Contents

Section I
Special Issue
Innovation in Engineering Practice and Technology Education

Guest Editors
Faiez Alani and Mo Elbestawi—McMaster University, Canada

Ahmad Ibrahim	1147	Editorial
F. Alani and **M. Elbestawi**	1148–1149	Guest Editorial
Alfonso González González, Alonso Sánchez Ríos, Cayetano José Cruz García and **David Rodríguez Salgado**	1150–1158	A Proposed Methodology to Evaluate Educational Competences in Engineering Degrees Based on Electronic Devices and Open Access Software
Sarah M. Asio, Jennifer A. Cross and **Stephen Ekwaro-Osire**	1159–1173	Factors Affecting Innovation in Engineering Design Teams: An Empirical Investigation of Student Team Perceptions
Hai Chien Pham, Nhu-Ngoc Dao, Akeem Pedro, Quang Tuan Le, Rahat Hussain, Sungrae Cho and **Chan Sik Park**	1174–1191	Virtual Field Trip for Mobile Construction Safety Education Using 360-Degree Panoramic Virtual Reality
Fei Geng and **Faiez Alani**	1192–1198	Use of Multimedia for Experiential Learning in Engineering Technology Labs
Marjan Golob and **Božidar Bratina**	1199–1211	Web-Based Control and Process Automation Education and Industry 4.0
Jose-Maria Gutierrez-Martinez, Ana Castillo-Martinez, Juan Aguado-Delgado, Roberto Barchino and **Salvador Otón**	1212–1222	Innovative Evaluation by Projects for Course with Mixed Computer Science Degrees
L. Belkhir, R. Fleisig and **D. K. Potter**	1223–1235	Effective Learning of Innovation by Engineering Students in a Multi-Disciplinary Context
Zhen Gao, Tom Wanyama and **Ishwar Singh**	1236–1249	Practice-Intensive Learning: An Effective Approach to Enhance the Fundamental Skills of PLC Beginners
Irina Zakharova and **Alexander Zakharov**	1250–1260	Key Issues of Low-Level Parallel Programming in the Individual Projects for Graduate Students
Juan I. Castillo Tello, E. Verdú Pérez and **J. Javier Rainer Granados**	1261–1272	Analysis and Evaluation of Discussion Forums in the Teaching Process of Industrial Organization Engineering
Silvia De La Flor, Alberto Belmonte and **Albert Fabregat-Sanjuan**	1273–1284	Improving Students' Engagement and Performance Through New e-Learning Tools in Laboratory Subjects in Mechanical Engineering
I. Ortigosa	1285–1288	An Experience with Varied Teaching Methodologies at Mechanical Engineering Program

Section II
Contributions in: Teamwork, Engineering Design, Evaluation, Faculty Development, Project Management, Innovation, Critical Thinking, Social Networking, e-Learning, Learning Competency, International Students, Academia and Industry, Project-Based Learning, Learning Physics

Kali Prasad Nepal	1289–1298	A Relative Relevance Approach to Refine Inconsistent Peer- and Self-Assessment Scores in Teamwork Assessment
Mahender Mandala, Christian Schunn, Steven Dow, Mary Goldberg, Jon Pearlman, William Clark and **Irene Mena**	1299–1313	Impact of Collaborative Team Peer Review on the Quality of Feedback in Engineering Design Projects
Mahender Mandala, Christian Schunn, Steven Dow, Mary Goldberg and **Jon Pearlman**	1314–1324	Uncovering the Practices, Challenges, and Incentives for Engineering Design Faculty
Matt DeMonbrun, Julia Kerst, Hanna Pfershy and **Cynthia J. Finelli**	1325–1334	The Long-Term Impact of a Faculty Development Program on Student Evaluations of Teaching

Adriana Rojas-Molina, Manuel Toledano-Ayala, Juvenal Rodriguez Reséndiz, Edgar Rivas-Araiza and **Gilberto Herrera-Ruiz**	1335–1346	Project Management in Higher Education Institutions in Mexico: A Case Study
Kerrie A. Douglas, Todd Fernandez, Şenay Purzer, Michael Fosmire and **Amy Van Epps**	1347–1362	The Critical-Thinking Engineering Information Literacy Test (CELT): A Validation Study for Fair Use Among Diverse Students
Ugljesa Marjanovic, Nenad Simeunovic, Milan Delić, Zeljka Bojanic and **Bojan Lalic**	1363–1375	Assessing the Success of University Social Networking Sites: Engineering Students' Perspective
Hsiu-Ping Yueh, Chaoyun Liang and **Yi-Lin Liu**	1376–1383	Influences of Learning Competency and e-Learning Implementation on Learning Outcomes of Engineering Students
Prasad KDV Yarlagadda, Jyoti Sharma, Pujitha Silva, Karen Woodman, Jegar Pitchforth and **Kerrie Mengersen**	1384–1399	Factors Influencing the Success of Culturally and Linguistically Diverse Students in Engineering and Information Technology
Maria-Jesús Marco-Galindo, Josep M. Marco-Simó and **Marc Fuertes-Alpiste**	1400–1410	A Computer Engineering Curriculum Model for Teaching Software Development to Bridge the Gap between Academia and Industry
Se-Yeon Jeon, Konstantin Nikitin, Aulia Dewantari, Sumin Kim and **Min-Ho Ka**	1411–1426	Multifunctional Radar Sensor Laboratory Course Using a Low-Cost Software-Defined Radio Transceiver
Juan C. Miranda and **Tomás Rada**	1427–1435	An Examination of the Beliefs About Physics and Learning Physics Among Engineering Students
	1436	Guide for Authors
