

# CONTENTS

R. Bulín, L. Smolík: Dynamic analysis of the cable driven mechanism with joint clearances .....	9
M. Byrtus, Š. Dyk, M. Hajžman: Non-synchronous vibration and frequency lock-in in coupled structures .....	15
Chwalik-Pilszyk G., Koziń M.S., Ziemiański D.: Experimental studies on the interaction of the wheelchair – human system .....	21
P. Czubak, W. Surówka: Operating range of the vibratory feeder due to its amplitude-frequency characteristics .....	23
P. Duda, Ł. Felkowski, M. Konieczny: Thermal-strength analysis of a cross-flow heat exchangers .....	25
M. Hajžman, R. Bulín, M. Urban, L. Smolík: Analysis of a self-equalizing axial bearing using multibody dynamics approaches .....	27
J. Horáček, V. Radolf, J. Košina, Anne-Maria Laukkanen A.-M.: Acoustic resonances can support self-oscillations of a dynamic system .....	31
A. Kot: Experimental investigation of CVT rubber belt vibrations .....	35
M.S. Koziń, D. Smolarski: Using the direct spectral method for cycle counting of combined pulsating and completely reversed stress histories .....	39
W. Łatas: Vibration attenuation of mechanical press with rotational and translational dynamic vibration absorbers .....	43
D. Maturkanič, P. Procházka, J. Kozánek: Accuracy of the analytical methods developed for Blade Tip-Timing Analysis .....	45
M.L. Mekhalfia, P. Procházka, E.B. Tchawou Tchuisseu, R. Hodbod, D. Maturkanič: Numerical estimation of blade displacement due to air excitation .....	49
J. Michalczyk, M. Gajowy: Causes of errors in estimating the characteristic frequencies of antiresonant conveyors .....	53
L. Pešek, P. Šnábl, V. Bula: The new HPC results of 3D FE modelling of dry-friction damping at tie-boss couplings of bladed wheel – 6nd resonant mode .....	59
P. Piekaj, G. Cieplik: Experimental tests of the antiresonance vibratory mill of a sectional movement trajectory .....	65

C.S. Prasad: Study of aeroacoustics noise of high-speed aircraft propellers and mitigation of the cause ..... 69

P. Procházka, V. Uruba, P. Šnábl: Torque and flow field optical measurement of the single blade under stall flutter ..... 73

Z. Szmit, Ł. Kloda, J. Warmiński: Dynamics of a three bladed rotor – numerical and experimental studies ..... 77

P. Šidlof, V. Vomáčko, J. Lepicovsky, D. Šimurda, M. Štěpán, M. Luxa: Numerical simulation of dynamic loading of a test blade in forced torsional vibration ..... 79

P. Šnábl, J. Kozánek, L. Pešek: Identification of dynamic properties of built electrodynamic shaker ..... 85

P. Šnábl, L. Pešek, V. Bula, V. Běhálek, T. Boháč, H. Tašek: Measurement of friction coefficient between damping wire and groove ..... 91

P. Šulc, L. Pešek, I. Štěpánek, P. Šnábl, V. Bula: Verification of our deformation member for measuring axial force under torsional dynamic load ..... 97

E.B. Tchawou Tchuisseu, P. Prochazka, M.L. Mekhalfia, R. Hodbod, D. Maturkanic: Dynamics of a magnetically excited blade: Theoretical and experimental analysis ... 103

B. Tokarczyk, D. Ziemiański: Experimental analysis of recoil force based on selected firearm models ..... 107

D. Trybuszek, D. Ziemiański: The use of the MEMS accelerometer to measure vibrations of the driving elements of a 3D printer ..... 109

T. Zejer, M. Olesiński, K. Musioł, T. Okoń: Stopping material transport on vibrating feeder chute ..... 111

I. Zolotarev, V. Bula: Modal analysis of a container with measuring equipment for space mission ..... 115

Author index ..... 119
