

Table of Contents

Preface.....	2
Journals	4
Others	5
1 Introduction.....	8
1.1 Deformation of objects and areas of their localisation	8
1.2. Emergence of deformations.....	9
1.3. Objects of deformation monitoring	9
1.4. Deformation models.....	10
1.5. Technologies for detection of deformations	12
1.6. Geodetic determination of deformations.....	13
2 Geodetic deformation monitoring	16
2.1 Geodetic reference structures for detection of geometric changes of objects ..16	
2.2 Deformation analysis, interpretation and visualisation of its results	18
2.3 Geodetic detection of deformation changes of objects and territorial units.....19	
3 Deformation strain analysis.....	22
3.1. Object changes and their models	22
3.2 Complex (3D) deformation model.....	23
3.2.1 Structure of the model	23
3.2.2 Determination of 3D deformation parameters.....	26
3.2.3 Structures of simplified 3D models.....	27
3.3 2D deformation model.....	29
3.3.1 Structure of the model	29
3.3.2 Determination of 2D deformation parameters.....	31
3.3.3 Structures of simplified 2D models.....	32
3.4 Deformation analysis of territorial units.....	33
3.5 Graphical visualisation of strain analysis.....	35
4 Geodetic detection of 2D changes of objects.....	38
4.1 Determination of positional displacements and strains of objects by terrestrial technologies.....	38
4.1.1 Project (plan) of deformation monitoring	38
4.1.2 Establishment of monitoring networks of deformation phenomena.....	40
4.1.3 Survey of deformation networks	44
4.1.4 Processing of DN.....	46
4.1.5 Positional accuracy of the determined points	69
4.1.6 Deformation analysis of 2D changes of OP and their significance.....	72
4.1.7 Visualisation of positional point displacement	79
5 Determination of height changes of objects.....	84
5.1 Introduction	84

5.2 The project of height deformation monitoring.....	84
5.3 Survey of deformation levelling measurements	85
5.3.1 The measurement process, processing of measurements	86
5.4 Processing of levelling measurements in a network structure.....	89
5.4.1 Methods	89
5.4.2 Processing of the levelling net using GMM with full rank	89
5.4.3 Adjustment using the GMM with the incomplete rank	97
5.5 Verification of the adjustment model of the levelling net.....	101
5.6 Deformation analysis of changes in heights of points	102
5.7 Visualisation of vertical displacements.....	107
References.....	110
