

Content

A.	Global indicators	1
A.1.	Global production.....	1
A.2.	Energy consumption.....	5
A.3.	Emission indicators	6
A.4.	Potential of biomass	8
	Partial conclusions A.....	11
B.	Agglomeration process.....	14
B.1.	Preparation of agglomeration mixture.....	14
B.1.1.	Homogenisation of mixture.....	14
B.1.2.	Pre-pelletisation of mixture	16
B.2.	Sintering of agglomerate	17
B.2.1.	Nature and principle of sintering.....	18
B.2.2.	Impact of selected parameters on the emission profile.....	24
B.2.3.	Fuels in agglomeration process	28
C.	Study of the use of biomass in the agglomeration process.....	33
C.1.	Characteristics of biomass – general knowledge.....	34
C.2.	Study on impact of adding biomass to the agglomeration mixture	39

C.2.1.	Treatment of biomass	39
C.2.2.	Selected properties of tested biomass.....	42
C.2.3.	Microstructural analysis of biomass	51
C.2.4.	Raman and infrared spectroscopic analysis.....	53
C.2.5.	Burning and thermal stability of biomass.....	57
C.3.	Modelling of agglomeration process.....	64
C.3.1.	Thermodynamic analysis of sintering using biomass.....	64
C.4.	Impact of biomass on agglomeration process	81
C.4.1.	Ecological aspects of the biomass use.....	96
Conclusion.....		103
