1	Introduction	5
1.1	Nonresponse: a subject of concern?	5
1.2	Survey research: the cast	7
1.3	Perspectives on nonresponse research: questions to be addressed	12
1.4	Outline of this study	16
Part 1	Nonresponse in sample surveys: an overview of the literature	
2	What is nonresponse and why be concerned	23
2.1	The importance of response rates	23
2.2	Computing and comparing response rates	26
2.3	When and why nonresponse can be a problem	32
2.4	Nonresponse and sampling	36
2.5	Survey mode and nonresponse	47
2.6	Differential sources of nonresponse: noncontact and noncooperation	50
3	The usual suspects: hard to reach and reluctant to cooperate	64
3.1	Introduction	64
3.2	Hard to contact	66
3.3	Reluctant to cooperate	69
4	Push and pull factors in survey cooperation	81
4.1	Beyond background variables	81
4.2	Buying surveys: why people cooperate	81
4.3	Selling surveys: strategies for response enhancement	90
4.4	Are nonrespondents bad?	100
5	Studying nonrespondents	105
5.1	Introduction	105
5.2	Continuum of resistance and classes of nonparticipants	106
5.3	The results of extended field efforts	112
5.4	Measuring nonresponse bias	119
5.5	Conclusions from the literature: implementation of good practices and issues for further research	123

Part 2 Nonresponse in face-to-face surveys: an empirical study

6	Going into the field	135
6.1	Introduction	135
6.2	Amenities and Services Utilization Survey 1999 (AVO)	135
6.3	Follow-up survey among refusers AVO1999	146
6.4	Data file empirical analysis	154
7	Ease of contact	157
7.1	Introduction	157
7.2	Calling on the sample households	158
7.3	Continuum of resistance: characteristics of hard-to-reach respondents	166
7.4	Total number of calls: contact and cooperation	186
7.5	Conclusions	189
8	Reluctance to cooperate	192
8.1	Measuring reluctance: beyond the number of contacts	192
8.2	Contact outcomes and history	194
8.3	Who is reluctant?	204
8.4	Refusal conversion and data quality	218
8.5	Conclusion	220
9	Are refusers different?	224
9.1	Introduction	224
9.2	Results follow-up survey	225
9.3	A comparison of refusals, respondents and other groups	231
9.4	Bias and robustness: an analysis of sensitivity	247
9.5	Conclusion	251
10	Nonresponse and the European Social Survey	253
10.1	Comparing and analysing response processes and response rates	253
10.2	European Social Survey	254
10.3	Paradata	256
10.4	Contacting respondents in the ESS	262
10.5	Refusal conversion and nonresponse bias in the ESS	265
10.6	Contact forms: treasure trove or can of worms	269
11	Enhancing response rates: how and why	272
11.1	Who are less likely to be contacted and to cooperate?	273
11.2	Is nonresponse in the AVO and the ESS a reason for concern?	274
11.3	How were high response rates achieved: unravelling the process	275
11.4	How to study nonresponse?	283
11.5	Do enhanced response rates improve the accuracy of survey results	286
11.6	How to combat nonresponse error and allocate funds effectively?	288

De Jacht op de Laatste Respondent - Samenvatting	290
