|                                                                            |           |
|----------------------------------------------------------------------------|-----------|
| <b>Preface</b>                                                             | <b>ix</b> |
| <b>Part I. The Core Ideas</b>                                              | <b>1</b>  |
| 1. What Makes a Difference?                                                | 3         |
| 1.1 Analyzing Data in the Form of Scores                                   | 4         |
| 1.1.1 Univariate Analysis: Capturing Differences in One Set of Scores      | 4         |
| 1.1.2 Bivariate Analysis: Accounting for Score Differences With Categories | 10        |
| 1.1.3 Bivariate Analysis: Accounting for Score Differences With Scores     | 15        |
| 1.2 Analyzing Data in the Form of Categories                               | 26        |
| 1.3 Further Reading                                                        | 29        |
| 2. Deciding Whether Differences Are Trustworthy                            | 31        |
| 2.1 Sampling Issues                                                        | 33        |
| 2.2 Measurement Issues                                                     | 38        |
| 2.2.1 Measurement Scales                                                   | 38        |
| 2.2.2 Measurement Quality                                                  | 40        |
| 2.3 The Role of Chance                                                     | 42        |
| 2.3.1 Evaluating Chance With Null Hypothesis Testing                       | 42        |
| 2.3.2 Evaluating the Role of Chance With Estimation                        | 53        |
| 2.4 Statistical Assumptions                                                | 55        |
| 2.4.1 Independence of Cases                                                | 56        |
| 2.4.2 Normality of Distributions                                           | 57        |
| 2.4.3 Equality of Variances                                                | 58        |
| 2.5 Further Reading                                                        | 59        |

|       |                                                    |    |
|-------|----------------------------------------------------|----|
| 3.    | Accounting for Differences in a Complex World      | 61 |
| 3.1   | Limitations of Bivariate Analysis                  | 62 |
| 3.2   | The Multivariate Strategy                          | 65 |
| 3.2.1 | A Review of Regression Building Blocks             | 66 |
| 3.2.2 | The Composite Variable in Regression               | 69 |
| 3.2.3 | Generalizing the Composite Variable                | 76 |
| 3.3   | Common Misinterpretations of Multivariate Analyses | 78 |
| 3.3.1 | What Does “Accounting for” Differences Mean?       | 79 |
| 3.3.2 | To Whom or What Do Statistical Results Apply?      | 82 |
| 3.3.3 | What Do the Results of Hypothesis Tests Mean?      | 83 |
| 3.3.4 | What Does Statistical Control Actually Achieve?    | 86 |
| 3.4   | Further Reading                                    | 88 |

## **Part II. The Techniques** 89

|       |                                                    |     |
|-------|----------------------------------------------------|-----|
| 4.    | Multiple Regression                                | 91  |
| 4.1   | The Composite Variable in Multiple Regression      | 92  |
| 4.2   | Standard Multiple Regression in Action             | 93  |
| 4.3   | Trustworthiness in Regression Analysis             | 98  |
| 4.3.1 | Sampling and Measurement Issues                    | 99  |
| 4.3.2 | Checking Assumptions in Multiple Regression        | 101 |
| 4.3.3 | Other Issues of Trustworthiness                    | 109 |
| 4.4   | Accommodating Other Types of Independent Variables | 113 |
| 4.5   | Sequential Regression Analysis                     | 116 |
| 4.6   | Further Reading                                    | 121 |
| 5.    | Logistic Regression and Discriminant Analysis      | 123 |
| 5.1   | Logistic Regression                                | 124 |
| 5.1.1 | The Composite Variable in Logistic Regression      | 124 |
| 5.1.2 | Binary Logistic Regression in Action               | 127 |
| 5.1.3 | Trustworthiness in Logistic Regression             | 134 |
| 5.1.4 | Extending the Scope of Logistic Regression         | 136 |
| 5.2   | Discriminant Analysis                              | 139 |
| 5.2.1 | The Composite Variable in<br>Discriminant Analysis | 139 |
| 5.2.2 | Two-Group Discriminant Analysis in Action          | 142 |
| 5.2.3 | Trustworthiness in Discriminant Analysis           | 146 |
| 5.2.4 | Extending the Scope of Discriminant Analysis       | 148 |
| 5.3   | Further Reading                                    | 151 |
| 6.    | Multivariate Analysis of Variance                  | 153 |
| 6.1   | One-Way Analysis of Variance                       | 155 |
| 6.2   | Factorial Analysis of Variance                     | 159 |

|       |                                                                  |            |
|-------|------------------------------------------------------------------|------------|
| 6.3   | Multivariate Analysis of Variance                                | 164        |
| 6.3.1 | The Composite Variable in MANOVA                                 | 166        |
| 6.3.2 | MANOVA in Action                                                 | 167        |
| 6.4   | Within-Subjects ANOVA and MANOVA                                 | 171        |
| 6.5   | Issues of Trustworthiness in MANOVA                              | 175        |
| 6.6   | Analysis of Covariance                                           | 177        |
| 6.7   | Further Reading                                                  | 179        |
| 7.    | Factor Analysis                                                  | 181        |
| 7.1   | The Composite Variable in Factor Analysis                        | 182        |
| 7.2   | Factor Analysis in Action                                        | 185        |
| 7.2.1 | Extracting and Rotating Factors                                  | 186        |
| 7.2.2 | Interpreting Factors                                             | 188        |
| 7.2.3 | Assessing Goodness of Fit                                        | 192        |
| 7.2.4 | Choosing the Number of Factors                                   | 194        |
| 7.2.5 | An Example From the Well-Being Literature                        | 196        |
| 7.3   | Issues of Trustworthiness in Factor Analysis                     | 197        |
| 7.4   | Confirmatory Factor Analysis                                     | 199        |
| 7.5   | Further Reading                                                  | 202        |
| 8.    | Log-Linear Analysis                                              | 203        |
| 8.1   | Hierarchical Log-Linear Analysis                                 | 204        |
| 8.1.1 | The Composite Variable<br>in Log-Linear Analysis                 | 206        |
| 8.1.2 | Log-Linear Analysis in Action                                    | 208        |
| 8.2   | Trustworthiness in Log-Linear Analysis                           | 214        |
