<b>Preface</b>	<b>vii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Causal Modeling and Observation Plans . . . . .	4
1.1.1 Cross-Sectional Data . . . . .	5
1.1.2 Panel Data . . . . .	13
1.1.3 Event History Data . . . . .	19
1.2 Event History Analysis and Causal Modeling . . . . .	21
<b>2 Event History Data Structures</b>	<b>38</b>
2.1 Basic Terminology . . . . .	38
2.2 Event History Data Organization . . . . .	42
<b>3 Nonparametric Descriptive Methods</b>	<b>56</b>
3.1 Life Table Method . . . . .	56
3.2 Product-Limit Estimation . . . . .	71
3.3 Comparing Survivor Functions . . . . .	76
<b>4 Exponential Transition Rate Models</b>	<b>86</b>
4.1 The Basic Exponential Model . . . . .	87
4.1.1 Maximum Likelihood Estimation . . . . .	88
4.1.2 Models without Covariates . . . . .	91
4.1.3 Time-Constant Covariates . . . . .	95
4.2 Models with Multiple Destinations . . . . .	101
4.3 Models with Multiple Episodes . . . . .	111
<b>5 Piecewise Constant Exponential Models</b>	<b>120</b>
5.1 The Basic Model . . . . .	120
5.2 Models without Covariates . . . . .	122
5.3 Models with Proportional Covariate Effects . . . . .	125
5.4 Models with Period-Specific Effects . . . . .	125
<b>6 Exponential Models with Time-Dependent Covariates</b>	<b>131</b>
6.1 Parallel and Interdependent Processes . . . . .	131
6.2 Interdependent Processes: The System Approach . . . . .	134
6.3 Interdependent Processes: The Causal Approach . . . . .	138
6.4 Episode Splitting with Qualitative Covariates . . . . .	140
6.5 Episode Splitting with Quantitative Covariates . . . . .	152
6.6 Application Examples . . . . .	157

<b>7</b>	<b>Parametric Models of Time-Dependence</b>	<b>176</b>
7.1	Interpretation of Time-Dependence . . . . .	177
7.2	Gompertz-Makeham Models . . . . .	180
7.3	Weibull Models . . . . .	191
7.4	Log-Logistic Models . . . . .	197
7.5	Log-Normal Models . . . . .	202
7.6	Sickle Models . . . . .	208
<b>8</b>	<b>Methods to Check Parametric Assumptions</b>	<b>213</b>
8.1	Simple Graphical Methods . . . . .	213
8.2	Pseudoresiduals . . . . .	219
<b>9</b>	<b>Semi-Parametric Transition Rate Models</b>	<b>228</b>
9.1	Partial Likelihood Estimation . . . . .	229
9.2	Time-Dependent Covariates . . . . .	234
9.3	The Proportionality Assumption . . . . .	240
9.4	Baseline Rates and Survivor Functions . . . . .	248
9.5	Application Example . . . . .	251
<b>10</b>	<b>Problems of Model Specification</b>	<b>255</b>
10.1	Unobserved Heterogeneity . . . . .	255
10.2	Models with a Mixture Distribution . . . . .	261
10.2.1	Models with a Gamma Mixture . . . . .	264
10.2.2	Exponential Models with a Gamma Mixture . . . . .	267
10.2.3	Weibull Models with a Gamma Mixture . . . . .	269
10.3	Discussion . . . . .	274
	<b>Appendix A: Basic Information About TDA</b>	<b>279</b>
	<b>References</b>	<b>282</b>
	<b>About the Authors</b>	<b>304</b>
	<b>Index</b>	<b>305</b>
