

About This Book	v
Chapter 1: Introduction to SAS.....	1
Introduction.....	1
SAS Versus R	1
SAS Interfaces	4
SAS Studio Interface	6
Accessing Data in SAS Libraries.....	8
Writing a Program in SAS Studio	9
Using Tasks.....	13
Using Snippets	15
Calling R from SAS	18
Exercises.....	20
Solutions.....	21
Chapter 2: Importing and Reporting Data.....	23
Introduction.....	23
Manual Data Entry with the DATA Step	23
Importing Data.....	26
Reporting Data	29
Enhanced Reporting.....	32
Exercises.....	38
Solutions.....	40
Chapter 3: Creating New Variables, Functions, and Data Sets.....	41
Introduction.....	41
Creating New Variables.....	41
Creating and Using Functions	46
Subsetting Data.....	54
Concatenating Data Sets.....	56
Match-Merging Data Sets.....	59
Exercises.....	62
Solutions.....	67
Chapter 4: Random Number Generation and Plotting	71
Introduction.....	71
DO Loop and Random Number Generation	71
Single-Cell Plotting with PROC SGPLOT	77
Multi-Cell Plotting with Procedures and Statements.....	82
Exercises.....	88
Solutions.....	94
Chapter 5: Descriptive Procedures, Output Delivery System, and Macros.....	103
Introduction.....	103
Summary Statistics Procedures	104
Output Delivery System.....	110

Creating Macro Variables	113
Creating Global Macro Variables	116
Creating Macro Programs	118
Macro Statements: An Example	122
Exercises	125
Solutions	131
Chapter 6: Analyzing the Data via Inferential Procedures	141
Introduction	141
Linear Models	141
Generalized Linear Models	155
Mixed Models	160
Other Procedures	165
Exercises	170
Solutions	178
Chapter 7: Interactive Matrix Language (IML)	195
Introduction	195
The Basics of IML	195
Modules and Subroutines	201
Call SAS Data Sets and Procedures	212
Simulations	216
Exercises	221
Solutions	228
Chapter 8: A Bridge Between SAS and R	237
Introduction	237
Calling SAS from IML	238
Calling R from Base SAS Java API	241
Calling R from SAS Enterprise Miner	244
Exercises	248
Solutions	249
