

Ahmad Ibrahim	1	Editorial
Davy D. Parmentier, Bram B. Van Acker, Jan Detand and Jelle Saldien	2–18	Framework to Redesign Products with Focus on Design for Assembly Meaning: A PBL Case Study
Lisa B. Bosman, Kurt Paterson and Margaret Phillips	19–30	Integrating Online Discussions into Engineering Curriculum to Endorse Interdisciplinary Viewpoints, Promote Authentic Learning, and Improve Information Literacy
Luis Ballesteros-Sánchez, Isabel Ortiz-Marcos and Rocío Rodríguez-Rivero	31–43	Investigating the Gap Between Engineering Graduates and Practicing Project Managers
Justin L. Hess, Athena Lin, Grant A. Fore, Tom Hahn and Brandon Sorge	44–64	Testing the Civic-Minded Graduate Scale in Science and Engineering
Marwa Hassan Khalil	65–85	Idea Generating Techniques in Architectural Design Education: Exploring Students' Perceptions
Ning Fang and Seyed Mohammad Tajvidi	86–95	The Effects of Computer Simulation and Animation (CSA) on Student Learning and Problem Solving in Engineering Dynamics
Rachel McCord Ellestad and Holly M. Matusovich	96–114	Metacognitive Engagement During Problem Solving While in Naturalistic Homework Study Groups
Fermín Sánchez-Carracedo, Esther Trepát and Alejandra Barba-Vargas	115–132	Successful Engineering Lecturing based on Neuroscience
Desmond Bonner and Michael C. Dorneich	133–146	Increasing Female Middle School Student Interest in STEM: Requirements for Game-Based Learning Applications
Walter C. Lee, Ben D. Lutz, Holly M. Matusovich and Sreyoshi Bhaduri	147–162	Student Perceptions of Learning about Diversity and its Place in Engineering Classrooms in the United States
José Alberto Benítez-Andrades, Isaías García-Rodríguez, Carmen Benavides, María Mercedes Reguera-García and Pilar Marqués-Sánchez	163–171	Cooperative Work among Computer Engineering and Health Sciences Undergraduates: A Case Study
Muhammad Rashid	172–184	A Systematic Approach of Data Preparation for ABET Accreditation
Wen-Jye Shyr, Chia-Hung Chen, Yu-Xiang Wang, Chen-Liao Chen, Der-Fa Chen and Chieh-Lun Cheng	185–194	Establishing Competence Indicators to Guide Teaching Automotive Coating Techniques
Gregory Theyel, Allan Baez Morales, Evangelia Bouzos and Prashanth Asuri	195–203	Enhancing Senior Engineering Student Projects by Incorporating Needs Assessment, Manufacturing Engineering, and Pilot Testing
Mirjana Kranjac, Srdjan Tomic, Jakob Salom, Tatjana Ilic-Kosanovic, Damir Ilic and Stanko Bulajic	204–214	New Methodology of Teaching a Smart City Concept: A Case Study
Wen-Jye Shyr, I-Min Chen, Chun-Min Ho and Jing-Chuan Lee	215–222	Teaching Geophysics of Earthquakes and Building Structures for Disaster Prevention: A Case Study
Anne Wallisch, Juan Carlos Briede-Westermeyer and Marianela Luzardo-Briceño	223–243	Fostering User-Empathy Skills of Engineering Students by Collaborative Teaching
Fabrizio Vergine, Lucía Capdevila and Nikos J. Mourtos	244–269	Assessing Students' Ability to Develop a Systematic Approach to Learning
Sung-Hee Jin, Mina Yoo, Xuenan Cui and Ji-Eun Choi	270–277	Impact of Class Scheduling on Learning Achievement of Computer Engineering Students
Jacek Uziak, M. Tunde Oladiran, Kurt Becker and Marian Gizejowski	278–286	Assessing Chalk & Talk and Power Point Presentation Techniques for Teaching Engineering Courses
Andrés Díaz Lantada and José L. Martín Núñez	287–297	Strategies for Continuously Improving the Professional Development and Practice of Engineering Educators
	298	Guide for Authors
