Preface.....	xxv
Acknowledgments.....	xxix
Author	xxxi

Chapter 1	Environmental Chemistry and the Five Spheres of the Environment	1
1.1	Earth and the Earth System.....	1
1.2	Biogeochemical Cycles in the Earth System.....	1
1.2.1	Oxygen Cycle	3
1.2.2	Nitrogen Cycle.....	3
1.2.3	Sulfur Cycle.....	3
1.2.4	Phosphorus Cycle	3
1.3	Natural Capital of the Earth System	4
1.4	What Is Environmental Chemistry?.....	5
1.4.1	Environmental Chemistry and the Spheres of the Earth System.....	6
1.5	Environmental Chemistry of Water and the Hydrosphere	6
1.5.1	Water Pollution.....	7
1.5.2	Water Treatment	8
1.6	Environmental Chemistry of Air and the Atmosphere	8
1.6.1	Atmospheric Chemistry	10
1.6.2	Air Pollution	11
1.7	Environmental Chemistry of the Geosphere.....	11
1.7.1	The Geosphere and Natural Capital.....	13
1.7.2	Soil.....	13
1.7.3	Chemical Composition of Soil	14
1.8	Environmental Chemistry of the Anthrosphere.....	14
1.8.1	Chemistry and the Anthrosphere	15
1.8.2	Industrial Ecology and Green Chemistry in the Anthrosphere	16
1.9	Environmental Chemistry of the Biosphere	17
1.9.1	Biomaterials from the Biosphere.....	19
1.9.2	Toxicological Chemistry and Biochemistry.....	20
1.9.3	Exposure to Toxic Substances	21
1.10	As We Enter the Anthropocene.....	21
1.10.1	Environmental Priorities for the Sustainocene	22
References		22
Further Reading.....		23
Questions and Problems		23

Chapter 2	The Hydrosphere and Water Chemistry.....	25
2.1	Water: An Essential Part of Earth's Natural Capital.....	25
2.2	Sources and Uses of Water	27
2.2.1	The Groundwater Crisis	28
2.3	H ₂ O: Simple Formula, Remarkable Molecule.....	29
2.4	Life in Water.....	31
2.5	Chemistry of Water	32

2.6	Gases in Water.....	33
2.6.1	Oxygen in Water.....	33
2.7	Water Acidity and Carbon Dioxide in Water	34
2.7.1	Carbon Dioxide in Water.....	35
2.8	Alkalinity	38
2.8.1	Contributors to Alkalinity at Different pH Values.....	39
2.8.2	Dissolved Inorganic Carbon and Alkalinity	40
2.8.3	Influence of Alkalinity on CO ₂ Solubility.....	40
2.9	Calcium and Other Metals in Water.....	41
2.9.1	Hydrated Metal Ions as Acids	41
2.9.2	Calcium in Water.....	42
2.9.3	Dissolved Carbon Dioxide and Calcium Carbonate Minerals.....	43
2.10	Complexation and Chelation	44
2.10.1	Occurrence and Importance of Chelating Agents in Water.....	46
2.11	Bonding and Structure of Metal Complexes	47
2.11.1	Selectivity and Specificity in Chelation	47
2.12	Calculations of Species Concentrations	48
2.13	Complexation by Deprotonated Ligands.....	49
2.14	Complexation by Protonated Ligands	50
2.15	Solubilization of Lead Ion from Solids by NTA	51
2.15.1	Reaction of NTA with Metal Carbonate	53
2.15.2	Effect of Calcium Ion on the Reaction of Chelating Agents with Slightly Soluble Salts.....	54
2.16	Polyphosphates and Phosphonates in Water.....	55
2.16.1	Polyphosphates	56
2.16.2	Hydrolysis of Polyphosphates.....	56
2.16.3	Complexation by Polyphosphates.....	57
2.16.4	Phosphonates	57
2.17	Complexation by Humic Substances	57
2.18	Complexation and Redox Processes.....	59
	References	59
	Further Reading.....	59
	Questions and Problems	60

Chapter 3	Oxidation/Reduction in Aquatic Chemistry	63
3.1	The Significance of Oxidation/Reduction in Aquatic Chemistry	63
3.2	The Electron and Redox Reactions	65
3.3	Electron Activity and pE	67
3.4	The Nernst Equation.....	68
3.5	Reaction Tendency: Whole Reaction from Half-Reactions.....	69
3.6	The Nernst Equation and Chemical Equilibrium.....	70
3.7	The Relationship of pE to Free Energy	71
3.8	Reactions in Terms of One Electron-Mole.....	71
3.9	The Limits of pE in Water.....	73
3.10	pE Values in Natural Water Systems.....	74
3.11	pE – pH Diagrams.....	75
3.12	Humic Substances as Natural Reductants	78
3.13	Photochemical Processes in Oxidation–Reduction.....	79
3.14	Corrosion.....	79
	References	80

Further Reading	81
Questions and Problems	81
Chapter 4 Phase Interactions in Aquatic Chemistry	85
4.1 Chemical Interactions Involving Solids, Gases, and Water	85
4.2 Importance and Formation of Sediments	85
4.2.1 Formation of Sediments	86
4.2.2 Organic and Carbonaceous Sedimentary Materials	87
4.3 Solubilities	87
4.3.1 Solubilities of Solids	88
4.3.2 Solubilities of Gases	89
4.4 Colloidal Particles in Water	90
4.4.1 Colloids in Water and Contaminant Transport by Colloids	91
4.4.2 Kinds of Colloidal Particles	91
4.4.3 Colloid Stability	92
4.5 The Colloidal Properties of Clays	93
4.6 Aggregation of Colloidal Particles	94
4.6.1 Flocculation of Colloids by Polyelectrolytes	94
4.6.2 Flocculation of Bacteria by Polymeric Materials	95
4.7 Surface Sorption by Solids	95
4.8 Solute Exchange with Bottom Sediments	96
4.8.1 Trace-Level Metals in Suspended Matter and Sediments	97
4.8.2 Phosphorus Exchange with Bottom Sediments	98
4.8.3 Organic Compounds on Sediments and Suspended Matter	98
4.8.4 Bioavailability of Sediment Contaminants	100
4.9 Interstitial Water	101
4.10 Phase Interactions in Chemical Fate and Transport	101
4.10.1 Rivers	101
4.10.2 Lakes and Reservoirs	101
4.10.3 Exchange with the Atmosphere	102
4.10.4 Exchange with Sediments	102
References	103
Further Reading	103
Questions and Problems	104
Chapter 5 Aquatic Microbial Biochemistry	107
5.1 Aquatic Biochemical Processes	107
5.1.1 Microorganisms at Interfaces	107
5.2 Algae	108
5.3 Fungi	110
5.4 Protozoa	110
5.5 Bacteria	110
5.5.1 Autotrophic and Heterotrophic Bacteria	111
5.5.2 Oxidic and Anoxic Bacteria	112
5.6 The Prokaryotic Bacterial Cell	112
5.7 Kinetics of Bacterial Growth	113
5.8 Bacterial Metabolism	113
5.8.1 Factors Affecting Bacterial Metabolism	114
5.8.2 Microbial Oxidation and Reduction	116

5.9	Microbial Transformations of Carbon.....	116
5.9.1	Methane-Forming Bacteria.....	116
5.9.2	Bacterial Utilization of Hydrocarbons.....	118
5.9.3	Microbial Utilization of Carbon Monoxide.....	118
5.10	Biodegradation of Organic Matter.....	119
5.10.1	Oxidation.....	119
5.10.2	Microbial Oxidation of Hydrocarbons.....	119
5.10.3	Other Biochemical Processes in Biodegradation of Organics.....	120
5.11	Microbial Transformations of Nitrogen.....	121
5.11.1	Nitrogen Fixation.....	122
5.11.2	Nitrification.....	123
5.11.3	Nitrate Reduction.....	123
5.11.4	Denitrification.....	124
5.12	Microbial Transformations of Phosphorus and Sulfur.....	124
5.12.1	Phosphorus Compounds.....	124
5.12.2	Sulfur Compounds.....	125
5.12.3	Oxidation of H ₂ S and Reduction of Sulfate by Bacteria.....	125
5.12.4	Microorganism-Mediated Degradation of Organic Sulfur Compounds.....	125
5.13	Microbial Transformations of Halogens and Organohalides.....	126
5.14	Microbial Transformations of Metals and Metalloids.....	127
5.14.1	Acid Mine Waters.....	128
5.14.2	Microbial Transitions of Selenium.....	129
5.14.3	Microbial Corrosion.....	130
	References.....	130
	Further Reading.....	131
	Questions and Problems.....	131
Chapter 6	Water Pollutants and Water Pollution.....	135
6.1	Nature and Types of Water Pollutants.....	135
6.1.1	Markers of Water Pollution.....	135
6.2	Elemental Pollutants.....	135
6.3	Heavy Metals.....	137
6.3.1	Cadmium.....	137
6.3.2	Lead.....	138
6.3.3	Mercury.....	138
6.4	Metalloids.....	139
6.5	Organically Bound Metals and Metalloids.....	140
6.5.1	Organotin Compounds.....	141
6.6	Inorganic Species.....	142
6.6.1	Cyanide.....	142
6.6.2	Ammonia and Other Inorganic Pollutants.....	142
6.6.3	Asbestos in Water.....	143
6.7	Algal Nutrients and Eutrophication.....	143
6.8	Acidity, Alkalinity, and Salinity.....	144
6.9	Oxygen, Oxidants, and Reductants.....	145
6.10	Organic Pollutants.....	146
6.10.1	Bioaccumulation of Organic Pollutants.....	146
6.10.2	Sewage.....	146

- 6.10.3 Soaps, Detergents, and Detergent Builders 147
 - 6.10.3.1 Soaps..... 147
 - 6.10.3.2 Detergents 148
 - 6.10.3.3 Microbial Toxins..... 149
- 6.11 Pesticides in Water..... 150
 - 6.11.1 Natural Product Insecticides, Pyrethrins, and Pyrethroids..... 152
 - 6.11.2 The Emergence of Neonicotinoid Insecticides..... 153
 - 6.11.3 DDT and Organochlorine Insecticides..... 154
 - 6.11.4 Organophosphate Insecticides..... 154
 - 6.11.5 Carbamates..... 155
 - 6.11.6 Fungicides 156
 - 6.11.7 Herbicides..... 156
 - 6.11.8 Bipyridylum Compounds 157
 - 6.11.9 Herbicidal Heterocyclic Nitrogen Compounds 157
 - 6.11.10 Chlorophenoxy Herbicides 158
 - 6.11.11 Miscellaneous Herbicides 158
- 6.12 Organochlorine Compounds in Water..... 159
 - 6.12.1 By-Products of Pesticide Manufacture..... 159
 - 6.12.2 Polychlorinated Biphenyls..... 160
 - 6.12.3 1,2,3-Trichloropropane in Groundwater..... 161
 - 6.12.4 Naturally Occurring Chlorinated and Brominated Compounds..... 162
- 6.13 Emerging Water Pollutants, Pharmaceuticals, and Household Wastes 162
 - 6.13.1 Bactericides and Antibiotics..... 163
 - 6.13.2 Estrogenic Substances in Wastewater Effluents 164
 - 6.13.3 Biorefractory Organic Pollutants 164
- 6.14 Radionuclides in the Aquatic Environment..... 166
- References 170
- Further Reading..... 170
- Questions and Problems 171

Chapter 7 World Water Crisis and Climate Change: Water Renovation and Recycling..... 175

- 7.1 The Most Important Body of Water—You 175
- 7.2 Water Treatment and Water Use..... 176
- 7.3 Municipal Water Treatment..... 176
 - 7.3.1 Failures in Water Treatment..... 176
- 7.4 Treatment of Water for Industrial and Commercial Use 177
- 7.5 Wastewater Treatment 178
 - 7.5.1 Industrial Wastewater Treatment..... 178
- 7.6 Advanced Water Treatment..... 178
- 7.7 Aeration of Water 179
- 7.8 Removal of Solids..... 179
 - 7.8.1 Dissolved Air Flotation 180
 - 7.8.2 Membrane Filtration Processes..... 181
- 7.9 Removal of Calcium and Other Metals 182
 - 7.9.1 Removal of Iron and Manganese 185
 - 7.9.2 Removal of Heavy Metals from Water..... 185
- 7.10 Removal of Biodegradable Organics from Water and Sewage Treatment 186
 - 7.10.1 Biodegradable Organics Removal from Wastewater..... 186
 - 7.10.2 Membrane Bioreactor..... 189

7.10.3	Sludge Handling and Disposal.....	189
7.10.4	Chemical Sludges.....	191
7.10.5	Additional Purification of Water from Secondary Wastewater Treatment.....	191
7.11	Removal of Dissolved Organics.....	192
7.11.1	Removal of Herbicides.....	193
7.12	Removal of Dissolved Inorganics.....	193
7.12.1	Ion Exchange.....	194
7.12.2	Reverse Osmosis.....	194
7.12.3	Phosphorus Removal.....	195
7.12.4	Nitrogen Removal.....	196
7.13	Water Disinfection.....	197
7.13.1	Chlorine Dioxide.....	197
7.13.2	Green Ozone for Water Disinfection.....	198
7.13.3	Ferrate and Percarbonate.....	199
7.13.4	Disinfection with Ultraviolet Radiation and Photocatalytic Processes.....	199
7.14	Natural Water Purification Processes.....	200
7.14.1	Industrial Wastewater Treatment by Soil.....	200
7.15	Green Water and Total Water Recycle.....	200
7.16	Water Conservation.....	205
7.17	Protecting Water Supplies from Attack.....	206
	References.....	207
	Further Reading.....	207
	Questions and Problems.....	208

Chapter 8	The Atmosphere and Atmospheric Chemistry.....	211
8.1	The Atmosphere and Atmospheric Chemistry.....	211
8.1.1	Atmospheric Composition.....	212
8.1.2	Oxides of Nitrogen and Sulfur.....	212
8.1.3	Atmospheric Methane, Hydrocarbons, and Photochemical Smog.....	212
8.1.4	Particulate Matter.....	214
8.1.5	Primary and Secondary Pollutants.....	214
8.2	How the Atmosphere Got That Way and Its Natural Capital.....	214
8.2.1	Chemical and Biochemical Processes in Evolution of the Atmosphere.....	214
8.2.2	Self-Purification of the Atmosphere.....	215
8.3	Physical Characteristics of the Atmosphere.....	215
8.3.1	Variation of Pressure and Density with Altitude.....	215
8.3.2	Stratification of the Atmosphere.....	216
8.4	Energy Transfer in the Atmosphere.....	218
8.4.1	Earth's Radiation Budget.....	219
8.5	Atmospheric Mass Transfer, Meteorology, and Weather.....	220
8.5.1	Atmospheric Water in Energy and Mass Transfer.....	221
8.5.2	Air Masses.....	221
8.5.3	Topographical Effects.....	222
8.5.4	Movement of Air Masses.....	222
8.5.5	Global Weather.....	223
8.5.6	Weather Fronts and Storms.....	224
8.6	Inversions and Air Pollution.....	225

8.7	Global Climate and Microclimate.....	225
8.7.1	Atmospheric Carbon Dioxide and Human Modifications of Climate.....	226
8.7.2	Microclimate	226
8.7.3	Effects of Urbanization on Microclimate.....	226
8.8	Chemical and Photochemical Reactions in the Atmosphere.....	227
8.8.1	Photochemical Processes	228
8.8.2	Ions and Radicals in the Atmosphere.....	230
8.8.3	Ions at Lower Altitudes in the Troposphere	231
8.8.4	Free Radicals	231
8.8.5	Hydroxyl and Hydroperoxyl Radicals in the Atmosphere	232
8.9	Acid–Base Reactions in the Atmosphere	234
8.10	Reactions of Atmospheric Oxygen	235
8.10.1	Tropospheric Ozone in the Unpolluted Atmosphere.....	236
8.11	Reactions of Atmospheric Nitrogen	237
8.12	Atmospheric Water	237
8.13	Influence of the Anthrosphere	238
8.14	Chemical Fate and Transport in the Atmosphere.....	238
	References	240
	Further Reading.....	240
	Questions and Problems.....	241

Chapter 9	Particles in the Atmosphere	245
9.1	Particles in the Atmosphere.....	245
9.2	Physical Behavior of Particles in the Atmosphere	246
9.2.1	Size and Settling of Atmospheric Particles.....	247
9.3	Physical Processes for Particle Formation	248
9.4	Chemical Processes for Particle Formation	248
9.4.1	Inorganic Particles.....	249
9.4.2	Organic Particles	250
9.5	The Composition of Inorganic Particles.....	250
9.5.1	Fly Ash	252
9.5.2	Asbestos	252
9.6	Toxic Metals in the Atmosphere.....	253
9.6.1	Atmospheric Mercury	253
9.6.2	Atmospheric Lead	253
9.6.3	Atmospheric Beryllium	253
9.7	Radioactive Particles	254
9.8	Organic Particles in the Atmosphere.....	254
9.8.1	Polycyclic Aromatic Hydrocarbons.....	255
9.8.2	Carbonaceous Particles from Diesel Engines	257
9.9	Effects of Particles.....	257
9.9.1	The Asian Brown Cloud: Climate and Health Effects.....	258
9.9.2	Partitioning of Semivolatile Organic Substances between Air and Particles	259
9.10	Water as Particulate Matter	259
9.11	Atmospheric Chemical Reactions Involving Particles	260
9.12	Control of Particle Emissions.....	261
9.12.1	Particle Removal by Sedimentation and Inertia.....	262
9.12.2	Particle Filtration.....	262

9.12.3	Scrubbers.....	263
9.12.4	Electrostatic Removal.....	263
	References	264
	Further Reading.....	265
	Questions and Problems	265
Chapter 10	Gaseous Inorganic Air Pollutants	267
10.1	Inorganic Pollutant Gases.....	267
10.2	Production and Control of Carbon Monoxide	267
10.2.1	Control of Carbon Monoxide Emissions.....	268
10.3	Fate of Atmospheric CO	268
10.4	Sulfur Dioxide Sources and the Sulfur Cycle	268
10.5	Sulfur Dioxide Reactions in the Atmosphere.....	270
10.5.1	Effects of Atmospheric Sulfur Dioxide.....	272
10.5.2	Sulfur Dioxide Removal.....	273
10.5.3	Oxy-Fuel Combustion for Sulfur Dioxide and Carbon Dioxide Recovery	274
10.6	Nitrogen Oxides in the Atmosphere	275
10.6.1	Atmospheric Reactions of NO _x	277
10.6.2	Harmful Effects of Nitrogen Oxides.....	279
10.6.3	Control of Nitrogen Oxides	281
10.6.4	Limiting Production of Nitrogen Oxides	281
10.6.5	Removal of Nitrogen Oxides from Stack Gas.....	282
10.7	Acid Rain.....	283
10.8	Ammonia in the Atmosphere	283
10.9	Fluorine, Chlorine, and Their Gaseous Compounds.....	283
10.9.1	Chlorine and Hydrogen Chloride	284
10.9.2	Hydrogen Chloride in the Atmosphere	285
10.10	Reduced Sulfur Gases	286
	References	288
	Further Reading.....	288
	Questions and Problems	289
Chapter 11	Organic Air Pollutants	291
11.1	Organic Compounds in the Atmosphere	291
11.1.1	Loss of Organic Substances from the Atmosphere.....	291
11.1.2	Persistent Organic Pollutants	291
11.1.3	Global Distillation and Fractionation of POPs.....	292
11.2	Biogenic Organic Compounds.....	292
11.2.1	Biogenic Methane.....	293
11.2.2	Biogenic Hydrocarbons from Plants	293
11.2.3	Removal of Atmospheric Organic Compounds by Plants.....	295
11.3	Pollutant Hydrocarbons	296
11.3.1	Aromatic Hydrocarbons.....	298
11.3.2	Reactions of Atmospheric Aromatic Hydrocarbons	299
11.4	Carbonyl Compounds.....	300
11.5	Miscellaneous Oxygen-Containing Compounds.....	303
11.5.1	Alcohols.....	303
11.5.2	Phenols	304

11.5.3	Ethers.....	304
11.5.4	Oxides.....	305
11.5.5	Carboxylic Acids.....	305
11.6	Organonitrogen Compounds.....	306
11.7	Organohalide Compounds.....	308
11.7.1	CFCs and Halons.....	309
11.7.2	Atmospheric Reactions of Hydrofluorocarbons and Hydrochlorofluorocarbons.....	310
11.7.3	Perfluorocarbons.....	311
11.7.4	Chlorinated Dibenzo- <i>p</i> -Dioxins and Dibenzofurans.....	311
11.8	Organosulfur Compounds.....	312
11.9	Organic Particulate Matter.....	313
11.10	Hazardous Air Pollutant Organic Compounds.....	313
	References.....	314
	Further Reading.....	314
	Questions and Problems.....	315
Chapter 12	Photochemical Smog.....	317
12.1	Reduced Visibility When the Sun Shines.....	317
12.2	Smog-Forming Emissions.....	318
12.2.1	Control of Exhaust Hydrocarbons.....	319
12.2.2	Automotive Emission Standards.....	322
12.2.3	Polluting Green Plants.....	322
12.3	Smog-Forming Reactions of Organic Compounds in the Atmosphere.....	323
12.3.1	Photochemical Reactions of Methane.....	323
12.3.2	Addition Reactions in the Atmosphere.....	324
12.4	Overview of Smog Formation.....	326
12.5	Mechanisms of Smog Formation.....	327
12.5.1	Nitrate Radical.....	334
12.5.2	Photolyzable Compounds in the Atmosphere.....	334
12.6	Reactivity of Hydrocarbons.....	335
12.7	Importance of HO _x /VOC Ratios.....	335
12.8	Inorganic Products from Smog.....	336
12.9	Effects of Smog.....	337
	References.....	339
	Further Reading.....	340
	Questions and Problems.....	340
Chapter 13	The Endangered Global Atmosphere.....	343
13.1	Saving the Atmosphere to Save Ourselves.....	343
13.1.1	Preservation of the Atmosphere's Natural Capital.....	343
13.2	Earth's Evolving Atmosphere and Climate Change.....	344
13.2.1	Changes in Climate.....	345
13.3	Effects of the Anthroposphere on the Atmosphere and Climate.....	345
13.4	The Greatest Threat to the Atmosphere and Earth System: Global Warming.....	346
13.4.1	Methane and Other Greenhouse Gases.....	349
13.4.2	Particles and Global Warming.....	350
13.5	Consequences of Global Climate Change.....	350

13.5.1	Increasing Temperature.....	350
13.5.2	Passing the Tipping Points	351
13.5.3	Loss of Ice Cover.....	352
13.5.4	Glaciers and Water Supply	353
13.5.5	Expansion of Subtropical Arid Regions and Drought.....	353
13.5.6	Some Other Effects of Global Climate Change	353
13.6	Green Science and Technology to Alleviate Global Warming	354
13.6.1	Minimization.....	354
13.6.2	Counteracting Measures.....	356
13.6.3	Adaptation	357
13.7	Acid Rain.....	358
13.8	Stratospheric Ozone Destruction.....	361
13.8.1	Shielding Effect of the Ozone Layer	361
13.8.2	Ozone Layer Destruction.....	362
13.8.3	Green Chemistry Solutions to Stratospheric Ozone Depletion.....	364
13.9	Atmospheric Brown Clouds	365
13.9.1	Yellow Dust	367
13.10	Atmospheric Damage by Photochemical Smog	367
13.11	The Urban Aerosol	368
13.12	Nuclear Winter	370
13.12.1	“Doomsday Visitors” from Space	371
13.13	What Is to Be Done?.....	372

Chapter 15 Soil: Earth’s Lifeline 409

15.1 Have You Thanked a Clod Today?..... 409

15.1.1 What Is Soil? 409

15.1.2 Agriculture and Soil 409

15.2 Structure of Soil 411

15.3 Composition of Soil..... 412

15.3.1 Water in Soil..... 412

15.3.2 The Soil Solution..... 414

15.3.3 Air in Soil..... 414

15.3.4 Inorganic Solids in Soil..... 414

15.3.5 Soil Organic Matter..... 415

15.4 Acid–Base and Ion-Exchange Reactions in Soil 416

15.4.1 Acid–Base Reactions of Soil..... 417

15.4.2 Adjustment of Soil Acidity..... 418

15.4.3 Ion-Exchange Equilibria in Soil..... 418

15.5 Macronutrients in Soil 420

15.5.1 Sulfur in Soil and as a Macronutrient 420

15.6 Nitrogen, Phosphorus, and Potassium in Soil 420

15.6.1 Nitrogen..... 421

15.6.2 Phosphorus 423

15.6.3 Potassium..... 423

15.7 Micronutrients in Soil..... 424

15.8 Fertilizers..... 425

15.8.1 Fertilizer Pollution 427

15.9 Pesticides and Their Residues in Soil..... 427

15.9.1 Soil Fumigants 428

15.10 Wastes and Pollutants and Their Degradation on Soil 429

15.10.1 Soil Pollutants from Livestock Production..... 431

15.10.2 Biodegradation and the Rhizosphere 431

15.11 Soil Loss and Degradation 432

15.11.1 Soil Sustainability and Water Resources 433

15.12 Saving the Land..... 433

15.12.1 Agroforestry 434

15.12.2 Soil Restoration 435

15.12.3 Poduculture in Soil Restoration..... 435

15.13 Green Chemistry and Sustainable Agriculture 437

15.14 Genetics and Agriculture.....	439
15.14.1 Recombinant DNA and Genetic Engineering in Agriculture	440
15.14.2 The Major Transgenic Crops and Their Characteristics	441
15.14.3 Crops versus Pests	442
15.14.4 Future Crops	443
15.15 Agriculture and Health.....	445
15.15.1 Food Contamination.....	445
15.16 Protecting the Food Supply from Attack.....	445

Chapter 19 The Nature, Sources, and Environmental Chemistry of Hazardous Wastes 551

19.1 Introduction	551
19.1.1 History of Hazardous Substances	551
19.1.2 Legislation.....	552
19.2 Classification of Hazardous Substances and Wastes.....	553
19.2.1 Characteristics and Listed Wastes.....	553
19.2.2 Hazardous Wastes	554
19.2.3 Hazardous Wastes and Air and Water Pollution Control.....	555
19.3 Sources of Wastes.....	555
19.3.1 Types of Hazardous Wastes.....	556
19.3.2 Hazardous Waste Generators	556
19.4 Flammable and Combustible Substances	557
19.4.1 Combustion of Finely Divided Particles	558
19.4.2 Oxidizers	558
19.4.3 Spontaneous Ignition.....	559
19.4.4 Toxic Products of Combustion	559
19.5 Reactive Substances	560
19.5.1 Chemical Structure and Reactivity	560

19.6 Corrosive Substances..... 562

19.6.1 Sulfuric Acid..... 562

19.7 Toxic Substances 563

19.7.1 Toxicity Characteristic Leaching Procedure..... 563

19.8 Physical Forms and Segregation of Wastes..... 563

19.9 Environmental Chemistry of Hazardous Wastes 564

19.10 Physical and Chemical Properties of Hazardous Wastes 565

19.11 Transport, Effects, and Fates of Hazardous Wastes 566

19.11.1 Physical Properties of Wastes 566

19.11.2 Chemical Factors..... 566

19.11.3 Effects of Hazardous Wastes..... 566

19.11.4 Fates of Hazardous Wastes..... 567

19.12 Hazardous Wastes and the Anthrosphere..... 567

19.13 Hazardous Wastes in the Geosphere 568

19.14 Hazardous Wastes in the Hydrosphere..... 570

19.15 Hazardous Wastes in the Atmosphere..... 572

19.16 Hazardous Wastes in the Biosphere 573

19.16.1 Microbial Metabolism in Waste Degradation..... 574

19.16.2 Ecotoxicology of Hazardous Wastes..... 574

19.17 Hazardous Substances in Terrorism..... 575

19.17.1 Detection of Hazardous Substances..... 576

19.17.2 Removing Hazardous Agents..... 577

Questions and Problems 578

Chapter 20 Industrial Ecology for Waste Minimization, Utilization, and Treatment 581

20.1 Introduction 581

20.2 Waste Reduction and Minimization..... 581

20.3 Recycling 583

20.3.1 Examples of Recycling..... 583

20.3.2 Waste Oil Utilization and Recovery..... 584

20.3.3 Waste Oil Fuel..... 585

20.3.4 Waste Solvent Recovery and Recycle..... 585

20.3.5 Recovery of Water from Wastewater..... 585

20.4 Physical Methods of Waste Treatment 586

20.4.1 Methods of Physical Treatment..... 587

20.4.2 Phase Separations..... 587

20.4.3 Phase Transition 588

20.4.4 Phase Transfer 588

20.4.5 Molecular Separation 589

20.5 Chemical Treatment: An Overview..... 590

20.5.1 Acid/Base Neutralization 590

20.5.2 Chemical Precipitation 590

20.5.3 Coprecipitation of Metals..... 591

20.5.4 Oxidation/Reduction 591

20.5.5 Electrolysis 592

20.5.6 Hydrolysis..... 593
