

CONTENTS

Section 1 - CHEMICAL COMMUNICATION IN INSECTS

Structure elucidation, biosynthesis and structure-activity relationships of insect pheromones H.J. Bestmann, O. Vostrowsky	1
Adventures in photoaffinity labeling: Hormone carriers and receptors in arthropods G.D. Prestwich	21
Inhibition of biosynthesis of insect sex pheromones A. Guerrero, F. Camps, S. Hospital, A. Delgado, G. Rosell, M. Ruiz	35
Can an aromatic ring replace a dienic system ? Synthesis and biological activity of analogues of (8E,10E)-8,10-dodecadien-1-ol A. Svatoš, B. Kalinová, B. Borek, J. Vrkoč	41
Novel nitrogen-containing functional group mimics of aldehyde insect sex pheromones I. Ujváry, J.C. Dickens	45
What is the basis for the antipheromonal activity of some haloacetate sex pheromone analogs ? B. Kalinová, A. Svatoš, V. Borek, J. Vrkoč	51
Evolution of moth pheromones C. Löfstedt	57
Does the chemical structure of sex attractants reflect taxonomical position of geometrid species (Lepidoptera) ? G. Szócs, L. Ronkay, A. Vojnits, M. Tóth	75
Attractant specificity and interactions among pheromone components of orchard moth pests E. Möttus, T. Ivanova	81
Investigation of geographical variability of responses to sex attractants in leafrollers M.V. Kozlov, J. Vrkoč, E.L. Zvereva	97
Role of the spermatheca in the termination of sex pheromone production in mated gypsy moth females J.M. Giebultowicz, A.K. Raina, R.L. Ridgway	101
Pheromonal effects on the endocrine and reproductive system in worker honey bees H.H. Kaatz, H. Hildebrandt, F. Dittrich, W. Engels	105
Chemistry and trail following of a harvester ant B.D. Jackson, P.J. Wright, E.D. Morgan	109

Main components of the aggregation pheromone of the Cuban bark beetle, <u>Ips interstitialis</u> I. Valterová, B. Kalinová, M. Knížek, A. Svatoš, J. Vrkoč . . .	113
Serricorone, the female-produced oviposition deterrent of the cigarette beetle, <u>Lasioderma serricorne</u> T. Imai, H. Kodama, T. Chuman, M. Kohno . . .	117
A possible oviposition deterring pheromone in the European corn borer D. Thiéry, J.L. Le Quéré . . .	121
Sex attractant for leaf miner moth, <u>Lithocolletis pyrifoliella</u> (Lepidoptera, Gracillariidae) M.K. Laanmaa, T.V. Ivanova, E.R. Möttus, V.M. Kalinkin . . .	125
Modification and synthesis of isoprenoids directed towards insect related compounds P. Bäckström, L. Li, B. Koutek . . .	129
4,4-dimethoxybutenal and its derivatives: Accessible and versatile intermediates in pheromone synthesis A.P. Khřimian, A.L. Ovanessian, L. Streinz, A. Svatoš, M. Romanuk, Sh.O. Badanian . . .	137
A convenient synthesis of 2,13- and 3,13-octadecadienyl acetates, sex pheromone components of the <u>Synanthedon</u> species M. Hoskovec, D. Šaman, B. Koutek . . .	141
High stereoselective synthesis of the four geometrical isomers of 3,13-octadecadien-1-yl acetates L. Pop, L. Lazar, I. Oprean . . .	147
Stereoselective synthesis of all four stereoisomers of 8,10-dodecadien-1-yl acetate A. Svatoš, A. Alexakis . . .	151
Synthesis of an isomer mixture of 7,9-dodecadien-1-yl acetate, the sex pheromone of the grape vine moth, <u>Lobesia botrana</u> I. Oprean, S. Maxim, N. Serban . . .	155
Synthesis of the <u>Ips paraconfusus</u> and <u>Hylecoetus dermestoides</u> insect pheromones on the basis of 2-(1,3-butadienyl) magnesium chloride Sh.O. Badanian, Zh.A. Chobanian, S.A. Vorskanian . . .	159
Syntheses of radiolabeled terpenoid diazoacetate and diazoketone photoaffinity analogs for invertebrate hormone binding and receptor studies I. Ujváry, G.D. Prestwich . . .	163
A simple method for estimating vaporization properties of pheromone-like acetates from their molecular structures B. Koutek, M. Hoskovec, J. Vrkoč . . .	169
Application of a new NMR-method for (Z)/(E)-configurational analysis of isolated double bonds in natural products H. Poleschner, R. Radeiglia, M. Heydenreich . . .	177

Use of ion selective microelectrodes in investigation of insect olfactory transduction	
B. Kalinová, E. Ujec	181
Recording flight tracks of <u>Lobesia botrana</u> in the wind tunnel	
P. Witzgall, H. Arn	187
Section 2 - CHEMICAL INSECT-PLANT RELATIONSHIPS	
Phytoecdysteroids: Structures, occurrence, biosynthesis and possible ecological significance	
R. Lafont, A. Bouthier, I.D. Wilson	197
Phytoecdysteroids in the Chenopodiaceae (goosefoots)	
L. Dinan, S. Riseborough, M. Brading, C.Y. Clément, D.J. Wits, J. Smith, S. Colombé, V. Pettitt, D.A. Wheeler, D.R. Greenwood	215
Development of an assay for ecdysteroid-like and anti-ecdysteroid activities in plants	
C.Y. Clément, L. Dinan	221
Action of some new synthetic derivatives of phytoecdysones on insects	
J. Píš, J. Harmatha, K. Sláma	227
Insect control by biotechnical procedures - lessons from the plant kingdom	
A. Banerji	235
Action of plant allelochemicals with antifeeding effect on selected stored product insect pests	
J. Harmatha, J. Nawrot, E. Bloszyk	245
Novel feeding deterrents against the Colorado potato beetle	
F. Szurdoki, A. Szentesi, M.T. Abdel-aal, A. Székács, J. Horváth, K. Bauer, G. Matolcsy, T. Jermy	251
Effects of plant extracts on prothoracic gland function in <u>Galleria mellonella</u>	
G.-A. Böhm, H. Penzlin	255
Role of host plants in the reproductive behavior of females of <u>Heliothis</u> and <u>Helicoverpa</u> species	
A.K. Raina, E.A. Stadelbacher, J.D. Warthen, Jr.	261
Green leaf volatiles: A ubiquitous chemical signal modifies insect pheromone responses	
J.C. Dickens, R.F. Billings, T.L. Payne	277
Involvement of volatile and water-soluble compounds in oviposition host selection by the pickleworm moth, <u>Diaphania nitidalis</u> (Lepidoptera, Pyralidae)	
J.K. Peterson, K.D. Elsey	281

Olfactory discrimination among sunflower flowering stages in the European sunflower moth: Chemical, electrophysiological and behavioral approaches M. Le Métayer, D. Thiéry, M.H. Pham-Delègue, C. Masson	285
Tansy - European grape vine moth relationships B. Gabel, D. Thiéry, V. Suchy, F. Marion-Poll, P. Hradsky . .	289
Effects of age, photoperiodic regime and presence of host plant on pheromone production in <u>Ostrinia nubilalis</u> V. Borek, B. Kalinová	295
Oviposition stimulant of the lesser mulberry pyralid, <u>Glyphodes pyloalis</u> Y. Kuwahara, S. Matsuyama, T. Suzuki	299
Distribution of <u>Brevicoryne brassicae</u> and <u>Myzus persicae</u> on yellow mustard plant B. Gabrys	303
The influence of steam distilled chemical compounds from winter wheat on the biology of the grain aphid, <u>Sitobion avenae</u> A. Ciepiela, C. Sempruch, S. Niraz	307
Interaction between hydroxamic acids of triticale and the grain aphid, <u>Sitobion avenae</u> B. Leszczynski, T. Bakowski, S. Niraz	313
Anthraquinones in the eggs of <u>Galeruca tanacetii</u> (Coleoptera, Chrysomelidae) M. Hilker	319
Structural studies of cuticular hydrocarbons of storage houses pests J. Nawrot, J. Szafranek, E. Dubis, E. Hebanowska, A. Latowska, E. Malinski, K. Pihlaja	323
Trapping system for trace organic volatiles T. Jursík, K. Stránský, K. Ubík	327

Section 3 - PROSPECTS OF PRACTICAL APPLICATION OF PHEROMONES AND JUVENOIDS

New approaches to the development of semiochemicals for insect control J.A. Pickett, L.J. Wadhams, C.M. Woodcock	333
Terpenes as regulating factors in aphid morphology J. Gut, P. Harrewijn, A.M. van Oosten, P.G.M. Piron	347
The aggregation pheromone of the pea and bean weevil, <u>Sitona lineatus</u> , prospect of application for monitoring A. Horák, V. Koutek, L. Streinz, J. Vrkoč	361

Formulations of synthetic sex pheromone, trap designs and their use for mass trapping sweet potato weevil, <u>Cylas formicarius elegantulus</u>	
J.-S. Hwang, Ch.-Ch. Hung, Y.-P. Yen	365
Pheromone based monitoring of lepidopterous pests in Finland: Experiences and possibilities	
T. Tuovinen	369
Achievements and perspectives in the use of sex pheromones in cereal and technical crops in Romania	
I. Roşca, V. Brudea, E. Bucurean, F. Mureşan, I. Sandru, A. Udrea, M. Voicu	373
Romanian pheromone products and their practical application	
I. Oprean	389
Synthetic insect sex pheromones in Romania	
A.A. Botar	393
Analysis of pheromone distribution in apple orchards where <u>Cydia pomonella</u> and <u>Adoxophyes orana</u> were controlled by mating disruption	
R. Milli, J.J. de Kramer	397
Male confusion of the oriental fruit moth, <u>Cydia molesta</u> , and the plum fruit moth, <u>Cydia funebrana</u> : Small plot trials of pheromone dispensers	
I. Hrdý, V. Borek, B. Kalinová, J. Kuldová, J. Vrkoč	401
Insect neuropeptides - structures and possible use in pest control	
G. Gäde	407
Juvenoids and anti-juvenile hormone agents: Past and present	
C.A. Henrick	429
JH activity of selected insect juvenile hormone analogs: Some structure-activity observations	
Z. Wimmer, M. Romanuk, J. Kuldová, I. Hrdý, F. Sehnal	453
Activities of a new juvenoid on the representatives of Homoptera	
K. Novák, J. Zelený, F. Sehnal	457
Biological activity of juvenoids derived from 2-(4-hydroxybenzyl)-1-cyclohexanone on aphids	
J. Kuldová, Z. Wimmer, I. Hrdý	461
Effect of a novel juvenoid on the German cockroach	
D. Kodrík	467
Juvenoids highly active on pentatomid bug <u>Eurygaster integriceps</u>	
Ch.A. Kontev, R. Hanzal, L. Kozák, F. Sehnal, Z. Wimmer	471

The effect of juvenoids and inhibitors of chitin synthesis on the house fly and the perspectives for their practical implementation	
G.V. Lavcieva-Naceva, V. Lavciev	475
Synthesis and biological activities of several juvenoid derivatives	
M. Rejzek, Z. Wimmer, M. Romaňuk, F. Sehnal	481
Syntheses of and prospects for utilization of some new propheromones	
L. Streinz, J. Vrkoč, A. Horák, I. Hrdý	485
Controlled release formulation of juvenoids	
Z. Wimmer, M. Romaňuk, V. Rupeš	489
Juvenoids with the limonene system	
C. Wawrzencyk, L. Pacak	493
In vivo metabolism of a carbamate juvenoid in the flesh fly, <u>Sarcophaga bullata</u>: Distribution of radionuclide labelled IGR in the body	
B. Bennetová, R. Tykva, L. Streinz	497
In vivo metabolism of a carbamate juvenoid in the flesh fly, <u>Sarcophaga bullata</u>: Determination of metabolites	
B. Bennetová, L. Streinz, R. Tykva, Z. Wimmer	501
Daylength as an ecological factor influencing developmental rate, JH titre and JH sensitivity in caterpillars	
L. Varjas	505
Author index	511
