Chapter 1 Introduction 1

Chapter 2 Technology 5

2.1 Definition of Technology 5
2.2 Generation of New Technologies..... 6
2.3 The Model of Technology 10
2.4 The Structure of Technology 11
 2.4.1 Technological Space..... 13
 2.4.2 Technological Landscape 14
 2.4.3 Space of Technologies 17
2.5 Technological Processes..... 18
 2.5.1 Externality Effects..... 18
 2.5.2 Intranality Effects 19
 2.5.3 Ramification of Technologies..... 20
 2.5.4 The Spandrel Effect 21
 2.5.5 Velocity of Innovation..... 23
 2.5.6 The Red Queen Regime 24
 2.5.7 Transfer of Technology and Know-how 25
 2.5.8 Model of Technology and Patents..... 27
2.6 The Stages of the Innovation Process 27
 2.6.1 The Generation of Innovative Ideas..... 30
 2.6.1.1 Individual generation 30
 2.6.1.2 Generative relations..... 31
 2.6.1.3 Environment for generation of innovative
 ideas 32
 2.6.2 Feasibility, Development, and Industrialization..... 34
 2.6.2.1 Feasibility studies 35
 2.6.2.2 Development studies 35
 2.6.2.3 Industrialization 35
 2.6.3 Use of the Technology 35
2.7 Risk and Uncertainty of the Innovation Process 35
References..... 37

Chapter 3	Organizational Structures.....	39
3.1	Organizational Structures for Innovation.....	39
3.2	The R&D Organizational System.....	41
3.2.1	Dynamics of R&D Activity.....	42
3.2.2	Fluxes of Knowledge and Capitals in the R&D Model	45
3.2.2.1	Generation of innovative ideas	45
3.2.2.2	Elaboration of R&D project proposals.....	45
3.2.2.3	Financing R&D projects	46
3.2.3	Role of the General Knowledge Generated by R&D Activity.....	46
3.2.4	Interface between R&D Activity and Scientific Research	50
3.2.5	Interface between R&D Activity and the Socio-economic System.....	52
3.2.5.1	Endogenous vs. Imported Technologies.....	52
3.2.5.2	Private vs. Public R&D Investments	53
3.2.6	Mathematical Simulation of the R&D Process	53
3.3	The Start-up – Venture Capital System	56
3.3.1	Start-up Description	57
3.3.1.1	Start-ups generation and development	57
3.3.1.2	Development of the model of business	58
3.3.1.3	Commercial development.....	58
3.3.1.4	Structures and organizations promoting start-ups	59
3.3.2	Venture Capital Description	60
3.3.2.1	Structure of VC system.....	60
3.3.2.2	Strategy of VC financing.....	61
3.3.2.3	Crowdfunding	62
3.3.3	The Startup – Venture Capital Cycle.....	62
3.3.4	Difference between Industrial R&D System and SVC System	64
3.4	The Industrial Platform System.....	67
3.4.1	General Characteristics of a Platform.....	68
3.4.2	General Characteristics of an Industrial Platform.....	71
3.4.3	Suitability of Various Technological Fields for Industrial Platforms.....	73
3.4.3.1	Synthetic biology.....	73
3.4.3.2	Nanotechnologies.....	74
3.4.3.3	Green technologies	75

3.5	Possible Evolution of the Various Organizational Structures	75
	References.....	78
Chapter 4	Applications of Technology Dynamics.....	81
4.1	Technology Dynamics and the Innovation Process.....	81
4.1.1	Generation of Innovative Idea for the Technological Innovation Process	81
4.1.2	Development of the Innovative Idea to the Formation of a New Technology	81
4.1.3	Generation of Innovations during the Use of a Technology	82
4.2	Technology Dynamics and Statistical Studies.....	82
4.2.1	Research and Innovation Studies	83
4.2.2	R&D Investments and Growth	86
4.2.3	Patent Studies	88
4.2.3.1	Relation between scientific research and patents	89
4.2.3.2	Patent values distribution	89
4.2.3.3	Generation of patents from scientific research	90
4.3	Technology Dynamics and Promotion of Innovation	92
4.3.1	Actions for the Generation of Innovative Ideas	93
4.3.2	Actions for the Feasibility Step	93
4.3.3	Actions for the Development and Industrialization Steps	94
4.3.4	Actions during the Use of the Technology	94
4.3.5	Promotion of Technology Innovation in SMEs.....	94
4.3.6	Possible Evolutions of Cooperation in Production Technologies	95
	References.....	96
Chapter 5	Conclusions.....	97
Appendix 1	Mathematical Model of Technology	99
Appendix 2	Mathematical Simulation of the R&D Process	113
Appendix 3	Mathematical Simulation of the SVC Cycle	125
Index.....		131
