

Energy Conservation in Glass Manufacture

<i>Stanislav Kasa, František Novotný</i> <i>ICT Prague, Department of Glass and Ceramic, the Czech Republic</i> Decreasing of Energy Consumption by Batch Melting	8
<i>Lubomír Němec, Marcela Jebavá</i> <i>ICT Prague, Department of Glass and Ceramic, the Czech Republic</i> Analysis of Energetic Performance of Glass Melting Processes as a Basis for Advanced Glass Production	9
<i>Frantisek Voldrich</i> <i>The Czech Republic</i> Possibilities of Energy Consumption Reduction in the Course of Glass Annealing	10
<i>Nicola J. Marriott</i> <i>Calumite Ltd, UK</i> Reduce Furnace Energy Consumption Using Calumite	11
<i>Neil Simpson</i> <i>Eclipse Incorporated, USA</i> Burners for Glass Melting Furnaces	12
<i>Petr Schill</i> <i>Glass Service, the Czech Republic</i> Energy Savings and Glass Quality Improvement by Mathematical Modelling and Advanced Furnace Control	13
Technological Innovations in Glass Manufacture	
<i>Ferdinand Trier, Ulrich Ranke</i> <i>Laboratory of measurement Technique, Fachhochschule München, Germany</i> The Glass Surface and Ways of its Modification	14
<i>Martin Hehl- Heinz</i> <i>Marabuwerke GmbH & Co. KG, Germany</i> Advanced Technologies for Glass Decoration	15
<i>Daniel Hilfiker</i> <i>Pneumofore, Italy</i> Benefits of Vacuum in Bottle Production	16
<i>Christopher Couderc</i> <i>Johnson Matthey – Noble Metals, UK</i> Iridium – Metal for the 21st Century	17

<i>Emre Tacir</i> <i>Merkad, Turkey</i> Reverse Engineering in Glass Mould Engraving Design	18
<i>Hans Mahrenholtz</i> <i>Linde AG , OGIS GmbH, Germany</i> Online Glass Engineering	19
<i>Jean-Luc Logel</i> <i>IRIS Inspection Machines, France</i> Latest Vision Technologies Offer News Horizons for Hollow Ware Inspection	20
<i>Klaus Poeting</i> <i>Waltec Maschinen GmbH, Germany</i> WALTEC'S Triple Gob Production Line for Press Ware, Ultimate Reply to Challenges of Market	21
Added papers from universities	
<i>Aleš Helebrant, Lubomír Němec, ICT Prague, Department of Glass and Ceramic, Laboratory of Inorganic Materials, the Czech Republic</i> About Department of Glass and Ceramics, ICT Prague and Laboratory of Inorganic Materials	22
<i>František Novotný, Ivo Matoušek, Marcel Horák, Vlastimil Hotař, Department of Glass Producing Machines and Robotics, Technical University of Liberec, the Czech Republic</i> Application of Computer Simulation in Automatic Glass Producing	24
<i>Ivo Matoušek, epartment of Glass Producing Machines and Robotics, Technical University of Liberec, the Czech Republic</i> Computer Modelling and Optimisation of Glass Forming Cycle	25
<i>František Novotný, Marcel Horák, Department of Glass Producing Machines and Robotics, Technical University of Liberec, the Czech Republic</i> Robotic Handling with Flat Glass	26
<i>Vlastimil Hotař, Adam Hotař, Department of Glass Producing Machines and Robotics, , Technical University of Liberec, the Czech Republic</i> Surface Profile Evaluation Using Statistic Tools and Fractal Dimension	27
