

# Contents

Preface vii  
Acknowledgments x

1 Review of Cell and Molecular Biology 1  
2 Endocrine Control of Reproduction:  
Controlled Ovarian Hyperstimulation  
for ART 40  
3 Gametes and Gametogenesis 53  
4 Gamete Interaction 77  
5 First Stages of Development 97  
6 Implantation and Early Stages of Fetal  
Development 120  
7 Stem Cell Biology 135  
8 The Clinical In-Vitro Fertilization  
Laboratory 156  
9 Quality Management in the IVF  
Laboratory 180

10 Sperm and ART 194  
11 Oocyte Retrieval and Embryo Culture 213  
12 Cryopreservation of Gametes and  
Embryos 254  
13 Micromanipulation Techniques 284  
14 Preimplantation Genetic Diagnosis 311  
15 Epigenetics and Human Assisted  
Reproduction 331  
John Huntriss
