

CONTENTS

Chapter 1.	Introduction and aims of the study.	9
Chapter 2.	Growth hormone replacement therapy in adults: Should it be considered ? <i>Ned Tijdschrift Geneeskde 1990;134:2428-2431.</i>	15
Chapter 3.	Body composition in adult growth hormone deficient men, assessed by anthropometry and bioimpedance analysis. <i>J Clin Endocrinol Metab 1992;75:833-837.</i>	27
Chapter 4.	Consequences of childhood-onset growth hormone deficiency for adult bone mass. <i>J Bone Mineral Res 1994;9:1319-1326.</i>	45
Chapter 5.	Serum lipid levels in growth hormone deficient men. <i>Metabolism 1994;43:199-203.</i>	65
Chapter 6.	Cognitive impairments and mood disturbances in growth hormone deficient men. <i>Submitted.</i>	81
Chapter 7.	Clinical aspects of growth hormone deficiency in adults. <i>Endocr Rev 1995;16:63-86.</i>	99
Chapter 8.	The optimal growth hormone replacement dose in adults, derived from bioimpedance analysis. <i>J Clin Endocrinol Metab 1995;80:2069-2076.</i>	163

CONTENTS

Chapter 9.	Monitoring of growth hormone treatment in adults, based on measurement of serum markers. <i>J Clin Endocrinol Metab 1995, in press.</i>	189
Chapter 10.	Changes in subcutaneous and visceral fat mass during growth hormone replacement therapy in adult men. <i>Int J Obesity 1995, in press</i>	211
Chapter 11.	Summary and conclusions	233
Chapter 12.	Growth hormone replacement in adults: general considerations and future perspectives.	241
Chapter 13.	Samenvatting voor de niet-medicus.	259
