

12	PART III LATENT SPACE NETWORK MODELS	3-4
22	Interpretation	3-2
26	The Basic Latent Space Model	3-6
26	8.1 Introduction	3-7
26	8.2 Motivation: Theoretical	3-8
26	8.3 The Euclidean Latent Space Model	171
26	8.4 Model Convergence	171
26	8.5 Model Fit	4-1
26	8.6 Model Specification	4-2
26	8.7 Interpretation of Latent Effects	4-3
26	8.8 Strengths, Assumptions, and Limitations	4-4
26	Latent Space Models	4-2
26	8.9 Wrapping Up	4-6
26	8.10 Self-Study Problems	4-7

Contents

List of Figures	page viii
List of Tables	xiii
Notation and Acronyms	xiv
Preface	xix
Acknowledgments	xxiii

PART I DEPENDENCE AND INTERDEPENDENCE

1	Promises and Pitfalls of Inferential Network Analysis	3
1.1	A Basis for Considering Networks	4
1.2	Networks and Complex Statistical Dependence	8
1.3	Methods Covered in This Book	14
2	Detecting and Adjusting for Network Dependencies	17
2.1	Detecting Dependencies: Conditional Uniform Graph Tests	19
2.2	The Quadratic Assignment Procedure (QAP)	26
2.3	Wrapping Up	31
2.4	Self-Study Problems	32

PART II THE FAMILY OF EXPONENTIAL RANDOM GRAPH MODELS (ERGMs)

3	The Basic ERGM	35
3.1	Introduction	35
3.2	The Exponential Random Graph Model (ERGM)	40
3.3	ERGM Specification: A Brief Introduction	42

3.4	Model Fit	51
3.5	Interpretation	56
3.6	Limitations	64
3.7	Wrapping Up	65
3.8	Self-Study Problems	66
4	ERGM Specification	67
4.1	Starting with Theory	68
4.2	Exogenous Covariate Effects	70
4.3	Endogenous Network Effects	75
4.4	Creating New Statistics	89
4.5	Bipartite ERGMs	90
4.6	Wrapping Up	96
4.7	Self-Study Problems	97
5	Estimation and Degeneracy	98
5.1	Methods for Estimating ERGM	98
5.2	Problem of Degeneracy	103
5.3	Adjusting Specifications to Correct Degeneracy and Improve Model Fit	106
5.4	Other Estimation Methods for ERGMs	114
5.5	Wrapping Up	115
5.6	Self-Study Problems	115
6	ERG Type Models for Longitudinally Observed Networks	116
6.1	Introduction	116
6.2	Data Considerations	117
6.3	The Temporal Exponential Random Graph Model (TERGM)	122
6.4	TERGM Specification	124
6.5	To Pool or Not to Pool? Temporal Stability of Effects	131
6.6	Estimation	134
6.7	The Stochastic Actor-Oriented Model (SAOM)	138
6.8	Wrapping Up	146
6.9	Self-Study Problems	146
7	Valued-Edge ERGMs: The Generalized ERGM (GERGM)	148
7.1	GERGM Definition	150
7.2	Specifying Processes on Weighted Networks	153
7.3	Avoiding Degeneracy in the GERGM	154
7.4	Parameter Estimation	156
7.5	Applications in the Literature	159
7.6	Wrapping Up	163
7.7	Self-Study Problems	163

PART III LATENT SPACE NETWORK MODELS

8	The Basic Latent Space Model	167
8.1	Introduction	167
8.2	Motivation: Theoretical and Mathematical Perspective	168
8.3	The Euclidean Latent Space Model	171
8.4	Model Convergence	177
8.5	Model Fit	185
8.6	Model Specification	189
8.7	Interpretation of Latent Space Models	212
8.8	Strengths, Assumptions, and Limitations of the Latent Space Model	217
8.9	Wrapping Up	218
8.10	Self-Study Problems	218
9	Identification, Estimation, and Interpretation of the Latent Space Model	220
9.1	Parameter Identification	221
9.2	Identification: Some Solutions	229
9.3	Interpreting the Latent Space	231
9.4	The Problem with Isolates	232
9.5	Estimation	233
9.6	Wrapping Up	235
10	Extending the Latent Space Model	236
10.1	Introduction	236
10.2	Valued-Edge Networks	248
10.3	Cluster Models	255
10.4	Random Effects Models	261
10.5	The Additive and Multiplicative Effects Latent Factor Model (LFM)	265
10.6	Other Extensions	269
10.7	Wrapping Up	270
10.8	Self-Study Problems	271
	References	272
	Index	288
