1. Why We Need an Holistic Innovation Policy: Goals, Problems, and Instruments	1
1.1 Introduction	1
1.2 The Unfinished Theoretical Foundations of Innovation Policy	4
1.3 What Goals? What Problems?	6
1.4 Instrument Choice and the Learning Policy-Maker	8
1.5 The Contents of This Book	10
2. Innovations: A Systems Activities Approach	15
2.1 Introduction	15
2.2 What Is an Innovation?	16
2.3 What Is an Innovation System?	20
2.4 Key Activities in Innovation Systems	24
2.5 Specification of the Activities in Systems of Innovation	27
2.5.1 Provision of Knowledge Inputs to the Innovation Process	27
2.5.2 Demand-Side Activities	30
2.5.3 Provision of Constituents for Systems of Innovation	32
2.5.4 Support Services for Innovating Firms	35
3. Innovation Policy: An Holistic and Problem-Based Approach	37
3.1 Introduction	37
3.2 Partial and Holistic Innovation Policies	39
3.3 All Innovation Policies Pursued Are Partial—Most of Them Are Linear	40
3.4 The Relations between Innovation Policy and Research Policy	42
3.5 Policy Problems and Additionality: Reasons for Policy Intervention	45
3.6 Objectives of Innovation Policy	48

## Contents

---

3.7 The Limits of Innovation Policy: Implementation and Policy-Created Problems	50
3.8 Next Steps	52
3.9 Concluding Remarks: The Holistic Innovation Policy Approach as an Analytical Framework	52
4. Knowledge Production and R&D	55
4.1 Introduction	55
4.2 Conceptual Underpinnings: Knowledge and R&D in the Innovation System	56
4.3 Four Problems in the Innovation System	60
4.3.1 Inadequate Levels of R&D Investment	60
4.3.2 Poor Complementarity of R&D Investment	61
4.3.3 High Levels of Uncertainty Inherent to Most R&D Activities	64
4.3.4 The Research Paradox and Low Levels of Social Rate of Return on Research	65
4.4 Recent Trends in Research Public Funding and Its Changing Policy Instruments	68
4.5 Development: The Crucial Little Brother	70
4.6 Research Universities: A Top-Down Revolution	72
4.7 Problems Generated by Policy Itself	75
4.7.1 Lack of Additionality and Crowding Out	76
4.7.2 Public R&D Support Does Not Promote Disruptive Knowledge	77
4.7.3 Unbalanced Public Support between Different Types of R&D	77
4.7.4 Focus on Quantity—Not Quality—of R&D	78
4.7.5 Undefined Goals of Public R&D Investment	79
4.8 Conclusions	80
5. Education, Training, and Skills Formation	83
5.1 Introduction	83
5.2 Conceptual Clarification and Definitions	84
5.3 Internal and External Sources of Competence	87
5.3.1 Internal Competences	90
5.3.2 External Competences	94
5.4 Policy Initiatives	96
5.4.1 Education Policy	96
5.4.2 Vocational Training Policy	97
5.4.3 Migration Policy	98
5.5 Obstacles and Barriers in the System and in Policy-Making	99
5.5.1 Insufficient Competence Levels	100

5.5.2 Time Lags	101
5.5.3 Imbalance between Internal and External Competences	102
5.6 Concluding Remarks: Policy Design for Competence-Building	103
6. Functional Procurement as Demand-Side Innovation Policy	106
6.1 Introduction	106
6.2 Innovations and Procurement: Definitions and Taxonomy	108
6.2.1 Innovation-Enhancing Procurement	109
6.2.2 Pre-Commercial Procurement	113
6.3 The Importance of Functional Specification for Innovation	115
6.4 Obstacles to Functional Procurement and Ways of Overcoming Them	117
6.4.1 Weakness of Public Organizations	118
6.4.2 Identification of Needs or Problems	118
6.4.3 Specification of Functions	118
6.4.4 Competence-Building in Procurers and Procurement Support	119
6.4.5 Risk and Risk Aversion	120
6.4.6 Lack of Interactive Learning and Procurement Regulation	121
6.5 The Pursuit of Functional Procurement as Innovation Policy in Sweden	121
6.6 The Implementation of Functional Procurement to Influence Innovation	125
6.7 Combinations of Different Types of Procurement	127
7. Change of Organizations: Entrepreneurship and Intrapreneurship	131
7.1 Introduction	131
7.2 Entrepreneurship and Intrapreneurship as Examples of Organizational Change	132
7.3 Definitions	135
7.4 Policy Instruments for Entrepreneurship and Intrapreneurship	139
7.5 Bottlenecks Associated with Entrepreneurship and Intrapreneurship	141
7.6 Concluding Remarks	144
8. Interaction and Networking	145
8.1 Introduction	145
8.2 Networks and Interactions in Innovation Systems	146
8.3 Diversity of Innovation Networks and Interactions	150
8.4 Networks Are Not Always Beneficial	154
8.5 Common Problems with Networking in Innovation Systems	156

8.6	Policy Instruments Fostering Innovation Interactions	159
8.7	Unintended Consequences of Policy: Inducing Three Forms of Lock-In	162
8.8	Conclusions for Innovation Policy Design	164
9.	Changing Institutions	166
9.1	Introduction	166
9.2	Institutions and Regulation in the Innovation System	167
9.3	Important Regulation Areas for Innovation	171
9.4	The Effects of Regulation and Innovation-Related Issues	173
9.5	Patent Regulations and Innovation	177
9.6	Environmental Regulations and Innovation	183
9.7	Conclusions: General Criteria for Designing Innovation Policy	185
10.	Public Financing of Early-Stage Innovations	187
10.1	Introduction	187
10.2	Rationales for Public Intervention in Innovation Funding	188
10.2.1	Lack (or Low Levels) of Private Funding in Early Stages	188
10.2.2	High Uncertainty and Risk	190
10.2.3	If Policy Is the Problem	191
10.3	Innovation Policy Instruments for Financing Innovations	193
10.3.1	Equity Programmes	194
10.3.2	Tax Incentives	194
10.3.3	Investment Regulations	195
10.3.4	Support to Business Angel Networks	196
10.3.5	Second-Tier Stock Markets	197
10.3.6	Other Instruments	197
10.4	Provision of Risk Capital by the Swedish State: An Example	198
10.4.1	Lack of Additionality in Swedish Public Risk Capital Provision	199
10.4.2	How to Achieve Public/Private Co-investments in Early Stages	203
10.4.3	The Transformation of Swedish Public Risk Capital Provision	204
10.5	Public Financing of Innovations: Some Conclusions	206
10.5.1	Lack of Additionality	207
10.5.2	Profit Demands and Relations between Public and Private Funding	208
10.5.3	How to Supply Risk Capital to Early-Stage Investment	209

10.5.4 Acceptance of Public Losses and Need for Cashing in Profits	210
10.5.5 The Relation between Public R&D Funding and Public Seed Funding	210
10.5.6 Public Seed Capital Should Become 'Intelligent'	211
11. The Choice of Innovation Policy Instruments	212
11.1 Introduction	212
11.2 The Choice of Instruments	213
11.3 Types of Policy Instrument and Instrument Mixes	215
11.4 Innovation Policy Instruments	218
11.5 Innovation Policy Problems, Instrument Mixes, and National Styles	221
11.6 The Politics of Innovation Policy Instruments	225
11.7 Conclusions: Innovation Policy Instruments and Mixes	227
12. Building the Theoretical Foundations for an Holistic Innovation Policy	229
12.1 Introduction	229
12.2 Theoretical Foundations for an Holistic Innovation Policy	229
12.2.1 Innovation Systems: The Systems Activities Approach	229
12.2.2 Holistic Innovation Policy	232
12.3 Identification of Policy Problems and Additionality	233
12.4 Some Obstacles and Barriers in Innovation Systems Characterized in This Book	236
12.5 The Choice of Policy Instruments	241
12.6 Agenda for Innovation Policy and Innovation Research	243
<i>Bibliography</i>	247
<i>Index</i>	277
