</i>	108
<i>Cyber attacks as a form of system interference</i>	110
<i>Lawful versus unlawful interference</i>	111
<i>Misuse of devices</i>	116
<i>Intellectual property laws</i>	117
<i>Fraught history of intellectual property and socio-technical innovation</i>	117
<i>Intellectual property balance</i>	118
<i>Broad exclusive rights yet narrow limitations and exceptions</i>	121
<i>Reverse engineering, decompilation and use of software</i>	122
<i>Temporary acts of reproduction</i>	124
<i>Private and non-commercial copying and use</i>	125
<i>Scientific research and teaching</i>	126
<i>Repair of equipment</i>	128
<i>Fair use and the three-step test</i>	128
<i>Contract and anti-circumvention laws</i>	131
<i>Contracts</i>	131
<i>Contractual terms and conditions</i>	131
<i>Freedom and restraints of contract</i>	132
<i>Contracts and computer crime</i>	133
<i>Anti-circumvention rules</i>	135
<i>Technological protection measures</i>	135
<i>Techno-legal barriers</i>	138
<i>Conflicts and correspondences between hacking and law</i>	141
5 Hacking's interactions with law	168
<i>Perceptions and attitudes of hackers toward law and authority</i>	168
<i>Problem with authority</i>	168
<i>Trouble with the law</i>	170
<i>Legal and extra-legal means</i>	173
<i>Presence rather than the absence of law</i>	175

<i>Know the law more</i>	176
<i>Greater access to law and legal assistance</i>	178
<i>Hackers' responses to law</i>	179
<i>Ignore and avoid</i>	180
<i>Change and resist</i>	181
<i>Legal change through hacking</i>	181
<i>Hacking electronic voting computers</i>	183
<i>Leaktober</i>	186
<i>Hacking the OV-chipcard</i>	187
<i>Work with, use and adapt</i>	191
<i>Net neutrality rules</i>	191
<i>Open source projects</i>	194
<i>Complex relations and reactions</i>	196

6	Normative conclusions and areas of law reform	207
	<i>Normative implications</i>	207
	<i>Hackers as technical, social and legal actors</i>	207
	<i>Resolving conflicts by building on commonalities</i>	208
	<i>Support and reach out to hackers</i>	209
	<i>Responsible disclosure</i>	209
	<i>Responsible disclosure rules</i>	209
	<i>Hackers' reactions</i>	212
	<i>Changing attitudes, changing laws</i>	214
	<i>Open data</i>	216
	<i>Policies and initiatives</i>	216
	<i>Hackathons</i>	217
	<i>Change and improve the law</i>	220
	<i>Computer crime laws</i>	220
	<i>Hacking as a legitimate and common activity</i>	220
	<i>Essential requirement of criminal intent</i>	221
	<i>Intellectual property laws</i>	224
	<i>Three-step test as akin to fair use</i>	224
	<i>Three-step test plus</i>	227
	<i>Anti-circumvention and contract laws</i>	229
	<i>More limitations and exceptions to anti-circumvention</i>	229
	<i>Necessary nexus between circumvention and copyright infringement</i>	230
	<i>No contractual waivers of limitations and exceptions</i>	232

<i>Rights of users</i>	233
<i>Hacking can be change for good</i>	235
 <i>Appendix: research methods</i>	 247
<i>Bibliography</i>	250
<i>Index</i>	273
