

*Bioarchaeology* covers the history and general theory of the field plus the recovery and laboratory treatment of human remains.

Bioarchaeology is the study of human remains in context from an archaeological and anthropological perspective. The book explores, through numerous case studies, how the ways a society deals with their dead can reveal a great deal about that society, including its religious, political, economic, and social organizations. It details recovery methods and how, once recovered, human remains can be analyzed to reveal details about the funerary system of the subject society and inform on a variety of other issues, such as health, demography, disease, workloads, mobility, sex and gender, and migration. Finally, the book highlights how bioarchaeological techniques can be used in contemporary forensic settings and in investigations of genocide and war crimes.

In *Bioarchaeology*, theories, principles, and scientific techniques are laid out in a clear, understandable way, and students of archaeology at undergraduate and graduate levels will find this an excellent guide to the field.

**Mark Q. Sutton** received his Ph.D. in Anthropology from the University of California, Riverside in 1987. He taught at California State University, Bakersfield from 1987 to 2007 where he retired as Emeritus Professor of Anthropology. He now teaches at the University of San Diego. Dr. Sutton has worked with a variety of human remains in western North America and has published more than 240 books, monographs, articles, and reviews in archaeology.

## **1 The discipline of bioarchaeology**

*Introduction: what is bioarchaeology?* 1

*What constitutes human remains?* 2

*The development of the discipline* 3

*A focus on measurement and classification* 3

*Interest in paleopathology* 5

*A revival of mortuary analysis* 5

*Changing perspectives: an integrated biocultural approach* 6

*Ethics and politics in bioarchaeology* 7

*Repatriation: humanistic and scientific issues* 7

*International laws on human remains* 8

*U.S. laws on human remains* 9

*Chapter summary* 15

*Key concepts and terms* 16

## **2 In the field: discovery and recovery**

*Human? How old?* 17

*The archaeological record* 18

*The nature of archaeological evidence* 18

*Taphonomy* 18

*Discovery of human remains* 21

*Known sites and locations* 21

*Accidental discoveries* 22

*Recovery of human remains* 22

*Excavation methods* 23

*Recordation* 24

*Post-excavation handling* 24

*Chapter summary* 24

*Key concepts and terms* 25

<b>3 In the laboratory: description and basic analysis of human remains</b>	26
<i>Laboratory treatment</i> 26	
<i>Skeletal remains</i> 27	
<i>Bones of the skeleton</i> 27	
<i>Measuring and describing the skeleton</i> 30	
<i>Metric traits</i> 31	
<i>Nonmetric traits</i> 31	
<i>Bone development and growth</i> 31	
<i>Types of bone</i> 32	
<i>Remodeling</i> 33	
<i>Deossification</i> 34	
<i>Bone histology</i> 34	
<i>Dentition</i> 35	
<i>Describing teeth</i> 35	
<i>Metric and nonmetric dental traits</i> 37	
<i>Basic analysis of skeletal remains</i> 38	
<i>Determining the minimum number of individuals</i> 38	
<i>Estimating age at death</i> 38	
<i>Estimating sex</i> 42	
<i>Estimating stature</i> 45	
<i>Estimations of ancestry</i> 45	
<i>Soft tissue and other remains</i> 46	
<i>Hair</i> 47	
<i>Fingernails and toenails</i> 48	
<i>Paleofeces</i> 48	
<i>Dating human remains</i> 49	
<i>Chapter summary</i> 49	
<i>Key concepts and terms</i> 50	
<b>4 Treating the dead: the funerary system</b>	52
<i>Concepts of the body</i> 52	
<i>Cultural constructs of death</i> 52	
<i>The funerary system</i> 53	
<i>The funerary system I: pretreatment of the living</i> 54	
<i>The funerary system II: the mortuary process</i> 55	
<i>Purposeful mummies</i> 64	
<i>Preserved body parts</i> 67	
<i>Funerary system III: commemorative behavior</i> 76	
<i>Chapter summary</i> 81	
<i>Key concepts and terms</i> 82	
<b>5 Paleopathology I: metabolic, nutritional, and occupational stress</b>	83
<i>Paleopathology</i> 83	
<i>Stress</i> 84	
<i>Metabolic stress</i> 84	
<i>Nutritional stress</i> 90	

Occupational and activity stress 93

Detecting general stress 98

Chapter summary 99

Key concepts and terms 99

## 6 Paleopathology II: disease and abnormalities

Disease 101

Skeletal pathology of disease 101

Cancers and tumors 105

Infectious disease 106

Degenerative disorders 110

Dental pathologies 112

Soft tissue pathology 114

Infectious disease in soft tissues 115

Parasitic infection 115

Congenital abnormalities 117

Congenital syndromes 119

Chapter summary 119

Key concepts and terms 121

## 7 Trauma

Trauma 123

Types of physical trauma 123

Violence 125

Cannibalism 131

Human sacrifice 136

Execution 137

Medical trauma 137

Tissue modification 140

Chapter summary 143

Key concepts and terms 144

## 8 Specialized studies

Biomolecular studies 146

Organic residues: blood, lipids, and proteins 146

Ancient DNA 147

Isotopic analysis 152

Biodistance studies 155

Imaging 156

Radiography 156

Scanning 157

Chapter summary 159

Key concepts and terms 159

## 9 Interpretive theory and data integration

Theoretical approaches in interpretation 161

Middle-range theory 162

## **Research design 163**

*Cemetery organization 163*

*Grave goods and status 164*

*Integration of data sets 165*

*Constructing a biocultural profile 166*

*Constructing a bioethnography 172*

*Issues in analysis 173*

*Chapter summary 174*

*Key concepts and terms 175*

## **10 Lives once lived: the anthropology of the dead**

*Addressing anthropological questions 176*

*Exploring social organization 176*

*Exploring political systems 181*

*Exploring religion and ritual 181*

*Exploring sex and gender 184*

*Exploring inequality 187*

*The transition to agriculture 188*

*Paleodemography 189*

*The osteological paradox 190*

*The health of past populations 193*

*Medical care 198*

*Disability and community health care 198*

*Prosthetics 199*

*Chapter summary 200*

*Key concepts and terms 200*

## **11 Contemporary application: forensic anthropology**

*Goals in forensic anthropology 202*

*Discovery and recovery 202*

*Identification of remains 203*

*Identifying manner and cause of death 204*

*Time since death 204*

*Legal issues 204*

*Homicide cases 204*

*Mass death events 205*

*Extralegal killings and mass graves 205*

*Recovery of war dead 207*

*Chapter summary 209*

*Key concepts and terms 209*
