

Contents

1	Introduction	1
Part I Physics Preliminaries		
2	Relativistic Point Particle	9
2.1	BV Action for the Point Particle	9
2.2	Scattering Matrix and Minimal Model	16
2.3	Summary, Comments, and Remarks Towards Part II	22
3	String Theory	27
3.1	Closed Strings	27
3.2	Interactions	33
3.3	Decomposition of the Moduli Space	39
3.4	Measure, Vertices, and BV Action	41
3.5	Algebraic Structure	45
3.6	Coalgebra Description	47
3.7	Uniqueness and Background Independence	49
3.8	Summary, Comments, and Remarks Towards Part II	50
4	Open and Closed Strings	55
4.1	World-Sheets with Boundaries	55
4.2	Open String	58
4.3	Summary, Comments, and Remarks Towards Part II	62
5	Open-Closed BV Equation	65
5.1	Open-Closed BV Action	65
5.2	Quantum Open-Closed Homotopy Algebra	67
5.3	Summary, Comment, and Remarks Towards Part II	73
Part II Mathematical Interpretation		
6	Operads	95
6.1	Cyclic Operads	95
6.2	Non- Σ Cyclic Operads	126
6.3	Operad Algebras	131

6.4	Modular Operads	133
6.5	Odd Modular Operads	148
	References	157
7	Feynman Transform of a Modular Operad	159
7.1	Modules and Derivations	159
7.2	Feynman Transform.....	170
	References	184
8	Structures Relevant to Physics	185
8.1	BV Algebras and the Master Equation	185
8.2	Loop Homotopy Algebras	200
8.3	<i>IBL</i> $_{\infty}$ -algebras.....	207
8.4	Comments and Remarks Related to Part I	214
	References	217
	Index	219
