Series Foreword	ix
Preface	xi
1 Basic Constructions	1
1.1 Categories	1
1.2 Diagrams	10
1.3 Monomorphisms, Epimorphisms, and Isomorphisms	13
1.4 Initial and Terminal Objects	16
1.5 Products	17
1.6 Universal Constructions	20
1.7 Equalizers	21
1.8 Pullbacks	22
1.9 Limits	26
1.10 Exponentiation	33
2 Functors, Natural Transformations, and Adjoint	36
2.1 Functors	36
2.2 F -Algebras	39
2.3 Natural Transformations	41
2.4 Adjoint	45
3 Applications	53
3.1 Cartesian Closed Categories	53
3.2 Implicit Conversions and Generic Operators	57
3.3 Programming Language Semantics	59
3.4 Recursive Domain Equations	61
4 Further Reading	73
4.1 Textbooks	73
4.2 Introductory Articles	74
4.3 Reference Books	76
4.4 Selected Research Articles	78
Bibliography	81
Summary of Notation	93
Index	95
