
Contents

1	Introduction	1
1.1	Daily Energy	1
1.2	My Energy Bills	5
1.3	Energy and the Environment	9
1.4	Summary	9
1.5	Questions	10
2	Fundamentals of Energy	11
2.1	Types of Energy	11
2.2	Thermodynamics	13
2.3	Energy and Power	14
2.4	Energy Storage	15
2.5	Hydrocarbons	18
2.5.1	Chemistry	18
2.5.2	Gas	23
2.5.3	Oil	24
2.5.4	Coal	26
2.5.5	Combustion and Emissions	27
2.6	Summary	29
2.7	Questions	30
	Appendix: Units and Unit Conversion	31
3	Energy Use	41
3.1	World Energy Consumption by Fuel Type	41
3.2	US Energy Consumption by Sector	43
3.3	Trends in Energy Use	45
3.4	Energy Use by Region and Country	47
3.5	Per Capita Energy Use	48
3.6	Cross-Country Energy Supply Comparisons	50
3.7	Energy Use by Sector	51
3.7.1	Residential	51
3.7.2	Commercial	52
3.7.3	Transportation	53
3.7.4	Electricity	54
3.7.5	Industrial	55

3.8	Summary	57
3.9	Questions	58
	Appendix: Country Analyses	60
	Qatar	60
	Iceland	61
	Trinidad and Tobago	62
	Singapore	63
	Sources	64
4	Oil	65
4.1	Petroleum Sources	65
4.1.1	Subsurface Reservoirs	65
4.1.2	Conventional Reservoirs	65
4.1.3	Unconventional Reservoirs	67
4.1.4	Tar Sands	67
4.2	Exploration	68
4.3	Drilling	70
4.4	Production	75
4.4.1	Overview	75
4.4.2	Natural Depletion	76
4.4.3	Multiphase Flow	77
4.4.4	Artificial Lift	79
4.4.5	Secondary Recovery	80
4.4.6	Thermal Oil Recovery	81
4.4.7	Tertiary Recovery	81
4.5	Transportation	82
4.5.1	Pipelines	82
4.5.2	Water Transport	83
4.5.3	Trucks	85
4.5.4	Rail	85
4.6	Refining	85
4.6.1	Products and Inputs	85
4.6.2	Refining and Blending	87
4.6.3	Refining Technology	88
4.6.4	Worldwide Refining Capacity	91
4.7	Reserves and Production by Country	93
4.8	OPEC	95
4.9	Trade	95
4.10	Summary	97
4.11	Questions	97
	Appendix: Boiling Points and Melting Points	100
	Sources	103

5	Natural Gas	105
5.1	Sources, Exploration, Drilling, and Production	105
5.2	Heat Content	108
5.3	Processing	109
5.3.1	Separation	109
5.3.2	Hydrocarbon Gas Liquids	110
5.4	Transportation	113
5.4.1	Pipelines	113
5.4.2	Liquefied Natural Gas (LNG)	114
5.5	Reserves and Production by Country	116
5.6	Trade	118
5.7	Summary	119
5.8	Questions	120
	Sources	122
6	Coal	123
6.1	Overview	123
6.2	Reserves, Production, and Trade	124
6.3	Production Methods	127
6.4	Electricity and Coal	131
6.5	Coal Transportation	133
6.6	Not all Coal Is Alike	134
6.7	Summary	137
6.8	Questions	137
	Appendix: Coal Price Variation	139
	Heat Content	139
	Powder River Basin vs. Uinta Basin	139
	Sources	142
7	Electricity	143
7.1	Electrical Systems	143
7.1.1	Large Scale	143
7.1.2	Microgrids	144
7.2	Generation	145
7.2.1	Coal-Fired Power Plants	146
7.2.2	Gas-Fired Power Plants	149
7.2.3	Nuclear Power Plants	150
7.2.4	Diesel Generators	152
7.2.5	Hydropower	153
7.2.6	Solar	154
7.2.7	Wind	155
7.2.8	Other	156
7.3	Transmission and Distribution	157
7.4	Efficiency	157
7.4.1	Generation	157

7.4.2	Transmission and Distribution	159
7.5	Emissions	159
7.6	Electricity Consumption	160
7.6.1	Consumption by Sector	160
7.6.2	Fluctuations	163
7.6.3	Residential Power	165
7.7	Electricity Storage	167
7.8	Kettle Example.	169
7.9	Summary	171
7.10	Questions	172
	Kettle Appendix (Mathematical).	175
	Sources	177
8	Petrochemicals.	179
8.1	Plastics and More.	179
8.2	Uses of Petrochemicals	183
8.3	Environmental Impacts	183
8.4	Summary	185
8.5	Questions	185
	Appendix: Polymerization	186
9	Energy Industries	189
9.1	Overview	189
9.2	Oil and Gas	191
9.2.1	Types of Oil and Gas Companies.	191
9.2.2	National vs. Investor-Owned Oil and Gas Companies	192
9.2.3	OPEC	195
9.3	Coal	197
9.4	Electricity.	199
9.5	Petrochemical Companies	199
9.6	Summary	200
9.7	Questions	201
10	Technological Change.	203
10.1	History as a Guide to the Future	203
10.1.1	The Long View Back	203
10.1.2	Energiewende: A Recent Transition.	207
10.1.3	Fukushima, Japan.	209
10.2	100% Renewable?	211
10.3	A Possible Future.	212
10.4	Summary	214
10.5	Questions	214
10.6	Possible Projects	215
	Sources	215
	Index.	217
