

Contents

1	Introduction	1
1.1	Definition of a Glass	3
1.2	The Enthalpy/Temperature Diagram	3
1.3	Exercises	6

2	Principles of Glass Formation	7
2.1	Introduction	7
2.2	Structural Theories of Glass Formation	8
2.3	Kinetic Theories of Glass Formation	11
2.4	Determination of Glass Forming Ability And Glass Stability	21
2.5	Summary	25
2.6	Exercises	25

3	Glass Melting	27
3.1	Introduction	27
3.2	Raw Materials	27
3.3	Compositional Nomenclature	31
3.4	Batch Calculations	33
3.5	Mechanisms of Batch Melting	36
3.6	Fining of Melts	41

Introduction to Glass Science and Technology: 3rd edition

By James E. Shelby

© James E. Shelby 2021

Published by the Royal Society of Chemistry, www.rsc.org

3.7	Homogenizing of Melts	48
3.8	Specialized Melting Methods	49
3.9	Summary	49
3.10	Exercises	50

4 Immiscibility/Phase Separation 52

4.1	Introduction	52
4.2	Thermodynamic Basis for Phase Separation	53
4.3	Mechanisms for Phase Separation	56
4.4	Immiscibility in Glass Forming Systems	59
4.5	Determination of Immiscibility Diagrams	63
4.6	Application of Immiscibility Diagrams	65
4.7	Summary	72
4.8	Exercises	73

5 Structures of Glasses 74

5.1	Introduction	74
5.2	Fundamental Law of Structural Models	76
5.3	Elements of Structural Models for Glasses	77
5.4	Structural Models for Silicate Glasses	83
5.5	Structural Models for Borate Glasses	96
5.6	Structural Models for Germanate Glasses	104
5.7	Structural Models for Phosphate Glasses	107
5.8	Structures of Other Inorganic Oxide Glasses	108
5.9	Halide Glasses	109
5.10	Chalcogenide Glasses	111
5.11	Organic Glasses	112
5.12	Amorphous Metals	113
5.13	Exercises	113

6 Viscosity of Glass Forming Melts 115

6.1	Introduction	115
6.2	Viscosity Definitions and Terminology	115
6.3	Viscoelasticity	119
6.4	Viscosity Measurement Techniques	121

6.5	Temperature Dependence of Viscosity	124
6.6	Compositional Dependence of Viscosity	128
6.7	Effect of Thermal History on Viscosity	136
6.8	Effect of Phase Separation on Viscosity	138
6.9	Effect of Crystallization on Viscosity	139
6.10	Summary	140
6.11	Exercises	140

7 Density and Thermal Expansion 143

7.1	Introduction	143
7.2	Terminology	143
7.3	Measurement Techniques	146
7.4	Density and Molar Volume	148
7.5	Thermal Expansion Behavior	157
7.6	Summary	167
7.7	Exercises	167

8 Transport Properties 169

8.1	Introduction	169
8.2	Fundamentals of Diffusion	169
8.3	Ionic Diffusion	172
8.4	Ion Exchange	174
8.5	Ionic Conductivity	175
8.6	Chemical Durability	183
8.7	Weathering	186
8.8	Gas Permeation and Diffusion	187
8.9	Diffusion-controlled Reactions	191
8.10	Summary	193
8.11	Exercises	193

9 Mechanical Properties 195

9.1	Introduction	195
9.2	Elastic Modulus	195
9.3	Hardness	197
9.4	Fracture Strength	198

9.5	Fatigue of Glasses	203
9.6	Thermal Shock	204
9.7	Annealing of Thermal Stresses	206
9.8	Summary	207
9.9	Exercises	207

10 Optical and Magnetic Properties 209

10.1	Introduction	209
10.2	Bulk Optical Properties	210
10.3	Ultraviolet Absorption	215
10.4	Visible Absorption	216
10.5	Infrared Absorption	223
10.6	Other Optical Properties of Glasses	226
10.7	Magnetic Glasses	227
10.8	Summary	230
10.9	Exercises	231

11 Water in Glasses and Melts 232

11.1	Introduction	232
11.2	Effect of Water on the Infrared Spectra	232
11.3	Formation of Hydroxyl	236
11.4	Diffusion and Solubility of Water in Glasses and Melts	238
11.5	Effect of Water on the Properties of Glasses	242
11.6	Summary	245
11.7	Exercises	246

12 Thermal Analysis of Glasses 247

12.1	Introduction	247
12.2	Differential Scanning Calorimeters	247
12.3	Glass Transformation Temperatures	249
12.4	Fictive Temperatures	251
12.5	Specific Heat Measurements	252
12.6	Crystallization	254
12.7	Viscosity	256

12.8	Summary	258
12.9	Exercise	258

13 Glass Technology 259

13.1	Introduction	259
13.2	Classical Forming Methods	259
13.3	Specialized Forming Methods	265
13.4	Summary	271

14 Compositions and Properties of Commercial Glasses 272

14.1	Introduction	272
14.2	Vitreous Silica	273
14.3	Soda-Lime-Silica Glasses	274
14.4	Borosilicate Glasses	276
14.5	Glass Fibers	278
14.6	Television Tube Glasses	279
14.7	Glass-ceramics	281
14.8	Other Commercial Glasses	284
14.9	Summary	284

15 Doped Vitreous Silica 285

15.1	Introduction	285
15.2	"Undoped Silica"	285
15.3	Anion Dopants	286
15.4	Cation Dopants	289
15.5	Summary	297
15.6	Exercises	297

16 Oxyhalide Glasses 298

16.1	Introduction	298
16.2	Glasses Containing Lead Compounds	298

16.3	Halides in Calcium Aluminate and Aluminosilicate Glasses	300
16.4	Alkali Haloborate Glasses	300
16.5	Potassium Fluorogermanate Glasses	302
16.6	Stannous Fluorophosphate Glasses	302
16.7	Summary	302

Bibliography	303
