

TABLE OF CONTENTS

UNIT 1 Introducing Physical Geography 1

- Geography 2
- Physical Geography and the Scientific Method 4
- Systems and Models in Physical Geography 5
- Geographic Magnitude 11

PART ONE A Planetary Perspective

UNIT 2 The Planet Earth 14

- Earth's Shape and Size 15
- Spheres of the Earth System 16
- Earth's Hemispheres 19
- Continents and Oceans 20

UNIT 3 Mapping Earth's Surface 27

- Location on Earth 28
- Depicting Earth: Map Projections 30
- Map Interpretation: Isolines 34
- Evolving Cartographic Technology 38

UNIT 4 Earth–Sun Relationships 44

- Earth's Planetary Motions 45
- Seasonality 46
- Insolation and Its Variation 49

UNIT 5 Radiation and the Heat Balance of Planet Earth 55

- Energy and Heat Transfer 56
- Global Energy Balance 58
- Making Sense of Global Energetics 64

PART TWO Atmospheric and Oceanic Processes

UNIT 6 Composition and Structure of the Atmosphere 68

- Atmospheric Constituents 69
- The Origin, Evolution, and Maintenance of the Atmosphere 70
- Contents and Arrangement of the Atmosphere 73
- The Layered Structure of the Atmosphere 79

UNIT 7 Temperatures of the Lower Atmosphere 85

- What Is Temperature? 86
- Temperature in the Troposphere 87
- The Horizontal Distribution of Temperature 91

UNIT 8 Air Pressure and Winds 97

- Atmospheric Pressure 98
- Air Movement in the Atmosphere 99
- Large-Scale Wind Systems 102
- Small-Scale Wind Systems 103

UNIT 9 Circulation Patterns of the Atmosphere 108

- A Model of the Surface Circulation 109
- The Actual Surface Circulation Pattern 111
- Secondary Surface Circulation: Monsoonal Wind Flows 115
- Circulation of the Upper Atmosphere 117

UNIT 10 Circulation of the World Ocean 121

- The Coupled Ocean–Atmosphere System 122
- Generation of Ocean Currents 123
- Wind-driven Flow 124
- The Geography of Ocean Currents 126
- El Niño–Southern Oscillation 129

UNIT 11 Atmospheric Moisture and the Water Balance 134

- The Physical Properties of Water 135
- Measuring Water Vapor 135
- The Hydrologic Cycle 136
- Evaporation 138
- Condensation and Clouds 141
- Precipitation 142
- The Surface Water Balance 145

UNIT 12 Precipitation, Air Masses, and Fronts 150

- Air Masses in the Atmosphere 151
- Lifting Mechanisms That Produce Precipitation 151

UNIT 13 Weather Systems 164

- Low-Latitude Weather Systems 165
- Weather Systems of the Middle and Higher Latitudes 171
- Energy and Moisture Within Weather Systems 174

PART THREE Climate and Climate Change

- UNIT 14 Climate Classification and Regionalization** 180
- Classifying Climates 181
 - The Köppen Climate Classification System 182
 - The Size and Regional Distribution of Climate Types 184
 - Extent and Boundaries of Climate Regions 189
- UNIT 15 Tropical (A) and Arid (B) Climates** 191
- The Major Tropical (A) Climates 192
 - The Major Arid (B) Climates 197
- UNIT 16 Mild Midlatitude (C) Climates** 204
- The Perpetually Moist (Cf) Climates 205
 - The Dry-Summer (Cs) Climates 211
 - The Dry-Winter (Cw) Climates 213
- UNIT 17 Higher-Latitude (D, E) and High-Altitude (H) Climates** 216
- The Major Severe Midlatitude (D) Climates 217
 - The Polar (E) Climates 220
 - High-Altitude (H) Climates 223
- UNIT 18 Natural Climate Change** 229
- The Nature of Climatic Change 230
 - Climate Indicators 230
 - Climate Change Mechanisms and Feedbacks 232
 - Earth's Climate History 234
- UNIT 19 Global Warming and Human Impacts on Climate** 242
- Human Impact on Climate: Processes 243
 - Global Warming Observed: Temperature Change in the Industrial Period 244
 - Implicating Humans in Observed Global Warming 249
 - Future Human Impacts on Climate 251

PART FOUR The Biosphere

- UNIT 20 Biogeochemical Cycles** 260
- Building Blocks of Life 261
 - Soil and Vegetation: A Critical Interface 262
 - The Global Carbon Cycle 263
 - The Global Nitrogen Cycle 265
- UNIT 21 Formation of Soils** 271
- The Formation of Soil 273
 - Soil Profiles 276
 - Soil Regimes 278
- UNIT 22 Properties of Soil** 281
- Sol and Ped 282
 - Physical Properties of Soil 282
 - Chemical Properties of Soil 285
 - Soils of Hills and Valleys 286
 - Development of the Soil System 287
- UNIT 23 Classification and Mapping of Soils** 290
- Classifying Soils 291
 - Soil Taxonomy 291
- UNIT 24 Biogeographic Processes** 305
- Dynamics of the Biosphere 306
 - Plant Succession 310
 - Geographic Dispersal 313
- UNIT 25 The Global Distribution of Plants** 319
- Biomes 320
 - Principal Terrestrial Biomes 324
- UNIT 26 Zoogeography: Spatial Aspects of Animal Populations** 331
- Emergence of Zoogeography 332
 - Range, Habitat, and Niche 334
 - Processes of Evolution 335
 - Earth's Zoogeographic Realms 337
 - Ecological Zoogeography and Conservation 339

PART FIVE The Restless Crust

UNIT 27 Minerals and Igneous Rocks 346

- Minerals 347
- Classification of Rock Types 350
- Igneous Rocks 350

UNIT 28 Sedimentary and Metamorphic Rocks 355

- Sedimentary Rocks 356
- Metamorphic Rocks 361
- The Rock Cycle 363

UNIT 29 Planet Earth in Profile: The Layered Interior 366

- Evidence of Earth's Internal Structure 367
- Earth's Internal Layers 368
- Earth's Outer Layers 370
- The Crustal Surface 372

UNIT 30 Plates of the Lithosphere 376

- Wegener's Hypothesis 377
- Plate Tectonics 378
- Movement of Plates 381

UNIT 31 Plate Movement: Causes and Effects 387

- The Mechanism of Plate Motion 388
- Isostasy 388
- Evolution of the Continents 392

UNIT 32 Volcanism and Its Landforms 397

- Distribution of Volcanic Activity 398
- Properties of Magma 399
- Volcanic Landforms 399
- Hot Spots 404
- Volcanoes and Human History 405
- Landscapes of Volcanism 407

UNIT 33 Earthquakes and Landscapes 410

- What Produces Earthquakes? 411
- Measuring Earthquake Strength 412
- Tsunamis 413
- Earthquake Damage 414
- Earthquake Distribution 415
- Earthquakes and Landscapes 418

UNIT 34 Faults, Folds, and Landscapes 421

- Terminology of Structure 422
- Faults 422
- Fold Structures 426
- Regional Deformation 429

PART SIX Sculpting the Surface: Weathering, Mass Movements, and Flowing Water

UNIT 35 The Formation of Landforms and Landscapes 432

- Processes That Shape Landforms and Landscapes 433
- Gravity, Slopes, and Relief 436
- Erosion and Tectonics 437

UNIT 36 Weathering Processes 440

- Mechanical Weathering 441
- Chemical Weathering 443
- Biological Weathering 446
- Geography of Weathering 446

UNIT 37 Mass Movements 449

- Slope Stability and Mass Movement 450
- Forms of Mass Movement 453
- The Importance of Mass Movements 457

UNIT 38 Water in the Lithosphere 460

- Water at the Surface 461
- Water Beneath the Surface 464
- Human Use of Groundwater 467

UNIT 39 Slopes and Streams 471

- Erosion of Slopes by Water 472
- Drainage Basins and Sediment Yields 473
- The Work of Streams 474
- The River as a System 480

UNIT 40 Landscapes Shaped by Stream Erosion 484

- Factors Affecting the Patterns of Stream Erosion 485
- Drainage Patterns 489
- Overcoming Geologic Structure 491
- Long-Term Evolution of the Landscape 492

UNIT 41 Landforms of the Fluvial System 496

Alluvial Fans 497
Landforms of River Valleys 498
Deltas 504

UNIT 42 Karst Processes and Landforms 508

Karst Development 509
Groundwater in Karst Regions 511
Karst Landforms and Landscapes 511
Karst and Caves 515

PART SEVEN Sculpting the Surface: Ice, Wind, and Coastal Processes

UNIT 43 Glacial Erosion and Deposition 520

Glaciers of the Past 522
The Glacier as a System 523
Glacial Movement and Erosion 525

UNIT 44 Landforms and Landscapes of Continental Glaciation 531

Ice Sheets Present and Past 532
North America's Glaciations 536
Landscapes Shaped by Continental Ice
Sheets 537
The Great Lakes and Their Evolution 541
Pluvial Lakes 542

UNIT 45 Landforms and Landscapes of Mountain Glaciers 544

Global Distribution of Mountain Glaciers
Today 545
Erosional Landforms of Mountain Glaciers 549
Depositional Landforms
of Mountain Glaciers 552

UNIT 46 Periglacial Environments and Landscapes 554

Permafrost 555
Geomorphic Processes in Periglacial
Environments 556
Landforms of Periglacial Regions 558
Understanding Periglacial Environments 560

UNIT 47 Wind as a Geomorphic Agent 562

Wind Erosion 563
Wind Transportation 564
Landforms Shaped by Wind 564
Erosional Landforms 565
Dunes 566
Loess 568

UNIT 48 Coastal Processes 572

Waves 573
Erosion and Transportation of Sediment by
Wave Action 575
Tides 578
Storms and Crustal Movements 580

UNIT 49 Coastal Landforms and Landscapes 583

Depositional Landforms 584
Erosional Landforms 587
Coastal Landscapes 589
Living Shorelines 591

APPENDIX SI and Customary Units and Their Conversions 593

PRONUNCIATION GUIDE 595
