

## Contents

### Contributions in: Identity Formation, Emotions, Self-Efficacy, Communications Skills, Co-Op Programs, Social Media, Ethics, Active Learning, PBL, Flipped Classroom, Evaluation, Service Learning, Engineering Design, Ideation, Gamification, Self-Regulation, Team Building, Technical Drawing, Production Engineering, Electronics Engineering, Software Engineering, Biomedical Engineering

Ahmad Ibrahim	1725	Editorial
Nadia Kellam, Karen Gerow, Gregory Wilson, Joachim Walther and Joshua Cruz	1726–1740	Exploring Emotional Trajectories of Engineering Students: A Narrative Research Approach
Ann S. Lourens and Liesl S. Pannell	1741–1753	Self-Efficacy of Engineering Students at a South African University—Findings from a Longitudinal Study
Justin L. Hess, Anthony Chase, Grant A. Fore and Brandon Sorge	1754–1767	Quantifying Interpersonal Tendencies of Engineering and Science Students: A Validation Study
Rodrigo Fernando Herrera, Juan Carlos Vielma and Felipe Muñoz La Rivera	1768–1775	Impact of Microteaching on Engineering Students' Communication Skills
Fabrice Mantelet, Frederic Segonds and Camille Jean	1776–1784	Additive Creativity: An Innovative Way to Enhance Manufacturing Engineering Education
Jacqueline C. McNeil and Alex D. Beebe	1785–1797	Students' Ease, Time, and Coping with Transitions from Co-op to the University
Edward Berger and Edward Pan	1798–1811	Relationship of Blog and Video Usage Patterns to Academic Performance in Undergraduate Mechanics
Cigdem Turhan and Ibrahim Akman	1812–1821	Integration of Social Media into Engineering Education: A Comparative Study on Perceptions of Faculty and Students
Yasser E. Ibrahim	1822–1828	Integrated Evaluation of Teaching Effectiveness: A Case Study
Kumar Yelamarthi	1829–1837	Improving Student Success Through an Effective Learner-Centered Course in Introductory Engineering, Mathematics, and Programming
Beto Catz, Nissim Sabag and Aharon Gero	1838–1847	Problem Based Learning and Students' Motivation: The Case of an Electronics Laboratory Course
Ignasi Florensa, Marianna Bosch, Josep Gascón and Carl Winslow	1848–1862	Study and Research Paths: A New tool for Design and Management of Project Based Learning in Engineering
Benjamin P. Jacobson, Michael C. Dorneich and Leslie A. Potter	1863–1875	Impact of Lecture Video Acceleration in a Flipped Introductory Engineering Course
Jing Yan, Lin Li, Jianjun Yin and Yujing Nie	1876–1887	A Comparison of Flipped and Traditional Classroom Learning: A Case Study in Mechanical Engineering
Aline Cazarini Felício and Jorge Muniz Jr	1888–1896	Evaluation Model of Student Competencies for Discussion Forums: An Application in a Post-Graduate Course in Production Engineering
Sung-Hee Jin	1897–1909	Collaborative Instructional Models for Teaching Community Service to Engineering Students
Greg J. Strimel, Eunhye Kim, Scott R. Bartholomew and Diana V. Cantu	1910–1929	Examining Engineering Design Cognition with Respect to Student Experience and Performance
Radul Milutinović, Biljana Stošić, Mladen Čudanov and Velimir Štavljanin	1930–1938	A Conceptual Framework of Game-Based Ideation
Iris Bento Da Silva and Oswaldo Luiz Agostinho	1939–1950	A Strategy for Teaching and Learning Technical Drawing
Oenardi Lawanto and Andreas Febrian	1951–1968	Investigating the Influence of Context on Students' Self-Regulation during the Capstone Design Course
Muhammad Khalid Shaikh and Kamran Ahsan	1969–1975	<i>Psychographd</i> : A Team Building Platform for Software Engineering Students
Denise M. Wilson and Mee Joo Kim	1976–1986	Do Engineering Students View Sustainability Differently from Students in Other Majors?
	1987	Guide for Authors
