Preface	vii
13 Introduction to Greedy Algorithms	1
13.1 The Greedy Algorithm Design Paradigm	1
13.2 A Scheduling Problem	4
13.3 Developing a Greedy Algorithm	6
13.4 Proof of Correctness	12
Problems	21
14 Huffman Codes	23
14.1 Codes	23
14.2 Codes as Trees	28
14.3 Huffman's Greedy Algorithm	32
*14.4 Proof of Correctness	41
Problems	49
15 Minimum Spanning Trees	52
15.1 Problem Definition	52
15.2 Prim's Algorithm	57
*15.3 Speeding Up Prim's Algorithm via Heaps	62
*15.4 Prim's Algorithm: Proof of Correctness	69
15.5 Kruskal's Algorithm	76
*15.6 Speeding Up Kruskal's Algorithm via Union-Find	81
*15.7 Kruskal's Algorithm: Proof of Correctness	91
15.8 Application: Single-Link Clustering	94
Problems	99
16 Introduction to Dynamic Programming	103
16.1 The Weighted Independent Set Problem	104
16.2 A Linear-Time Algorithm for WIS in Paths	108

16.3 A Reconstruction Algorithm	116
16.4 The Principles of Dynamic Programming	118
16.5 The Knapsack Problem	123
Problems	133
17 Advanced Dynamic Programming	137
17.1 Sequence Alignment	137
*17.2 Optimal Binary Search Trees	148
Problems	163
18 Shortest Paths Revisited	167
18.1 Shortest Paths with Negative Edge Lengths	167
18.2 The Bellman-Ford Algorithm	172
18.3 The All-Pairs Shortest Path Problem	185
18.4 The Floyd-Warshall Algorithm	187
Problems	198
Epilogue: A Field Guide to Algorithm Design	201
Hints and Solutions to Selected Problems	203
Index	211
