## PART I INTRODUCTION TO THE BOOK

|   |       |
|---|-------|
| Summary                                   | PI.02 |
| Markets and Other Considerations          | PI.03 |
| Innovation and the Social Contract Theory | PI.07 |
| Conclusion                                | PI.11 |

### 1. Introduction to Economics

|   |       |
|---|-------|
| The Basic Principles of Economics         | 1.05  |
| Supply and demand                         | 1.05  |
| Incentives and disincentives              | 1.18  |
| Market structures                         | 1.21  |
| Market failure                            | 1.28  |
| Costs and benefits                        | 1.32  |
| Money and time                            | 1.34  |
| Risk and uncertainty                      | 1.38  |
| Innovation and growth                     | 1.41  |
| Economics as a Discipline                 | 1.46  |
| A social science                          | 1.46  |
| Economics in practice                     | 1.50  |
| Economic Analysis and Research Techniques | 1.54  |
| Theoretical tools                         | 1.57  |
| Empirical models                          | 1.68  |
| Evidence-based Policy                     | 1.84  |
| Further Underlying Concepts in Economics  | 1.92  |
| Approaches to Economic Analysis           | 1.95  |
| Conclusion                                | 1.103 |

### 2. Economics of Intellectual Property

|                         |      |
|-------------------------|------|
| Economic Theories of IP | 2.03 |
| Social contract theory  | 2.12 |

|   |      |
|---|------|
| Interaction with other theories   | 2.24 |
| IP laws as innovation policy  | 2.29 |
| Economics of Innovation   | 2.30 |
| Economic analysis and IP policy   | 2.43 |
| Theory-based analysis   | 2.51 |
| Case Studies: Economic Analysis   | 2.55 |
| Academic example: Investigating the relationship<br>between advertising bans and tobacco consumption  | 2.56 |
| Policy example: European Commission's impact assessment<br>of exceptions and limitations to copyright | 2.63 |
| Comparison of economic policy reports and academic papers   | 2.70 |
| Conclusion  | 2.74 |

## PART II ECONOMICS OF INDIVIDUAL PROPERTY RIGHTS

|  |        |
|--|--------|
| Summary: Patents                                   | PII.02 |
| Copyright  | PII.05 |
| Trade Marks  | PII.07 |
| Design Rights                                      | PII.09 |
| Trade Secrets                                      | PII.10 |
| Traditional Knowledge and Geographical Indications | PII.11 |
| Competition  | PII.13 |
| Conclusion   | PII.14 |

### 3. Patents

|   |      |
|---|------|
| Economic Constructs of Patents  | 3.04 |
| Patents as an innovation lever  | 3.06 |
| Cumulative innovation   | 3.14 |
| Knowledge diffusion   | 3.18 |
| Patent costs  | 3.20 |
| Strategic use of patents  | 3.23 |
| Non-practising entities   | 3.26 |
| Business model patents and the scope of patentability   | 3.34 |
| Patent thickets   | 3.35 |
| Development and Global Health—Questions on Generics,<br>Pharmaceuticals, and Developing Countries | 3.40 |
| Development and global health   | 3.43 |
| Economics of drug development   | 3.47 |

---

|   |      |
|---|------|
| Diseases of poverty and neglected diseases  | 3.51 |
| Potential solutions   | 3.55 |
| Generics  | 3.61 |
| Extended patent life: Supplementary Protection Certificates,<br>branding, and pay for delay | 3.65 |
| International Systems: Patent Harmonization, Cooperation,<br>and Convergence                | 3.69 |
| Harmonization   | 3.71 |
| Impact of harmonization   | 3.75 |
| The Unitary Patent: Unification and Convergence<br>of European Patent Law                   | 3.81 |
| Conclusion  | 3.89 |
| <b>4. Economics of Copyright</b>  |      |
| Economic Rationale  | 4.02 |
| The Creative Industries   | 4.05 |
| Empirical Evidence  | 4.10 |
| Examples  | 4.13 |
| Licensing: Collecting Societies, Copyright Tribunals,<br>Public Domain, and Territoriality  | 4.20 |
| Collecting societies  | 4.23 |
| Copyright tribunals   | 4.33 |
| Limits to Copyright: Public Domain and Exceptions   | 4.36 |
| Copyright expiration  | 4.41 |
| Licensing, limitations, and exceptions  | 4.46 |
| Embracing Digital: Copyright Challenges in<br>the Digital Era                               | 4.60 |
| Changing business models  | 4.62 |
| Porter's Five Forces  | 4.68 |
| In context: Exceptions and territoriality in<br>the EU digital single market                | 4.71 |
| Conclusion  | 4.76 |
| <b>5. Trade Marks and Design Rights</b>   |      |
| Trade Marks   | 5.02 |
| Innovation and Trade Marks  | 5.04 |
| Economics of Trade Marks: Information and Signalling  | 5.13 |
| Further considerations of signalling by firms   | 5.17 |
| Free-riding   | 5.20 |

|   |      |
|---|------|
| Economics of Trade Marks: Policy Debates  | 5.22 |
| Genericization  | 5.23 |
| Grey goods and parallel imports   | 5.25 |
| Trade mark registers—cluttering, absolute grounds, proof of use,<br>and squatting | 5.31 |
| Domain names and trade marks  | 5.42 |
| Counterfeiting and Status Goods   | 5.46 |
| Trade Marks Conclusion  | 5.53 |
| Design Rights   | 5.54 |
| Design and industrialization  | 5.56 |
| Use of design rights  | 5.68 |
| Measuring design and impact   | 5.72 |
| <b>6. Trade Secrets and Other Rights</b>  |      |
| Trade Secrets   | 6.02 |
| Innovation and Importance   | 6.06 |
| Trade Secrets and IP Strategies   | 6.15 |
| Trade secrets and patents   | 6.16 |
| Patents, policy, and trade secrets  | 6.22 |
| Cost–benefit analysis   | 6.24 |
| Trade Secrets, Copyright, and Other Rights  | 6.28 |
| Trade secrets and copyright   | 6.29 |
| Trade secrets, trade marks, and design rights                                     | 6.31 |
| Empirical Analysis and Evidence   | 6.34 |
| Further considerations  | 6.39 |
| Geographical Indications  | 6.43 |
| Introduction  | 6.44 |
| Economic impacts for producers  | 6.49 |
| Economic impacts for consumers  | 6.57 |
| Further considerations  | 6.60 |
| Other Rights  | 6.66 |
| Plant breeders' rights  | 6.66 |
| Traditional knowledge   | 6.71 |
| Other <i>sui generis</i> rights   | 6.75 |
| Conclusion  | 6.78 |
| <b>7. Competition and Intellectual Property</b>                                   |      |
| Economics of Competition  | 7.02 |
| Benefits of competition   | 7.03 |

|   |      |
|---|------|
| Structure, Conduct, and Performance       | 7.07 |
| Structure                                 | 7.09 |
| Conduct                                   | 7.21 |
| Performance                               | 7.41 |
| Firms granted monopolies                  | 7.45 |
| Specific Competition Issues Related to IP | 7.49 |
| Market                                    | 7.50 |
| Behaviour                                 | 7.53 |
| Performance                               | 7.71 |
| Conclusion                                | 7.75 |

PART III HOW, WHY, AND  
WHEN INTELLECTUAL PROPERTY  
DELIVERS VALUE

|         |         |
|---------|---------|
| Summary | PIII.01 |
|---------|---------|

**8. How Intellectual Property Delivers Value**

|  |      |
|--|------|
| Why IP Value Matters                               | 8.01 |
| How Does IP Value Arise?                           | 8.09 |
| Direct income                                      | 8.11 |
| Indirect income                                    | 8.17 |
| Trading value (sharing and swapping)               | 8.22 |
| Sales value  | 8.24 |
| Increased profitability                            | 8.26 |
| Tax efficiency                                     | 8.32 |
| Licensing and franchising                          | 8.36 |
| Blocking value                                     | 8.40 |
| Influence and reputational enhancement             | 8.44 |
| Security value                                     | 8.47 |
| Seed funding                                       | 8.50 |
| Business valuation outside the acquisition context | 8.53 |
| Exit value enhancement on business sale            | 8.55 |
| How Much Value Arises?                             | 8.60 |
| Market values                                      | 8.61 |
| Cost calculations                                  | 8.65 |
| Income   | 8.69 |
| Conclusion   | 8.73 |

|   |       |
|---|-------|
| <b>9. When Intellectual Property Adds Value</b>   |       |
| Buying and Selling IP vs. Buying and Selling a Company                                      | 9.06  |
| Fundraising—Equity, Debt, and Grant   | 9.16  |
| Equity  | 9.18  |
| Debt  | 9.22  |
| Grant   | 9.29  |
| Licensing   | 9.33  |
| Litigation and Damages  | 9.39  |
| Company Administration and Liquidation  | 9.46  |
| Tax Benefits  | 9.54  |
| Patent box  | 9.58  |
| R&D tax credits   | 9.72  |
| Other tax planning strategies   | 9.80  |
| Conclusion  | 9.88  |
| <br><b>10. Determinants of Intellectual Property Value</b>                                  |       |
| Is there a ‘Hierarchy’ of IP Rights Value?  | 10.04 |
| Duration of protection  | 10.10 |
| Geographical extent of protection   | 10.14 |
| Strength of protection  | 10.17 |
| Ability to detect infringement  | 10.20 |
| Cross-sector applicability  | 10.23 |
| Transferability between businesses  | 10.28 |
| ‘Genuine’ uniqueness  | 10.31 |
| Ability to keep a secret  | 10.40 |
| IP Valuation Standards  | 10.44 |
| Business vs. IP Valuation   | 10.51 |
| The ‘top down’ approach   | 10.53 |
| The ‘bottom up’ approach  | 10.57 |
| Conclusion  | 10.64 |
| <br><b>11. Intellectual Property and Intangibles Valuation Methodologies and Techniques</b> |       |
| Underlying Concepts   | 11.09 |
| Discounted cash flow  | 11.09 |
| ‘Rules of thumb’  | 11.15 |
| Market Comparables as a Valuation Method  | 11.21 |

|   |       |
|---|-------|
| Cost as a Valuation Method  | 11.33 |
| Income as a Valuation Method  | 11.42 |
| Relief from royalty   | 11.49 |
| Capitalization of profits   | 11.53 |
| Excess earnings   | 11.56 |
| Profit premium or differential  | 11.59 |
| Techniques Applied to Early Stage Technologies:<br>‘Probabilistic’ and Option-based Methods | 11.64 |
| Liquidation Value   | 11.75 |
| Valuing All or Part of a Company’s IP and Intangibles                                       | 11.82 |
| Conclusion  | 11.87 |
| <br><b>12. Reporting and Accounting for Intellectual Property<br/>and Intangibles</b>       |       |
| The Balance Sheet Issue   | 12.01 |
| The role of accounting  | 12.04 |
| The challenge presented by IP and other intangible assets                                   | 12.11 |
| Accounting and Reporting Rules  | 12.19 |
| IAS 38: bringing (some) intangibles onto<br>the balance sheet (sometimes)                   | 12.19 |
| Where this leaves IP and intangibles  | 12.35 |
| IFRS 3: creating value from thin air?   | 12.42 |
| FRS 102 and the new UK GAAP   | 12.53 |
| Integrated reporting: Into the future?  | 12.58 |
| Conclusion  | 12.64 |
| <br><b>Conclusion</b>   |       |
| The Importance of Economics of IP   | 255   |
| The Future of Economics of IP   | 255   |
| Concluding Remarks  | 256   |
| <br><i>Bibliography</i>   | 257   |
| <i>Cases and Legislation</i>  | 267   |
| <i>Index</i>  | 269   |
