

Table of contents

1	Communication limits and isolated-network operation.....	8
1.1	INTRODUCTION.....	8
1.2	Island operation.....	8
1.3	Communication.....	10
1.4	CONCLUSION.....	11
2	Possible steady-state voltage stability analyses of electric power systems	12
2.1	INTRODUCTION.....	12
2.2	Analytical solution using the theory of load flow analysis	13
2.2.1	Theoretical background to the nose (voltage-power, V-P) curve	13
2.2.2	Analyzed problem I. (3-bus power system).....	15
2.3	Continuation load flow analysis	18
2.4	Initial Continuation load flow studies.....	19
2.5	CONCLUSIONS.....	22
3	New trends of nuclear waste storages	23
3.1	INTRODUCTION.....	23
3.2	Radioactive waste.....	23
3.2.1	Rise radioactive waste.....	23
3.2.2	Processing radioactive waste.....	24
3.2.3	Capacity savings of storage space.....	24
3.2.4	Effect of composition of the waste, while using a method with high-pressure	25
3.3	CONCLUSIONS.....	27
4	Short circuit capability of generator circuit breaker.....	28
4.1	INTRODUCTION.....	28
4.2	Short circuit rating of a gcb.....	28
4.2.1	Background of short-circuit current rating.....	29
4.2.2	Generator-source fault.....	30
4.3	CONCLUSIONS.....	31

5	Influence between a construction of a light fitting and a utility factor.....	33
5.1	INTRODUCTION.....	33
5.2	Definition of the utility factor	33
5.2.1	Calculation results.....	33
5.3	Researching and calculations	34
5.3.1	Results.....	35
5.4	CONCLUSIONS	36
6	Readiness of an electric network for the oncoming of the smart technology ...	37
6.1	INTRODUCTION.....	37
6.2	Smart technology.....	37
6.2.1	Smart meters.....	37
6.2.2	Smart lines.....	38
6.2.3	Security	39
6.3	CONCLUSIONS	39
7	Electromagnetic noise of hV equipment	40
7.1	INTRODUCTION.....	40
7.2	Sources of interference	40
7.2.1	Corona.....	40
7.2.2	Sparks the imperfect or interrupted connections	42
7.3	<i>Practical ways to reduce the noise of HF</i>	42
7.3.1	Corona on conductors	42
7.3.2	Corona on metal armatures and insulators	43
7.3.3	Capacitive discharge (spark)	43
8	Configuration of thin-film photovoltaic cells	44
8.1	INTRODUCTION.....	44
8.2	Solar energy and possibilities its utilization.....	45
8.2.1	Solar Energy as Renewable Energy Source	45
8.2.2	Photovoltaic Effect and Photovoltaic Cells.....	45
8.3	Thin-film photovoltaic cells.....	45
8.3.1	Briefly Introduction to Thin-Film Photovoltaic.....	45

8.3.2	Configuration of Thin-Film Photovoltaic Cells.....	46
8.3.3	Superstrate Configuration	47
8.3.4	Substrate Configuration	50
8.4	CONCLUSIONS.....	51
9	Model of Wind Power Plant With Asynchronous Generator In Simulink Platform.....	52
9.1	Mathematical Modelling Procedure	52
9.2	Models of Basic Parts of Wind Power Plant	53
9.2.1	Model of Wind Turbine	53
9.2.2	Model of Drive Train	54
9.2.3	Model of Asynchronous Generator.....	55
9.2.4	Model of Aerodynamic Control.....	57
9.3	Model of Wind Power Plant.....	58
9.4	CONCLUSIONS	60
10	Biomass as a source and as a perspective of the renewable energetics in the world, Europe and in the Czech Republic.....	61
10.1	INTRODUCTION.....	61
10.2	Sources of the biomass	61
10.3	Energy from the biomass as a renewable resource of the energy	62
10.4	Biomass in European Union (EU).....	62
10.5	Biomass in Czech Republic	63
11	Power Quality and Quality of Supply	64
11.1	INTRODUCTION.....	64
11.2	Definition of Power Quality	66
11.3	Voltage characteristics (EN 50160).....	70
11.3.1	Power quality monitoring.....	71
11.4	CONCLUSIONS	72
12	Entwicklung der Ausnutzung von Biomasse in Pilsen.....	73
12.1	EINLEITUNG.....	73

12.2	Die grüne Zukunft und die Entwicklung der AUSNUTZUNG von Biomasse in Pilsen	73
12.2.1	Die Parameter	73
12.3	ZUM ABSCHLUSS	75
13	Gliding Discharges in Rotary Machine Insulation – Diagnostics, Simulation and Measurement.....	76
13.1	INTRODUCTION.....	76
13.2	Experiment.....	77
13.3	Partial Discharges Measurement	84
13.4	CONCLUSION	84
14	LIST OF LITERATURE.....	86
15	LIST OF AUTHORS	92
16	REGISTER.....	94
