

Table of Contents

<i>graph intro</i>	Introduction to graphics manual
<i>added_line_options</i>	Options for adding lines to twoway graphs
<i>added_text_option</i>	Option for adding text to twoway graphs
<i>addedlinestyle</i>	Choices for overall look of added lines
<i>advanced_options</i>	Rarely specified options for use with graph twoway
<i>alignmentstyle</i>	Choices for vertical alignment of text
<i>anglestyle</i>	Choices for the angle at which text is displayed
<i>area_options</i>	Options for specifying the look of special areas
<i>areastyle</i>	Choices for look of regions
<i>axis_label_options</i>	Options for specifying axis labels
<i>axis_options</i>	Options for specifying numeric axes
<i>axis_scale_options</i>	Options for specifying axis scale, range, and look
<i>axis_selection_options</i>	Options for specifying on which axes a variable appears
<i>axis_title_options</i>	Options for specifying axis titles
<i>barlook_options</i>	Options for setting the look of bars
<i>blabel_option</i>	Option for labeling bars
<i>by_option</i>	Option for repeating graph command
<i>bystyle</i>	Choices for look of by-graphs
<i>cat_axis_label_options</i>	Options for specifying look of categorical axis labels
<i>cat_axis_line_options</i>	Options for specifying look of categorical axis line
<i>clockpos</i>	Choices for location: direction from central point
<i>colorstyle</i>	Choices for color
<i>compassdirstyle</i>	Choices for location
<i>connect_options</i>	Options to connect points with lines
<i>connectstyle</i>	Choices for how points are connected
<i>eps_options</i>	Options for exporting to Encapsulated PostScript
<i>gph files</i>	Using gph files
<i>graph</i>	The graph command
<i>graph7</i>	The old graph command
<i>graph bar</i>	Bar charts
<i>graph box</i>	Box plots
<i>graph combine</i>	Combine multiple graphs into one
<i>graph copy</i>	Copy graph in memory
<i>graph describe</i>	Describe contents of graph in memory or on disk
<i>graph dir</i>	List names of graphs in memory and on disk
<i>graph display</i>	Redisplay graph in memory
<i>graph dot</i>	Dot charts
<i>graph drop</i>	Drop graphs from memory
<i>graph export</i>	Export current graph

graph manipulation	Graph manipulation commands
graph matrix	Matrix graphs
graph other	Other graphics commands
graph pie	Pie charts
graph print	Print current graph
graph query	List available schemes and styles
graph rename	Rename graph in memory
graph save	Save graph to disk
graph twoway	Twoway graphs
graph twoway area	Twoway line plot with area shading
graph twoway bar	Twoway bar plots
graph twoway connected	Twoway connected plots
graph twoway dot	Twoway dot plots
graph twoway dropline	Twoway dropped-line plots
graph twoway fffit	Twoway fractional-polynomial prediction plots
graph twoway fffitci	Twoway fractional-polynomial prediction plots with CIs
graph twoway function	Twoway line plot of function
graph twoway histogram	Histogram plots
graph twoway kdensity	Kernel density plots
graph twoway lfit	Twoway linear prediction plots
graph twoway lfitci	Twoway linear prediction plots with CIs
graph twoway line	Twoway line plots
graph twoway lowess	Local linear smooth plots
graph twoway mband	Twoway median-band plots
graph twoway mspline	Twoway median-spline plots
graph twoway qfit	Twoway quadratic prediction plots
graph twoway qfitci	Twoway quadratic prediction plots with CIs
graph twoway rarea	Range plot with area shading
graph twoway rbar	Range plot with bars
graph twoway rcap	Range plot with capped spikes
graph twoway rcapsym	Range plot with spikes capped with marker symbols
graph twoway rconnected	Range plot with connected lines
graph twoway rline	Range plot with lines
graph twoway rscatter	Range plot with markers
graph twoway rspike	Range plot with spikes
graph twoway scatter	Twoway scatterplots
graph twoway scatteri	scatter with immediate arguments
graph twoway spike	Twoway spike plots
graph use	Display graph stored on disk
gridstyle	Choices for overall look of grid lines
justificationstyle	Choices for how text is justified

<i>legend_option</i>	Option for specifying legend
<i>legendstyle</i>	Choices for look of legends
<i>line_options</i>	Options for determining the look of lines
<i>linepatternstyle</i>	Choices for whether lines are solid, dashed, etc.
<i>lines</i>	Concept definition: line
<i>linestyle</i>	Choices for overall look of lines
<i>linewidthstyle</i>	Choices for thickness of lines
<i>marginstyle</i>	Choices for size of margins
<i>marker_label_options</i>	Options for specifying marker labels
<i>marker_options</i>	Options for specifying markers
<i>markerlabelstyle</i>	Choices for overall look of marker labels
<i>markersizestyle</i>	Choices for the size of markers
<i>markerstyle</i>	Choices for overall look of markers
<i>mf_options</i>	Options for exporting to Windows Metafiles
<i>name_option</i>	Option for naming graph in memory
<i>nodraw_option</i>	Option for suppressing display of graph
<i>orientationstyle</i>	Choices for orientation of textboxes
<i>palette</i>	Display palettes of available selections
<i>pict_options</i>	Options for exporting or printing to Macintosh PICT
<i>plot_option</i>	Option for adding additional twoway plots to command
<i>pr_options</i>	Options for use with graph print
<i>ps_options</i>	Options for exporting or printing to PostScript
<i>pstyle</i>	Choices for overall look of plot
<i>region_options</i>	Options for shading and outlining regions and controlling aspect
<i>relativesize</i>	Choices for sizes of objects
<i>repeated options</i>	Interpretation of repeated options
<i>ringpos</i>	Choices for location: distance from plot region
<i>saving_option</i>	Option for saving graph to disk
<i>scale_option</i>	Option for resizing text and markers
<i>scheme economist</i>	Scheme description: economist
<i>scheme_option</i>	Option for specifying scheme
<i>scheme s1</i>	Scheme description: s1 family
<i>scheme s2</i>	Scheme description: s2 family
<i>scheme sj</i>	Scheme description: sj
<i>schemes</i>	Concept definition: schemes
<i>set graphics</i>	Set whether graphs are displayed
<i>set printcolor</i>	Set how colors are treated when graphs are printed
<i>set scheme</i>	Set default scheme
<i>std_options</i>	Options for use with graph construction commands
<i>stylelists</i>	Lists of style elements and shorthands
<i>symbolstyle</i>	Choices for the shape of markers

<i>textbox_options</i>	Options for textboxes and concept definition
<i>textboxstyle</i>	Choices for the overall look of text including border
<i>textsizestyle</i>	Choices for the size of text
<i>textstyle</i>	Choices for the overall look of text
<i>tickstyle</i>	Choices for the overall look of axis ticks and axis tick labels
<i>title_options</i>	Options for specifying titles
<i>twoway_options</i>	Options for twoway graphs
